Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Specifications

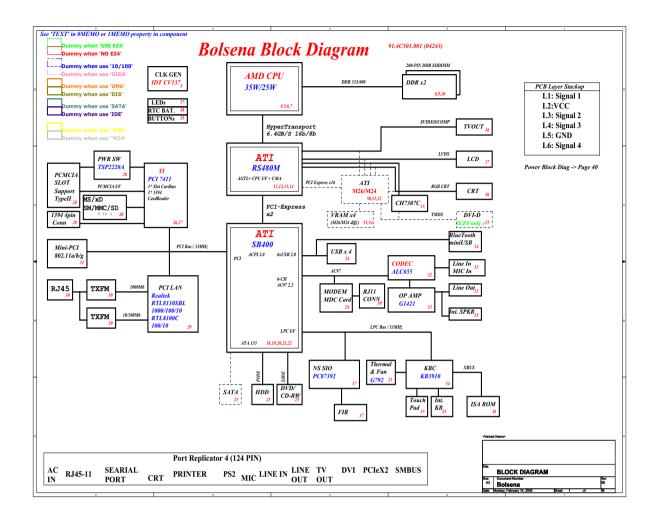

Features

Below is a brief summary of the computer's many feature:

Platform	and	memroy
		AMD Turion $^{\text{TM}}$ 64 ML-28/ML-32 processor at 1.6/1.8 GHz or higher with 128 KB L1 cache and 512 KB L2 cache, or
		AMD Turion $^{\text{TM}}$ 64 ML-30/ML-34/ML-37/ML-4 processor at 1.6/1.8/2.0/2.2 GHz or higher with 128 KB L1 cache and 1 MB L2 cache, or
		Mobile AMD Sempron TM processor 2600+/3000+ or higher with 128 KB L2 cache, or
		Mobile AMD Sempron TM processor 2600+/3000+ or higher with 256 KB L2 cache, or
		ATI RS480M and SB400 chipset
		256/512 MB of DDR333 memory, upgradeable to 2 GB using two soDIMM modules
Display		
		Thim-Film Transistor (TFT) displaying at :
		▶15.0" XGA (1024 x 768)
		▶15.0" SXGA+ (1400 x 1050)
		▶15.4" WXGA (1280 x 800)
		▶15.4" WXGA+ (1680 x 1050)
		ATI MOBILITY [™] RADEON [™] X600 or ATI MOBILITY [™] RADEON [™] X700
		Simultaneous display on LCD and CRT display
		DualView TM support
		MPEG-2/DVD hardware-assisted capability
Storage	subs	ystem
		One 40 GB or harger hard disk drive
		Optical drive options:
		DVD-Super Multi
		DVD-Dual \$\text{DVD-Dual}\$
		DVD/CD-RW combo
		6-in-1 card reader (MS/MS PRO/MMC/SD/SM/xD-Picture Card
		Simultaneous display on LCD and CRT display
		DualView TM support
		MPEG-2/DVD hardware-assisted capability
Input de	vices	
		Acer FineTouchTM keyboard with a 5-degree curve
		88/89-key keyboard
		Touchpad with 4-way integrated scroll button

		Six easy-launch buttons
Audio		
		Audio system with two built-in speakers
		MS-Sound compatible
Commu	nicat	tion
		Modem: 56K ITU V.90/V.92 modem with PTT approval; wake-on ring ready
		LAN: 10/100/1000 Mbps Fast Ethernet (for selected models); wake-on ring ready
		WLAN (manufacturing option): integrated 802.11b/g dual band (for selected models), or 802.11a/b/g tri-mode WI-Fi CERTIFIEDTM WLAN solution (for selected models); Acer SignalUp wireless technology support
		WPAN (manufacturing option): integrated Bluetooth®
Human-	cent	ric design and ergonomics
		Rugged, yet extremely portable design
		Stylish appearance
		Full-size keyboard with four programmable launch keys
		Ergonomically-centered touchpad pointing device
		Acer FineTouch keyboard with a 5-degree curve
		Internet 4-way scroll button
I/O Port	s	
		Four USB 2.0 ports
		IEEE 1394 port
		Ethernet (RJ-45) port
		Modem (RJ-11) port
		Extternal display (VGA) port
		S-video/TV-out port
		Microphone/line-in jack
		Headphones/speaker/line-out port
		Infrared (FIR) port
		Type II PC Card slot
		6-in-1 card reader
		DC-in jack for AC adaptor
		124-pin Acer ezDock connector (for selected models)

A TravelMate tour

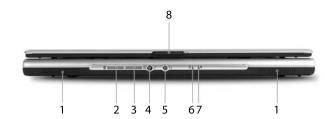

After knowing your computer features, let us show you around your new TravelMate computer.

Front View

#	Icon	Item	Description
1		Display screen	Also called LCD (liquid-crystal display), displays computer output.
2		Power button	Turns the computer on and off.
3		Microphone	Internal microphone for sound recording.
4		Keyboard	For entering data into your computer.
5		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
6		Click buttons (left, center and right)	The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button.
7		Launch keys	Buttons for launching frequently used programs.
8		Status indicators	Light-Emitting Diodes (LEDs) that turn on and off to show the status of the computer's function and components.
9		Palmrest	Comfortable support area for our hands when you use the computer.

Closed Front View

#	Icon	Item	Description
1		Speakers	Left and right speakers deliver stereo audio output.
2	*	Bluetooth [®] communication button/ indicator	Press to enable/disable Bluetooth function. Lights to indicate the status of Bluetooth- communications (manufacturing option).
3	C.	Wireless communication button/ indicator	Press to enable/disable Wireless function. Lights to indicate the status of wireless LAN communications. (manufacturing option).
4	_ PB 1 1	Line-in/mic-in jack	Accepts input from external microphones.
5	ಣ	Speaker/Line-Out/ Headphone jack	Connects to audio line-out devices (e.g., speakers, headphones).
6	Ē	Battery indicator	Lights when the battery is being charged
7	Ş	Power indicator	Lights when the computer is on.
8		Latch	Locks and releases the lid.

Left View

#	Icon	Item	Description
1		Ventilation slots	Enable the computer to stay cool, even after prolonged use.
2	S→	S-video/TV-out port	Connects to a television or display device with S-video input (manufacturing option).
3	1394	IEEE 1394 port	Connects to IEEE 1394 devices (manufacturing option).
4	•	3 USB 2.0 ports	Connects to USB 2.0 devices (e.g., USB mouse, USB camera).
5		Infrared port	Interfaces with infrared devices like infrared printer and IR-aware computer (manufacturing option).
6		PC Card slot	Connects to one Type II PC Card.
7	PRO XD	6-in-1 card reader	Accepts and MS, MS PRO, MMC, SD, SM or xD-Picture card (manufacturing option). Note: Only one card can operate at any given time.
8		PC Card slot eject button	Ejects the PC Card from the slot.

Right View

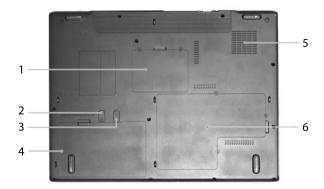

#	lcon	Item	Description
1		Optical drive	Internal optical drive; accepts CDs or DVDs depending on the optical drive type.
2		Optical drive eject button	Ejects the optical drive tray from the drive.

Rear Panel

#	Icon	Item	Description
1	ß	Security Keylock	Connects toa Kensington-compatible computer security lock.
2	==	Power jack	Connects to an AC adaptor.
3		Modem jack (RJ-11)	Connects to a phone line.
4	윰	Network jack	Connects to an Ethernet 10/100/1000-based network.
5	◆	USB 2.0 port	Connects to USB 2.0 devices (e.g., USB mouse, USB camera).
6		124-pin Acer ezDock connector (for selected models)	Connects to Acer ezDock.
7		External display port	Connects a display device (e.g., external monitor, LCD projector).

Bottom Panel

#	Item	Description
1	Wireless LAN bay	Houses the computer's wireless LAN.
2	Battery lock	Locks the battery in place.
3	Battery release latch	Releases the battery for removal.
4	Battery bay	Houses the computer's battery pack.
5	Cooling fan	Helps keep the computer cool. Note: Do not cover or obstruct the opening of the fan.
6	Memory and hard disk bay	Houses the computer's main memory and hard disk (secured by a screw).

Indicators

The computer has four easy-to-read status indicators on the upper-right above the keyboard, and four on the front panel.

The power, battery and wireless communication status indicators are visible even when the LCD display is closed.

Icon	Function	Description
A	Cap lock	Lights when Cap Lock is activated
1	Num lock	Lights when Num Lock is activated.
•	Media Activity	Indicates when the hard disc or optical drive is active.
8	Bluetooth	Indicates the status of Bluetooth communication.
Q.	Wireless LAN	Indicates the status of wireless LAN communication.
Ϋ́C	Power	Lights up when the computer is on.
₫	Battery	Lights up when the battery is being charged.

NOTE: 1. **Charging:** The light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

Launch Keys

Located at the upper-right, above the keyboard are four buttons. These buttons are called launch keys. The are: mail, Web browser, Acer Empowering key " \mathcal{C} " and one user-programmable button.

Press " C " to ru the Acer eManager. Please see "Acer eManager". The mail and Web buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable keys, run the Acer Launch Manager.

Launch key	Default application
Mail	Email application (user-programmable)
Web browser	Internet browser (user-programmable)
e	Acer eManager (user-programmable)
Р	User-programmable

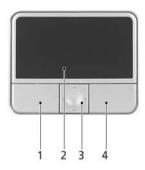

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger across the surface of the touchpad. The central location on the palmrest provides optimum comfort and support.

Touchpad Basics

The following teaches you how to use the touchpad:

- ☐ Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse.
 Tapping on the touchpad is the same as clicking the left button.
- Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

Function	Left Button (1)	Right Button (4)	Main touchpad (2)	Center button (3)
Execute	Click twice quickly		Tap twice (at the same speed as double- clicking the mouse button)	
Select	Click once		Tap once	

Function	Left Button (1)	Right Button (4)	Main touchpad (2)	Center button (3)
Drag	Click and hold, then use finger to drag the cursor on the touchpad		Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor.	
Access context menu		Click once		
Scroll				Click and hold to move up/down/left/right.

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movements. Hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

Using the Keyboard

The keyboard has full-sized keys and an embedded keypad, separate cursor keys, two Windows keys and twelve function keys.

Lock Keys and embedded mumeric keypad

The keyboard has three lock keys which you can toggle on and off.

Lock Key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Num lock <fn>+<f11></f11></fn>	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
Scroll lock <fn>+<f12></f12></fn>	When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired Access	Num Lock On	Num Lock Off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold <shift> while using cursor-control keys.</shift>	Hold <fn> while using cursor-control keys.</fn>
Main keyboard keys	Hold <fn> while typing letters on embedded keypad.</fn>	Type the letters in a normal manner.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

Key	lcon	Description	
Windows key		Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of function:	
		+ <tab> Activates next taskbar button. + <e> Opens the My Computer window</e></tab>	
		+ <f1> Opens Help and Support.</f1>	
		+ <f> Opens the Find: All Files dialog box.</f>	
		+ <r> Opens the Run dialog box.</r>	
		+ M Minimizes all windows.	
		<shift>+ + <m> Undoes the minimize all windows action.</m></shift>	
Application key		This key has the same effect as clicking the right mouse button; it opens the application's context menu.	

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like sreen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

Hot Key	Icon	Function	Description
Fn-F1		Hot key help	Displays help on hot keys.
	?		
Fn-F2	•	Accr of atting	Laurahaa tha Asar a Cattinga in Asar a Managar
FII-FZ	_	Acer eSetting	Launches the Acer eSettings in Acer eManager.
	8		
Fn-F3		Acer	Launches the Acer ePowerManagement in Acer
	♦	ePowerManagement	eManager.
Fn-F4		Sleep	Puts the computer in Sleep mode.
	Z ^z		
	2		
Fn-F5		Display toggle	Switches display output between the display screen,
			external monitor (if connected) and both.
Fn-F6		Screen blank	Turns the display screen backlight off to save power.
	*		Press any key to return.
Fn-F7		Touchpad toggle	Turns the internal touchpad on and off.
Fn-F8		Speaker toggle	Turns the speakers on and off.
	□(/=)		
Fn-⋒		Volume up	Increases the speaker volume.
	1))		
	7		

Hot Key	Icon	Function	Description
Fn-⊎		Volume down	Decreases the speaker volume.
	=		
Fn-⋻		Brightness up	Increases the screen brightness.
	Ö		
Fn-€		Brightness down	Decreases the screen brightness
	*		

Special Key

You can locate the Euro symbol and US dollar sign at the upper-center and/or bottom-right of your keyboard. To type:

The Euro symbol

- 1. Open a text editor or word processor.
- 2. Either directly press the **<Euro>** symbol at the bottom-right of the keyboard, or hold **<Alt Gr>** and then press the **<5>** symbol at the upper-center of the keyboard.

The US dollar sign

- 1. Open a text editor or word processor.
- 2. Either directly press the **<Dollar>** key at the bottom-right of the keyboard, or hold **<Shift>** and then press the **<4>** key at the upper-center of the keyboard.

NOTE: This function varies by the operating system version.

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/faq/faq12.htm for more information.

Hardware Specifications and Configurations

Processor

Item	Specification	
CPU type	AMD Turion TM 64 ML-28/ML-32 processor at 1.6/1.8 GHz or higher with 128 KB L1 cache and 512 KB L2 cache,	
	AMD Turion TM 64 ML-30/ML-34/ML-37/ML-4 processor at 1.6/1.8/2.0/2.2 GHz or higher with 128 KB L1 cache and 1 MB L2 cache	
Core logic	ATI RS480M+ ATI SB400	
CPU package	Intel socketable 478pin Micro-BGA	
CPU core voltage	1.308V (highest frequency mode) to 0.956V (low frequency mode) 0.748V (deeper sleep mode)	

BIOS

Item	Specification
BIOS vendor	Phneoix
BIOS Version	3A03
BIOS ROM type	SST 39SF040A, 512KX8 CMOS Boot Block Flash Memory
BIOS ROM size	512KB
BIOS package	32-pin PLCC
Supported protocols	ACPI 1.0b, PC Card 95, SM BIOS 2.3, IEEE1284-ECP/EPP, PCI 2.2, PnP 1.0a, DMI 2.0, PS/2 keyboard and mouse, USB 2.0, VGA BIOS, CD-ROM bootable, IEEE 1394
BIOS password control	Set by setup manual

Second Level Cache

Item	Specification
Cache controller	Built-in CPU
Cache size	512KB/1MB
1st level cache control	Always enabled
2st level cache control	Always enabled
Cache scheme control	Fixed in write-back

System Memory

Item	Specification	
Memory controller	AMD CPU built-in	
Memory size	0MB (no on-board memory)	
DIMM socket number	2 sockets	
Supports memory size per socket	1024MB	
Supports maximum memory size	2G (by two 1024MB SO-DIMM module)	
Supports DIMM type	DDR Synchronous DRAM	
Supports DIMM Speed	333 MHz	
Supports DIMM voltage	2.5V and 1.25V	
Supports DIMM package 200-pin soDIMM		
Memory module combinations	You can install memory modules in any combinations as long as they match the above specifications.	

Memory Combinations

Slot 1	Slot 2	Total Memory
OMB	128MB	128MB
ОМВ	256MB	256MB
ОМВ	512MB	512MB
ОМВ	1024MB	1024MB
128MB	128MB	256MB
128MB	256MB	384MB
128MB	512MB	640MB
1284MB	1024MB	1152MB
256MB	128MB	384MB
256MB	256MB	512MB
256MB	512MB	768MB
256MB	1024MB	1280MB
512MB	128MB	640MB
512MB	256MB	768MB
512MB	512MB	1024MB
512MB	1024MB	1536MB
1024MB	ОМВ	1024MB
1024MB	128MB	1125MB
1024MB	256MB	1280MB
1024MB	512MB	1536MB
1024MB	1024MB	2048MB

NOTE: Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. On above table, the configuration of slot 1 and slot 2 could be reversed.

LAN Interface

Item	Specification	
Chipset	Realtek RTC8110SBL(10/100/1000M); RTL8100C(10/100M)	
Supports LAN protocol	10/100/1000Mbps	
LAN connector type	RJ45	
LAN connector location	Rear side	
Features	Integrated 10/100 BASE-T transceiver Wake on LAN support compliant with ACPI 2.0 PCI v2.2	

IR Interface

Item	Specification	
Part name	VISHAY TFU6102F	
Package	8-pin SMT type	
Performance	4Mbit/s	
Compliant	IrDA 1.1	

Modem Interface

Item	Specification
Data modem data baud rate (bps)	56K

Modem Interface

Item	Specification
Supports modem protocol	V.90/V.92
Modem connector type	RJ11
Modem connector location	Rear side

Bluetooth Interface

Item	Specification	
Chipset	built-in ATI SB400	
Data throughput	723 bps (full speed data rate)	
Protocol	Bluetooth 1.1 (Upgradeable to Bluetooth 1.2 when SIG specification is ratified).	
Interface	USB 1.1	
Connector type	Mini-USB	

Wireless Module 802.11b/g (optional device)

Item	Specification	
Chipset	built-in ATI SB400	
Data throughput	11~54 Mbps	
Protocol	802.11b+g	
Interface	Mini-PCI type II	

Wireless Module 802.11a/b/g (optional device)

Item	Specification	
Chipset	built-in ATI SB400	
Data throughput	11~54 Mbps	
Protocol	802.11 a+b+g	
Interface	Mini-PCI type II	

6-in-1 card reader

Item	Specification	
Chipset	TI PCI7411	
Protocol	support MS/MS PRO/MMC/SD/SM/xD	

Hard Disk Drive Interface

Item	Specification			
Vendor & Model Name	HGST HTS424030M9AT00/ Toshiba Pluto MK3025GAS/	HGST HTS424040M9AT00/ Toshiba Pluto MK4025GAS/	HGST MORAGA IC25N060ATMR04-0 Toshiba Pluto MK6025GAS	HGST MORAGA IC25N080ATMR04-0 Toshiba Pluto MK8025GAS
Capacity (MB)	30000	40000	60000	80000
Bytes per sector	512	512	512	512
Data heads	2	2	3/4 (for Toshiba)	4

Buffer size	2048KB/	2048KB	8192KB	8192KB
Interface	ATA/ATAPI-6; ATA-6	ATA/ATAPI-6; ATA-6	ATA/ATAPI-6; ATA-6	ATA/ATA-6; ATA-6
Max. media transfer rate (disk-buffer, Mbytes/s)	372	372	350	350
Data transfer rate (host~buffer, Mbytes/s)	100 MB/Sec. Ultra DMA mode-5			
DC Power Requirements				
Voltage tolerance	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%

Combo Drive Interface

Item	Specification	
Vendor & model name	DVD/CDRW KME UIDA760 (24x24x8x24x) DVD/CDRW QSI SBW-242C (24x24x8x24x)	
Performance Specification	With CD Diskette	With DVD Diskette
Transfer rate (KB/sec)	Sustained: Max 3.6Mbytes/sec	Sustained: Max 10.8Mbytes/sec
Buffer Memory	2MB	
Interface	Enhanced IDE(ATAPI) compatible	
Applicable disc format	DVD: DVD-ROM, (DVD-5, DVD-9, DVD-10, DVD-18),DVD-R (read, single border), DVD-RW, DVD-RAM (2.6GB, 4.7GB) CD: CD-DA, CD-ROM, CD-ROM XA, CD-R, CD-RW Photo (Multisession) Video CD, CD-Extra, (CD+), CD-test	
Loading mechanism	Load: Manual Release: (a) Electrical Release (Release Button) (b) Release by ATAPI command (c) Emergency Release	
Power Requirement	•	
Input Voltage	5 V +/- 5 % (Operating)	

DVD-Dual Interface

Item		Specification	
Vendor & model name	DVD Dual HLDS GWA-4040N	DVD Dual HLDS GWA-4040N	
Performance Specification	With CD Diskette	With CD Diskette With DVD Diskette	
Transfer rate (KB/sec)	Sustained: Max 3.6Mbytes/sec	Sustained: Max 10.8Mbytes/sec	
Buffer Memory	2MB	2MB	
Interface	Enhanced IDE(ATAPI) compat	Enhanced IDE(ATAPI) compatible	

DVD-Dual Interface

Item	Specification
Applicable disc format	Support disc formats 1. Reads data in each CD-ROM, CD-ROM XA, CD-1, Video CD, CD-Extra and CD-Text 2. Reads data in Photo CD (single and Multi-session) 3. Reads standard CD-DA 4. Reads and writes CD-R discs 5. Reads and writes CD-RW discs 6. Reads and writes in each dVD+R/RW (Ver. 1.1) 7. Reads data in each DVD-ROM and DVD-R (Ver. 2.0 for Authoring) 8. Reads and writes in each DVD-R (Ver. 2.0 for general), DVD-RW and DVD+R/RW (Ver1.1)
Loading mechanism	Load: Manual Release: (a) Electrical Release (Release Button) (b) Release by ATAPI command (c) Emergency Release
Power Requirement	
Input Voltage	5 V +/- 5 % (Operating)

Audio Interface

Item	Specification			
Audio Controller	ALC655			
Audio onboard or optional	Built-in			
Mono or Stereo	Stereo			
Resolution	18 bit stereo digital to analog converter 18 bit stereo analog to digital converter			
Compatibility	AC97			
Mixed sound source	Line-in, CD			
Voice channel	8/16-bit, mono/stereo			
Sampling rate	44,1 KHz (48K byte for AC97 interface)			
Internal microphone	Yes			
Internal speaker / Quantity	Yes/2			

Video Interface

Item	Specification		
Chipset	ATI Mobility RADEON [®] X700		
Package	MBGA 708 pin		
Interface	PCIE x16		
Supports ZV (Zoomed Video) port	Yes		

Video Memory

Item	Specification	
Chipset	ATI Mobility RADEON [®] X700	
Memory size	64MB/128MB	
Interface	DDR	

USB Port

Item	Specification		
Chipset	ATI SB400		
USB Compliancy Level	2.0		
OHCI	USB 1.1 and USB 2.0 Host controller		
Number of USB port	4		
Location	three on the left side; one on the rear side		
Serial port function control	Enable/Disable by BIOS Setup		

IEEE 1394 Port

Item	Specification
Chipset	TI PCI7411
Number of IEEE 1394 port	1
Location	Left side
Connector type	IEEE 1394

PCMCIA Port

Item	Specification
PCMCIA controller	TI PCI7411
Supports card type	Type-II
Number of slots	One type-II
Access location	Left panel
Supports ZV (Zoomed Video) port	No ZV support
Supports 32 bit CardBus	Yes

System Board Major Chips

Item	Controller		
Core logic	ATI RS480M+ATI SB400

Input voltage (V)	8~20

LCD Inverter

Item	Specification
Input current (mA)	350 (max)
Output voltage (V, rms)	1600 (no load)
Output current (mA, rms)	5.6~5.4
Output voltage frequency (k Hz)	55~58K Hz

AC Adaptor

Item	Specification
Input rating	90V AC to 264V AC, 47Hz to 63Hz
Maximum input AC current	1.7A
Inrush current	220A@115VAC 220A@230VAC
Efficiency	82% min. @115VAC input full load

System Power Management

ACPI mode	Power Management
Mech. Off (G3)	All devices in the system are turned off completely.
Soft Off (G2/S5)	OS initiated shutdown. All devices in the system are turned off completely.
Working (G0/S0)	Individual devices such as the CPU and hard disc may be power managed in this state.
Suspend to RAM (S3)	CPU set power down VGA Suspend PCMCIA Suspend Audio Power Down Hard Disk Power Down CD-ROM Power Down Super I/O Low Power mode
Save to Disk (S4)	Also called Hibernate state. System saves all system states and data onto the disc prior to power off the whole system.

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press 🔁 to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Chapter 2 31

Navigating the BIOS Utility

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

To choose a menu, use the cursor left/right keys (☐ ☐).
To choose a parameter, use the cursor up/down keys (1).
To change the value of a parameter, press sor .
A plus sign (+) indicates the item has sub-items. Press ere to expand this item.
Press so while you are in any of the menu options to go to the Exit menu.
In any menu, you can load default settings by pressing . You can also press to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information vary in models**.

Chapter 2 33

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

NOTE: The screen above is for your reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
System Time	Sets the system time. The hours are displayed with 24-hour format.	Format: HH:MM:SS (hour:minute:second) System Time
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/ year) System Date
System Memory	This field reports the memory size of the system. Memory size is fixed to 640MB	
Extended Memory	This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB	
VGA Memory	Shows the VGA memory size. VGA Memory size=64/128MB	
Fast Boot	Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled.	Option: Enabled or Disabled
Power on display	Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode. Both: Simultaneously enable both the integrated LCD screen and the system's external video port	Option: Auto or Both
LCD Auto Dim	(for an external CRT or projector). Determines if the system will automatically dim the LCD brightness in order to save power when AC is not present. The system will support an automatic dimming of the LCD backlight when the AC power is NOT available (running on battery power).	Option: Enabled or Disabled
Network Boot	Enables, disables the system boot from LAN (remote server).	Option: Enabled or Disabled
F12 Boot Menu	Enables, disables Boot Menu during POST.	Option: Disabled or Enabled
D2D Recovery	Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults.	Option: Enabled or Disabled

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Chapter 2 35

Advanced

The Advanced menu screen contains parameters involving your hardware devices. It also provides advanced settings of the system.

PhoenixBIOS Setup Utility

				-		
F1 Help	↑↓ Select It	em F5/F6	Change	Values	F9 Setup Defaults	
Esc Exit	←→ Select N	lenu Enter	Select	Sub-Menu	F10 Save and Exit	

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Option
User Password is	Shows the setting of the user password.	Clear or Set
Supervisor Password is	Shows the setting of the Supervisor password	Clear or Set
Set User Password	Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.	
Set Supervisor Password	Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters.	
Primary Harddisk Security	This feature is available to user when Supervisor password is set. Password can be written on HDD only when Supervisor password or user password is set and password on HDD is set to enabled. Supervisor Password is written to HDD only when Supervisor password is being set. User password is written to HDD when both passwords are set. When both Supervisor and user password are present, both passwords can unlock the HDD.	Disabled or Enabled
Password on Boot	Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup.	Disabled or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the key. The Set Supervisor Password box appears:

Set Supervisor Password				
Enter New Password	[]		
Confirm New Password]]		

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

Chapter 2 39

- 3. Press ENTER .
 - After setting the password, the computer sets the User Password parameter to "Set".
- **4.** If desired, you can opt to enable the Password on boot parameter.
- 5. When you are done, press of to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

Set Supervisor Passwo	ord	
Enter current password	[]
Enter New Password	[1
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press [see].
- 3. Press twice without typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press 🖻 to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

Set Supervisor Password		
Enter current password	[]
Enter New Password	[1
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press [see].
- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press [street]. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.
- 6. When you are done, press

 to save the changes and exit the BIOS Setup Utility.

 The same of the

If the verification is OK, the screen will display as following.

Setup Notice

Changes have been saved.

[continue]

The password setting is complete after the user presses .

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Setup Warning

Invalid password

Re-enter Password

[continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

Setup Warning

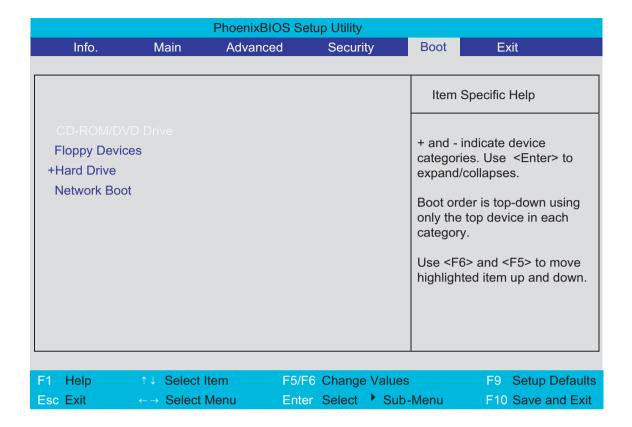

Password do not match

Re-enter Password

Chapter 2 41

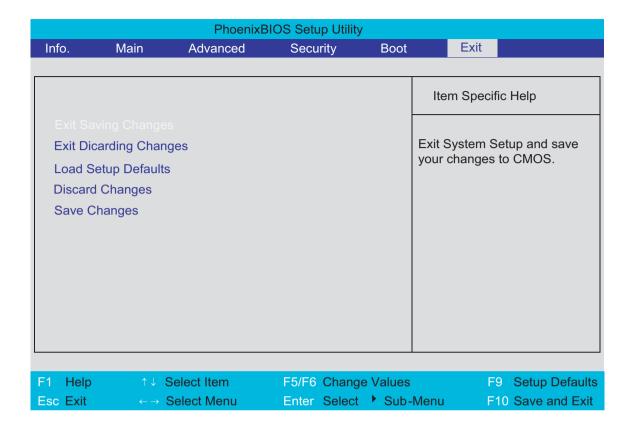

Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

The table below describes the parameters in this screen.

Parameter	Description
Exit Saving Changes	Exit System Setup and save your changes to CMOS.
Exit Discarding Changes	Exit utility without saving setup data to CMOS.
Load Setup Default	Load default values for all SETUP item.
Discard Changes	Load previous values from CMOS for all SETUP items.
Save Changes	Save Setup Data to CMOS.

Chapter 2 43

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions	The	BIOS f	lash	memory	update is	required	for the	following	conditions
---	-----	--------	------	--------	-----------	----------	---------	-----------	------------

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery Diskette** before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Phlash.

- 1. Prepare a bootable diskette.
- 2. Copy the Phlash utilities to the bootable diskette.
- **3.** Then boot the system from the bootable diskette. The Phlash utility has auto-execution function.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

Wrist grounding strap and conductive mat for preventing electrostatic discharge
Small Philips screw driver
Philips screwdriver
Plastic flat head screw driver
Tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

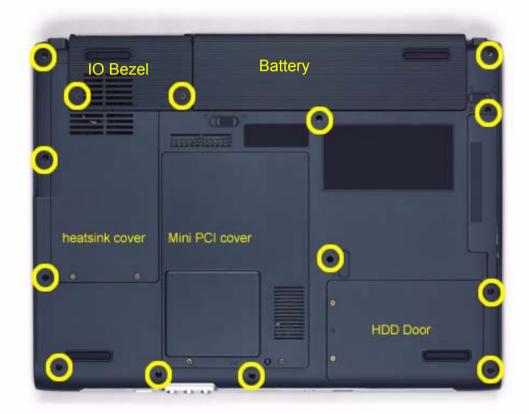

General Information

Before You Begin

Before proceeding with the disassembly procedure, make sure that you do the following:

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system.
- 3. Remove the battery pack.

NOTE: The screws used to secure bottom case and upper case are more than one type. Please group same type of screw together as you disassemble the system for service purpose. The image below is for your reference. Please pay attention to the explanation below.

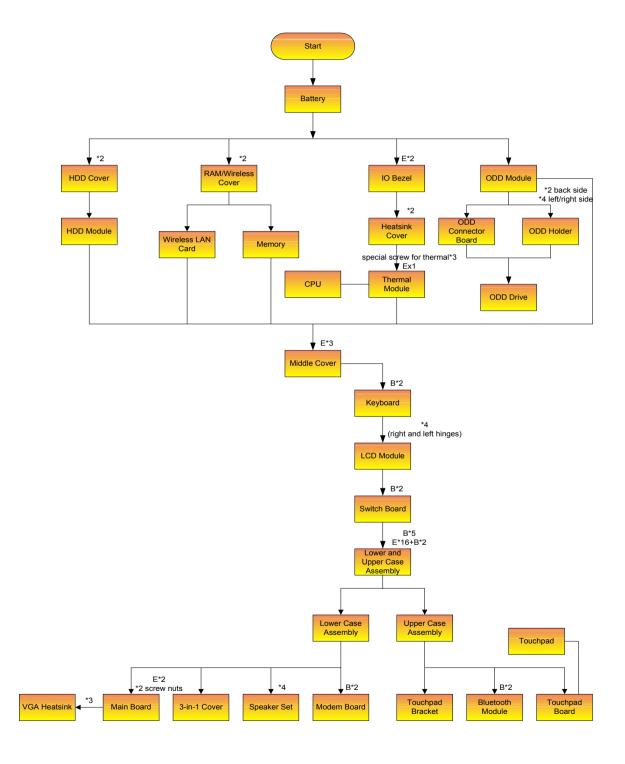

The screws that secure heatsink cover, MIni PCI cover and HDD cover are with the covers. There is no need to worry about mix them up. However, please notice that you have to group the screws on the following locations together. There are twenty screws holding the bottom case to upper case but some screws are inside the system. You may have to remove the HDD, the heatsink cover to see these screws. Mini PCI cover here also called RAM/Wireless cover.

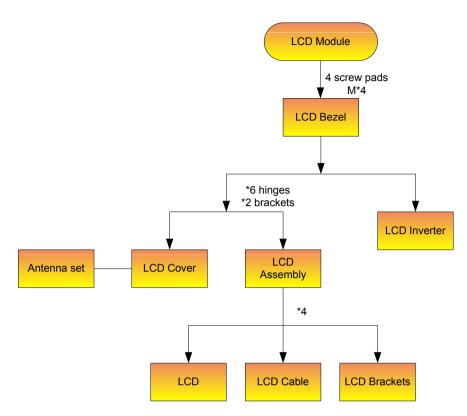

Screw Type	Location	Quantity
M2.5*6 (Part number: 86.T23V7.010)	Bottom case and IO bezel (hightlight with yellow circle)	14

Screw Type	Location	Quantity
M2.5*6 (Part number: 86.T23V7.010)	Remove the IO bezel then you will see.	2
M2.5*6 (Part number: 86.T23V7.010)	Remove the heatsink cover then you will see.	1
M2.5*6 (Part number: 86.T23V7.010)	Remove the HDD cover then you will see.	1
M2.5*3 (Part number: 86.T25V7.012)	Detach the HDD module then you will see.	1
M2.5*3 (Part number: 86.T25V7.012)	Remove the battery then you will see.	1

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the system board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Screw List

Item	Description

J	SCREW I3*3.5M-NIH(M3L3.5)

Removing the Battery Pack

- 1. Unlock the battery lock.
- 2. Slide the battery latch as shown then remove the battery pack.

Removing the HDD Module/the Memory and the Wireless LAN Card/the Thermal Module and the CPU/ODD Module and LCD Module

Removing the HDD Module

- 1. Remove the two screws holding the HDD cover.
- 2. Remove the HDD cover.
- 3. Detach the HDD module then remove it.

Removing the Memory and the Wireless LAN Card

- 1. Remove the two screws that secure the RAM/Wireless cover.
- 2. Remove the RAM/Wireless cover.

- 3. Pop up the memory then remove it.
- 4. Disconnect the auxiliary and the main wireless antennae.
- 5. Pop the wireless LAN card then remove it.

Removing the Thermal Module and CPU

- 1. Remove the two screws holding the IO bezel.
- 2. Then remove the IO bezel.
- 3. Remove the two screws that secure the heatsink cover.

- 4. Remove the heatsink cover from the main unit.
- **5.** Disconnect the fan cable.

- **6.** Remove the four screws that secure the thermal module.
- 7. Pull the thermal module outwards then remove it.

NOTE: The edge of the thermal module as shown is very sharp. Be very careful as you remove the thermal module.

- 8. Use a flat-bladed screwdriver to release the CPU lock.
- 9. Remove the CPU from the socket carefully.

Removing the ODD Module

- 1. Remove the three screws holding the middle cover.
- 2. Detach the middle cover carefully.

- 3. Turn over the keyboard as shown.
- **4.** Disconnect the keyboard cable from the main board then remove the keyboard.

- 5. Remove the screw that fastens the ODD module.
- 6. Turn over the notebook computer then detach the ODD module carefully.

NOTE: When you reattach the ODD, please make sure you attach the ODD module completely to the main unit. Otherwise, you can not fasten the screw and the screw may damage the main board.

Removing the LCD Module

- 1. Remove the three screws holding the keyboard cover.
- 2. Open the LCD module as the picture shown then detach the keyboard cover from the main unit.

- 3. Remove the two screws that secure the keyboard as shown.
- 4. Turn over the keyboard as shown and disconnect the keyboard cable then remove the keyboard.
- **5.** Pull out the antenna set with a tweezers then take out the antenna set from the main unit.

- 6. Disconnect the LCD coaxial cable.
- 7. Remove the four screws holding the right and the left hinge. Two on each side.
- 8. Then detach the LCD module from the main unit.

Disassembling the Main Unit

Separate the Main Unit Into the Upper and the Lower Case Assembly

- 1. Remove the two screws holding the switch board.
- 2. Remove the switch board.
- 3. Disconnect the touchpad FFC from the main board.

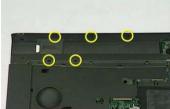

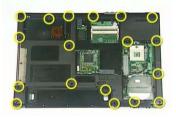

- 4. Disconnect the bluetooth cable.
- 5. Remove the five screws that secure the upper case.
- 6. Remove the eighteen screws on the bottom as shown.

- 7. Detach the upper case assembly and place it next to the lower case assembly.
- 8. Disconnect the microphone cable then remove the upper case assembly.

Disassembling the Upper Case Assembly

- 1. Disconnect the touchpad board to touchpad FFC.
- 2. Disconnect the touchpad board to main board FFC.
- 3. Then detach the touchpad board to main board FFC from the touchpad board.

- 4. Remove the three screws that secure the touchpad board.
- **5.** Remove the touchpad board from the upper case.
- 6. Disconnect the touchpad board to touchpad FFC.

- 7. Remove the touchpad board to touchpad FFC from the uppwer case assembly.
- 8. Remove the four screws holding the touchpad bracket.
- 9. Detach the touchpad bracket from the upper case assembly.

- 10. Remove the touchpad from the upper case.
- 11. Remove the two screws that secure the bluetooth module.
- 12. Disconnect the bluetooth module then remove it.

Disassembling the Lower Case Assembly

- 1. Disconnect the MDC cable from the modem board.
- 2. Detach the MDC cable from the main board.
- 3. Remove the two screws holding the modem board.

- 4. Remove the modem board from the lower case.
- **5.** Disconnect the speaker cable from the main board.
- 6. Remove the two screws that secure the main board.

- 7. Remove the two screw nuts as shown.
- 8. The you can detach the main board from the upper case.
- **9.** Remove the three screws that secure the VGA heatsink.

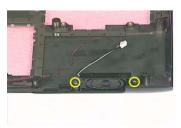

- 10. Remove the VGA heatsink from the main board as shown.
- 11. Remove the three in one cover from the lower case.
- **12.** Remove the two screws that secure the speaker set on one side.

- 13. Then remove another two screws holding the speaker set on the other side.
- **14.** Then take out the speaker set from the lower case.

Disassembling the LCD Module

- 1. Remove the four screw caps as shown.
- 2. Remove the four screws holding the LCD bezel.
- 3. Then detach the LCD bezel from the LCD module.

- 4. Disconnect the inverter board then remove it.
- 5. Remove the three screws holding the right hinge.
- **6.** Then remove the three screws that secure the left hinge.

- 7. Remove one screw that secure the LCD bracket.
- 8. Remove another screw holding the LCD bracket on the other side.
- 9. Then detach the LCD panel from the LCD cover carefully.

- 10. Remove the two screws holding the right bracket.
- 11. Then remove the right bracket.
- 12. Remove another two screws that tighten the left bracket.

- **13.** Remove the left bracket as the picture shows.
- **14.** Tear off the tape fastening the LCD cable.
- **15.** Tear off the the LCD cable fastening the LCD cable, then remove it..

Disassembling the External Modules

Disassembling the HDD Module

- 1. Remove the two screws holding the HDD bracket on one side.
- 2. Remove another two screws holding the HDD bracket on the other side.
- 3. Then take the hard disc drive out from the HDD bracket.

Disassembling the Optical Drive Module

- 1. Remove the four screws as the picture shows.
- 2. Remove the two screws that secure the optical disc drive and the ODD holder.

- 3. Push the ODD holder as shown.
- 4. Detach the ODD holder.
- 5. Disconnect the ODD connector board then remove it.

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test this model. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Duplicate symptom and obtain the failing symptoms in as much detail as possible.
- 2. Distinguish symptom. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Disassemble and assemble the unit without any power sources.
- 4. If any problem occurs, you can perform visual inspection before you fellow this chapter's instructions. You can check the following:
 - power cords are properly connected and secured;
 - there are no obvious shorts or opens;
 - there are no obviously burned or heated components;
 - all components appear normal.
- 5. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go То
Power failure. (The power indicator does not go on or stay on.)	"Power System Check" on page 65.
POST does not complete. No beep or error codes are indicated.	"Power-On Self-Test (POST) Error Message" on page 67
	"Undetermined Problems" on page 79
POST detects an error and displayed messages on screen.	"Error Message List" on page 68
Other symptoms (i.e. LCD display problems or others).	"Power-On Self-Test (POST) Error Message" on page 67
Symptoms cannot be re-created (intermittent problems).	Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 67
	"Intermittent Problems" on page 78
	"Undetermined Problems" on page 79

Chapter 4 63

System Check Procedures

External Diskette Drive Check

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the keyboard cables.
- 2. Replace the keyboard.
- 3. Replace the main board.

The following auxiliary input devices are supported by this computer:

- Numeric keypad
- External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board.
- **2.** Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- 4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- **3.** Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

"Check the Battery Pack" on page 66

Chapter 4 65

Check the Battery Pack

To check the battery pack, do the following:

From Software:

- Check out the Power Management in control Panel
- In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground). See the following figure
- 3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- After rebooting, run Tracking Pad PS2 Mode Driver. For example, run Syn touch driver.
- 2. Run utility with the PS/2 mouse function and check if the mouse is working.
- 3. If the the PS/2 mouse does not work, then check if the main board to switch board FPC is connected O.K.
- **4.** If the main board to switch board FPC is connected well, then check if the FCC on touch pad PCB connects properly.
- 5. If the FFC on touch pad PCB connects properly, then check if LS851 JP1 Pin6=5V are pulese. If yes, then replace switch board. If no, then go to next step.
- 6. Replace touch pad PCB.
- 7. If the touch pad still does not work, then replace FPC on Track Pad PCB.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 79.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Message List

Error Messages	FRU/Action in Sequence
Struck Key	See "Keyboard or Auxiliary Input Device Check" on page 64
System CMOS checksum bad - Default configuration used	RTC battery Run BIOS Setup Utility to reconfigure system, then reboot system.
Real time clock error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. Main board
Previous boot incomplete - Default configuration used	"Load Default Settings" in BIOS Setup Utility. RTC battery Main baord
Invalid System Configuration Data	"Load Default Settings" in BIOS Setup Utility. Main board
Operating system not found	Enter Setup and see if fixed disk and drive A are properly identified. Dikette drive Hard disk drive Main board

Error Message List

No beep Error Messages	FRU/Action in Sequence
Power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter.) See "Power System Check" on page 65
	Ensure every connector is connected tightly and correctly.
	Reconnect the DIMM.
	Main board.
Power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter.) See "Power System Check" on page 65
	Reconnect the LCD connector
	Hard disk drive
	LCD cable
	LCD inverter
	LCD
	Main board
Power-on indicator turns on and LCD is blank.	Reconnect the LCD connectors.
But you can see POST on an external CRT.	LCD cable
	LCD inverter
	LCD
	Main board
Power-on indicator turns on and a blinking cursor	Ensure every connector is connected tightly and correctly.
shown on LCD during POST.	Main board

Phoenix BIOS Beep Codes

Code	Beeps	POST Routine Description
02h		Verify Real Mode
03h		Disable Non-Maskable Interrupt (NMI)
04h		Get CPU type
06h		Initialize system hardware
08h		Initialize chipset with initial POST values
09h		Set IN POST flag
0Ah		Initialize CPU registers
0Bh		Enable CPU cache
0Ch		Initialize caches to initial POST values
0Eh		Initialize I/O component
0Fh		Initialize the local bus IDE
10h		Initialize Power Management
11h		Load alternate registers with initial POST values
12h		Restore CPU control word during warm boot
13h		Initialize PCI Bus Mastering devices
14h		Initialize keyboard controller
16h	1-2-2-3	BIOS ROM checksum
17h		Initialize cache before memory autosize
18h		8254 timer initialization
1Ah		8237 DMA controller initialization
1Ch		Reset Programmable Interrupt Controller
20h	1-3-1-1	Test DRAM refresh
22h	1-3-1-3	Test 8742 Keyboard Controller
24h		Set ES segment register to 4 GB
26h		Enable A20 line
28h		Autosize DRAM
29h		Initialize POST Memory Manager
2Ah		Clear 215 KB base RAM
2Ch	1-3-4-1	RAM failure on address line xxxx
2Eh	1-3-4-3	RAM failure on data bits xxxx of low byte of memory bus
2Fh		Enable cache before system BIOS shadow
30h	1-4-1-1	RAM failure on data bits xxxx of high byte of memory bus
32h		Test CPU bus-clock frequency
33h		Initialize Phoenix Dispatch Manager
36h		Warm start shut down
38h		Shadow system BIOS ROM
3Ah		Autosize cache
3Ch		Advanced configuration of chipset registers
3Dh		Load alternate registers with CMOS values
42h		Initialize interrupt vectors
45h		POST device initialization
46h	2-1-2-3	Check ROM copyright notice

48h Check video configuration against CMOS 49h Initialize PCI bus and devices 4Ah Initialize PCI bus and devices 4Ah Initialize all video adapters in system 4Bh QuidBoot start (optional) 4Ch Shadow video BIOS ROM 4Eh Display BIOS copyright notice 50h Display BIOS copyright notice 50h Display CPU type and speed 51h Initialize EISA board 52h Test keyboard 54h Set key click if enabled 58h 2-2-3-1 58h 2-2-3-1 64h Set key click if enabled 58h 2-2-3-1 58h 2-2-3-1 64h Display prompt "Press F2 to enter SETUP" 58h 1 Display service 6Ah Display prompt "Press F2 to enter SETUP" 58h 2-2-3-1 58h 1 Display service 6Ch 1 Test standed memory address lines 6Ch 1 Test standed memory address lines 6Ch 2 Test extended memory address lines	Code	Beeps	POST Routine Description

E0h		Initialize the chipset
E1h		Initialize the bridge
E2h		Initialize the CPU
E3h		Initialize the system timer
E4h		Initialize system I/O
E5h		Check force recovery boot
E6h		Checksum BIOS ROM
E7h		Go to BIOS
E8h		Set Huge Segment
E9h		Initialize Multi Processor
EAh		Initialize OEM special code
EBh		Initialize PIC and DMA
ECh		Initialize Memory type
EDh		Initialize Memory size
EEh		Shadow Boot Block
EFh		System memory test
F0h		Initialize interrupt vectors
F1h		Initialize Run Time Clock
F2h		Initialize video
F3h		Initialize System Management Mode
F4h	1	Output one beep before boot
F5h		Boot to Mini DOS
F6h		Clear Huge Segment
F7h		Boot to Full DOS

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

Symptom / Error	Action in Sequence
LCD backlight doesn't work	First, plug a monitor to CRT port. Next, enter BIOS utility to running "Load Default Settings" then reboot the system.
	Reconnect the LCD connectors.
	Keyboard (if the brightness function key doesn't work).
	LCD cable
	LCD inverter
	LCD
	Main board
LCD is too dark	Enter BIOS Utility to execute "Load Setup Default Settings", then
LCD brightness cannot be adjusted	reboot system.
	Reconnect the LCD connectors.
	Keyboard (if the brightness function key doesn't work).
	LCD cable
	LCD inverter
	LCD
	Main board
Unreadable LCD screen	Reconnect the LCD cable
Missing pels in characters	LCD cable
Abnormal screen	LCD
Wrong color displayed	Main board
LCD has extra horizontal or vertical lines displayed.	

Indicator-Related Symptoms

Symptom / Error	Action in Sequence
Indicator incorrectly remains off or on, but system runs correctly	Main board
HDD/CD-ROM active indicators cannot work	HDD/CD-ROM drive
	Device driver
	Main board

Power-Related Symptoms

Symptom / Error	Action in Sequence
Power shuts down during operation	Power source (battery pack and power adapter). See "Power System Check" on page 65.
	Battery pack
	AC adapter
	See if the thermal module is overheat (Heat sink or fan).
	Main board
The system cannot power-on.	Power source (battery pack and power adapter). See "Power System Check" on page 65.
	Battery pack
	Power adapter
	CPU
	Main board
The system cannot power-off.	In Windows XP operating system, hold and press the power switch for more than 4 seconds. If the system can power off, then the main board is OK. Verify OS in the HDD. Main board

Power-Related Symptoms

Symptom / Error	Action in Sequence	
Battery can't be charged or discharged	See "Check the Battery Pack" on page 66.	
	Battery pack	
	Main board	
System hang during POST	ODD/HDD/FDD/RAM module	
	Main board	

PCMCIA-Related Symptoms

Symptom / Error	Action in Sequence
System cannot detect the PC Card (PCMCIA)	PCMCIA slot assembly
	Main board
PCMCIA slot pin is damaged.	PCMCIA slot assembly
PC Card cannot be inserted or ejected	Check if the PCMCIA slot is blocked
	Main board

Memory-Related Symptoms

Symptom / Error	Action in Sequence
Memory count (size) appears different from actual size.	Enter BIOS Setup Utility to execute "Load Default Settings" then reboot system.
	RAM module
	Main board
	Check BIOS revision
System can power on, but you hear two long	Reinsert DIMM
beeps: "B, B" and the LCD is blank.	DIMM
	Main board

Speaker-Related Symptoms

Symptom / Error	Action in Sequence
In Windows, multimedia programs, no sound	OS volume control
comes from the computer.	Audio driver
	Speaker
	Main board
Internal speakers make noise or emit no sound.	Speaker
	Main board
Microphone cannot work	Audio driver
	Volume control in Windows XP
	Main board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence	
The system will not enter hibernation mode	Power option in Windows XP	
	Hard disk drive	
	Main board	
The system doesn't enter standby mode after	Driver of Power Option Properties	
closing the lid of the portable computer.	Lid close switch in upper case	
	Main board	

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system doesn't resume from hibernation/ standby mode.	Connect AC adapter then check if the system resumes from Standby/Hibernation mode.
	Check if the battery is low.
	Hard disk drive
	Main board
The system doesn't resume from standby mode	LCD cover switch
after opening the lid of the portable computer.	Main board
Battery fuel gauge in Windows doesn't go higher than 90%.	Refresh battery (continue use battery until power off, then charge battery).
	Battery pack
	Main board
System hangs intermittently.	Reconnect hard disk/CD-ROM drives.
	Main board

Peripheral-Related Symptoms

Symptom / Error	Action in Sequence
System configuration does not match the	Enter BIOS Setup Utility to execute "Load Setup defaults", then
installed devices.	reboot system.
	Reconnect hard disk/CD-ROM drives/FDD or other peripherals.
	Main board
External display does not work correctly.	Press Fn+F5, LCD/CRT/Both display switching
	Keyboard
	Main board
USB does not work correctly	Main board
Print problems.	Enter BIOS Setup Utility to execute "Load Default Settings" then
	reboot the system.
	Run printer self-test.
	Printer driver
	Printer cable
	Printer
	Main board
Parallel port device problems	Enter BIOS Setup Utility to execute "Load Default Settings" then
	reboot the system.
	Device driver
	Device cable
	Device
	Main board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable.
	Keyboard
	Main board
Touchpad does not work.	Reconnect touchpad cable.
	Touchpad board
	Main board

Modem/LAN-Related Symptoms

Symptom / Error	Action in Sequence
Internal modem does not work correctly.	Phone cable Driver Reconnect the Internal modem cable to the main board tightly. Main board
Internal LAN does not work correctly	Lan cable Driver Main board

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 79.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 65):

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

Non-Acer devices
Printer, mouse, and other external devices
Battery pack
Hard disk drive
DIMM
PC Cards

- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:

System boardLCD assembly

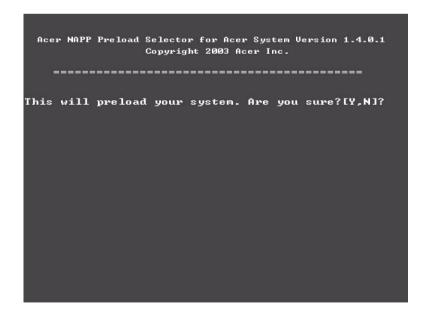

Use NAPP CD to Build Master Hard Disc Drive

CD to Disk Recovery

- 1. Prepare NAPP CD, Recovery CD and System CD.
- 2. Put NAPP CD into the optical drive. Then boot up the system.
- 3. The system will ask you if you want to build NAPP Master HDD. Please press any key to continue.

4. NAPP CD will start to preload the system, please click [Y].

5. Select CD to Disk Revocery.

6. Put the Recovery CD to the optical drive. This step is to create image files to the system, you do not have to put the Recovery CD to the optical drive in order. Place one Recovery CD to the drive at one time till you finish all Recovery CDs.

```
Please Insert Any Recovery CD

Please Press Any Key to Continue.

Press any key to continue...

-
```

After you place the Recovery CD to the optical drive, you will see the display below.

```
Please Wait for COPYING ......
X:\images \70E40I01.HDD
```

7. Then insert the System CD to the optical drive.

```
Please Insert the System CD

Please Press Any Key to Continue.

Press any key to continue...

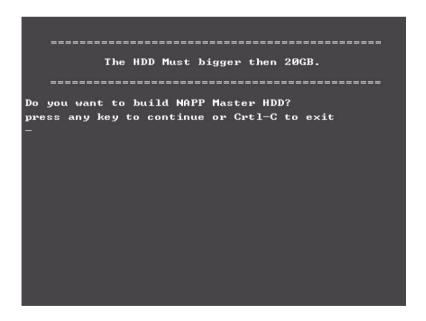

-
```

8. You will see the screen displaying "PASS" when the system has buit NAPP Master hard disc drive.

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate 4000/4500 series products. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Chapter 6 90

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows[®] XP Home environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the TravelMate 4400 series Compatibility Test Report released by the Acer Mobile System Testing Department.

NOTE: Test Compatible List is **NOT** ready when the service guide is released. We will update test compatible list accordingly once we got test report.

Microsoft® Windows® XP Pro Environment Test

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

0011011110	and moduling.
	Service guides for all models
	User's manuals
	Training materials
	Bios updates
	Software utilities
	Spare parts lists
	TABs (Technical Announcement Bulletin)
For these p	ourposes, we have included an Acrobat File to facilitate the problem-free downloading of our naterial.
Also conta	nined on this website are:
	Detailed information on Acer's International Traveler's Warranty (ITW)
	Returned material authorization procedures
	An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.
We are alw	vays looking for ways to optimize and improve our services, so if you have any suggestions or

comments, please do not hesitate to communicate these to us.
