Acer TravelMate 6000/TravelMate 8000 Series

Service Guide

Service guide files and updates are available on the ACER/CSD web; for more information, please refer to http://csd.acer.com.tw

Project Code: T41 for TravelMate 6000 Project Code: T42 for TravelMate 8000

PRINTED IN TAIWAN

Revision History

Please refer to the table below for the updates made on TravelMate6000/8000 service guide.

Date	Chapter	Updates
2004/03/26	Chapter 1	Change the left and front panel image on p.7 and p.8 Update keyboard informatin on p.28

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

- 1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Specifications

Features

This computer was designed with the user in mind. Here are just a few of its many features:

Performa	ance	
		Intel® Pentium® M processor at 1.4~1.7GHz with 1MB L2 Cache or 1.5~2.0GHz with 2MB L2 Cache
		Intel® 855GME chipset
		Memory expandable up to 2GB with 2 slots
		Internal removable optical drive (AcerMedia bay)
		High-capacity, Enhanced-IDE hard disk
		Li-lon main battery pack
		Power management system with ACPI (Advanced Configuration Power Interface)
		Smart Card interface with pre-boot authentication system for added security
Display		
		Thin-Film Transistor (TFT) liquid-crystal display (LCD) displaying 32-bit high colour up to 1024X768 eXtended Graphics Array (XGA) resolution for 14.1" and 1400X1050 Super eXtended Graphics Array+ (SXGA+) resolution for 15.0" (specification varies depending on the model)
		3D graphics engine
		TravelMate 8000 series employs ATI Mobility RADEON TM 9700 chipset with VGA RAM of 64MB/128MB (manufacturing option) delivering ground breaking 3D graphics performance
		Simultaneous display on LCD and CRT
		S-video for output to a television or display device that supports S-video input
		"Automatic LCD dim" feature that automatically decides the best settings for your display and conserves pwer
		Dual indenpendent display
		DVI-Digital improves the quality to realistic display, the transmitting via digital means
Multime	dia	
		16-bit high-fidelity AC'97 stereo audio with 3D sound and wavetable synthesizer
		Built-in dual speakers
		Built-in microphone
		High-speed optical drive (AcerMedia bay)
Connect	ivity	
		High-speed fax/data modem port
		10/100/1000 T-based Gigabit Ethernet port
		Fast infrared wireless communication
		Four (4) USB 2.0 (Universal Serial Bus) ports
		IEEE 1394 port
		Invilink [™] 802.11a/b combo or 802.11g or 802.11a/g wireless LAN (manufacturing optional)

		Bluetooth ready (manufacturing optional)		
		SD/MMC/SM/MS memory slot (manufacturing optional)		
Kevboar	d an	d Pointing Device		
		84-/85-/86-key Windows keyboard		
		Internet 4-way scroll button		
		Sleek, smooth and stylish design		
		Acer FinTouch full-sized curved keyboard		
		Ergonomically-centered touchpad pointing device		
Expansi	on			
•		One type II CardBus PC Card slot		
		Upgradeable memory		
I/O Ports	;			
		One Card bus type II slot		
		One RJ-11 phone jack (V.90/92)		
		One RJ-45 jack for LAN (Ethernet 10/100/1000)		
		One DC-in jack for AC adapter		
		One VGA port for external monitor		
		One DVI-digital port		
		One speaker/headphone/line-out jack (3.5mm mini jack)		
		One audio line-in jack (3.5mm mini jack)		
		One microphone/line-in jack		
		One IEEE 1394 port		
		One S-video TV-out port		
		One 100-pin port replicator		
		Four USB 2.0 ports (Disable middle port when docked with SPR)		
		One FIR (IrDA) port		
		One smart slot		
		4-in-1 Card Reader		
		EasyPort III support

Outlook View

A general introduction of ports allow you to connect peripheral devices, as you would with a desktop PC.

Front Open View

#	lcon	Item	Description
1		Display screen	Also called LCD (liquid-crystal display), displays computer output.
2		Power button	Turns on the computer.
3		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
			Turns on the computer power.
4		Click buttons (left, center and right)	The left and right buttons function like the left and right mouse buttons; the center button serves as a 4-way scroll button.
5		Palmrest	Comfortable support area for your hands when you use the computer.
6		Keyboard	Inputs data into your computer.
7		Status indicators	LEDs (light-emitting diode) that turn on and off to show the status of the computer, its functions and components.
8		Microphone	Internal microphone for sound recording.
9		Launch keys	Special keys for launching Internet browser, E-mail program and frequently used programs. Located at the top of the keyboard are five buttons. They are designated as E-mail button, Web browser button and two programmable buttons.

Front Panel

#	lcon	Item	Description
1		Left Speaker	Outputs sound for the left stereo speaker.
2		4-in-1 memory reader ¹	Reads cards from Smart Media, Memory Stick, MultiMedia, and Secure Digital cards.
3		4-in-1 status indicator ¹	Displays activity of 4-in-1 memory reader.
4		Infrared port	Interfaces with infrared devices (e.g., infrared printer, IR-aware computer).
5		Bluetooth button ²	Enables or disables Bluetooth functionality.
6	*	Bluetooth indicator ²	Indicates that (optional) Bluetooth is enabled.
7		InviLink button ³	Enables or disables wireless LAN feature.
8	C.	InviLink indicator ³	Indicates status of wireless LAN communication.
9		Latch	Latch for opening and closing the laptop.

NOTE: 1. Four-in-one card reader is a manufacturing option, subject to configuration. Only one card can operate at any given time.

NOTE: 2. Bluetooth button and indicator work on models with Bluetooth only.

NOTE: 3. InviLink button and indicator work on models with wireless LAN only.

Left Panel

#	Icon	Item	Description
1	•	Four (4) USB ports	Connect to Universal Serial Bus devices (e.g., USB mouse, USB camera).
2	1394	IEEE 1394 port	Connects to IEEE 1394 devices.
3		Smart Card slot	Slot for Smart Card interface with pre-boot authentication system.
4	(+ +)	Line-in jack	Accepts audio line-in devices (e.g., audio CD player, stereo walkman).
5	18 10	Microphone Jack	Accepts input from external microphones.
6	ಣ	Headphone Jack	Connect to headphones for other line-out audio devices (speakers).
7		PC Card eject button	Ejects the PC Card from the slot.
8		PC Card slot	Accepts one Type II 16-bit PC Card or 32-bit CardBus PC Card.

Right Panel

#	lcon	Item	Description
1		AcerMedia drive	Houses a removable media drive module.
2		AcerMedia indicator	Lights up when the AcerMedia drive is active.
3		Eject button	Ejects the drive tray.
4		Emergency eject slot	Ejects the drive tray when the computer is turned off.
5	===	Power jack	Connects to an AC adapter.

Rear Panel

#	Icon	Item	Description
1		Modem jack	Connects to a phone line.
2	용	Network jack	Connect to an Ethernet 10/100-based network.
3		Expansion port	Connects to I/O port replicator or EasyPort expansion devices.
4		Digital visual interface port	Provide a better quality digital connection between a PC and a display device.
5			Connects to a display device (e.g., external monitor, LCD projector) and display up to 16.7 million colors and upt 1400X1050 resolution.
6	S <u>→</u>	S-video	Connects t a television or display device with S-video input.
7		Cooling fan	Helps keep the computer cool
8	R	Security keylock	Connects to a Kensington-compatible computer security lock.

Bottom Panel

#	lcon	Item	Description
1		AcerMedia bay release latch	Unlatches the AcerMedia drive for removal or swapping.
2		AcerMedia bay	Houses an AcerMedia drive module.
3		Battery bay	Houses the computer's battery pack.
4		Battery release latches	Unlatches the battery to remove the battery pack.
5		Battery lock	Locks the battery in place.
6		Mini-PCI slot	Slot for adding mini-PCI cards.
7		Hard disk protector	Protects the hard disk from accidental bumps and vibration.
8		Hard disk bay	Houses the computer's hard disk (secured by a screw).
9		Memory slot	Slot for adding memory (DRAM).
10		Cooling fan	Helps keep the computer cool. Note: Don't cover or obstruct the opening of the fan.
11		Personal identification slot	Insert a business card or similar-sized identification card to personalize your computer.

Indicators

The computer has seven easy-to-read status icons below the display screen.

The status LCD displays icons that show the status of the computer and its components.

Icon	Function	Description
A	Caps lock	Lights when Caps Lock is activated.
1	Num lock	Lights when Num Lock is activated.
•	Media Activity	Lights when the disc or AcerMedia is activated.
Ÿ	Power	Lights green when the power is on and orange when the computer is in standby mode.
Ē	Battery	Lights orange when the battery is charging.

Lock Keys

The keyboard has three lock keys which you can toggle on and off.

Lock Key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Num lock (Fn-F11)	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
Scroll lock (Fn-F12)	When Scroll Lock is on, the screen moves one line up or down when you press ☐ and ☐ respectively. Scroll Lock does not work with some applications.

Embedded Numeric Keypad

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired Access	Num Lock On	Num Lock Off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold surj while using cursor-control keys.	Hold Fn while using cursor- control keys.
Main keyboard keys	Hold Fn while typing letters on embedded keypad.	Type the letters in a normal manner.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

Key	Icon	Description
Windows logo key		Start button. Combinations with this key perform special functions. Below are a few examples: + Tab (Activates next taskbar button) + E (Explores My Computer) + F (Finds Document) + M (Minimizes All) Sur! + Windows logo key + M (Undoes Minimize All) + R (Displays the Run dialog box)
Application key		Opens a context menu (same as a right-click).

Hot Keys

The computer uses hotkey or key combinations to access most of the computer's controls like sreen brightness, volume output.

To activate hot keys, press and hold the **Fn** key before pressing the other key in the hot key combination.

Hot Key	Icon	Function	Description
Fn-F1		Hot key help	Displays help on hot keys.
	?		
Fn-F2	-	System Property	Displays the System Property.
1 11-1 2		System r Toperty	Displays the System Property.
	8		
Fn-F3	⊗	Power Options	Display the Power Options Properties used by the computer (function available if supported by operating system).
Fn-F4		Sleep	Puts the computer in Sleep mode.
	z ^z		
Fn-F5		Display toggle	Switches display output between the display screen, external monitor (if connected) and both the display screen and external monitor.
Fn-F6	*	Screen blank	Turns the display screen backlight off to save power. Press any key to return.
Fn-F7		Touchpad toggle	Turns the internal touchpad on and off.
Fn-F8		Speaker toggle	Turns the speakers on and off.
	□(/=(>)		
Fn-₁	1)	Volume up	Increases the speaker volume.
	Ť		

Hot Key	Icon	Function	Description
Fn-⊍		Volume down	Decreases the speaker volume.
	(1)		
Fn-⋻		Brightness up	Increases the screen brightness.
	Ö		
Fn-€		Brightness down	Decreases the screen brightness
	*		

The Euro Symbol

If your keyboard layout is set to United States-International or United Kingdom or if you have a keyboard with a European layout, you can type the Euro symbol on your keyboard.

NOTE: For US keyboard users: The keyboard layout is set when you first set up Windows. For the Euro symbol to work, the keyboard layout has to be set to United States-International.

To verify the keyboard type in Windows 2000, follow the steps below:

- 1. Click on Start, Settings, Control Panel.
- 2. Double-click on Keyboard.
- 3. Click on the Language tab.
- Verify that keyboard layout used for En English (United States)" is set to United States-International. If not, select and click on Properties; then select United States-International and click on OK.
- 5. Click on OK.

To verify the keyboard type in Windows XP, follow the steps below:

- 1. Click on Start, Control Panel.
- 2. Double-click on Regional and Language Options.
- 3. Click on the Language tab and click on Details.
- Verify that the keyboard layout used for "En English (United States)" is set to United States-International.
 If not, select and click on ADD; then select United States-International and click on OK.
- 5. Click on OK.

To type the Euro symbol:

- 1. Locate the Euro symbol on your keyboard.
- 2. Open a text editor or word processor.
- 3. Hold Alt Gr and press the Euro symbol.

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/faq/faq12.htm for more information.

Launch Keys

Located at the top of keyboard are five buttons. The left-most button is power button. To the right of the pwoer button are four launch keys. They are designated as the mail button, the web browser button and two programmable buttons (P1 and P2).

Launch Key	Default application
Email	Email application
Web browser	Internet browser application
P1	User-programmable
P2	User-programmable

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger on the surface of the touchpad. The central location on the palmrest provides optimal comfort and support.

NOTE: If you are using an external USB mouse, you can press Fn-F7 to disable the touchpad.

Touchpad Basics

The following teaches you how to use the touchpad:

- Move your finger across the touchpad to move the cursor.
- Press the left (1) and right (3) buttons located on the edge of the touchpad to do selection and execution functions. These two buttons are similar to the left and right buttons on a mouse.
 Tapping on the touchpad produces similar results.
- ☐ Use the 4-way scroll (2) button (top/bottom/left/and right) to scroll.

Function	Left Button	Right Button	Scroll Button	Тар
Execute	Click twice quickly			Tap twice (at the same speed as double-clicking the mouse button)
Select	Click once			Tap once
Drag	Click and hold, then use finger to drag the cursor on the touchpad			Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor
Access context menu		Click once		

Function	Left Button	Right Button	Scroll Button	Тар
Scroll			Click and hold the button in the desired direction (up/ down/left/right)	

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movements. Hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

Hardware Specifications and Configurations

Processor

Item	Specification
CPU type	Intel Pentium M processor at 1.4~1.7GHz
	Intel Pentium M processor at 1.5~2.0GHz
Core logic	Intel 855GME+ICH4
CPU package	/μ-FCPGA package
CPU core voltage	core voltage subjects to various CPU type

BIOS

Item	Specification
BIOS vendor	Phneoix
BIOS Version	3A01
BIOS ROM type	Flash ROM
BIOS ROM size	512KB
BIOS package	PLCC32-Lead
Supported protocols	ACPI 1.0b, PC Card 95, SM BIOS 2.3, IEEE1284-ECP/EPP, PCI 2.2, PnP 1.0a, DMI 2.0, PS/2 keyboard and mouse, USB 2.0, VGA BIOS, CD-ROM bootable, IEEE 1394
BIOS password control	Set by setup manual

Second Level Cache

Item	Specification
Cache controller	Built-in CPU
Cache size	1MB for Intel Pentium M processor at 1.4~1.7GHz (Banias) 2MB for Intel Pentium M processor at 1.5~2.0GHz (Dothan)
1st level cache control	Always enabled
2st level cache control	Always enabled
Cache scheme control	Fixed in write-back

System Memory

Item	Specification
Memory controller	Intel 855GME built-in
Memory size	0MB (no on-board memory)
DIMM socket number	2 sockets
Supports memory size per socket	1024MB
Supports maximum memory size	2G (by two 1024MB SO-DIMM module)
Supports DIMM type	DDR Synchronous DRAM
Supports DIMM Speed	333 MHz/266 MHz
Supports DIMM voltage	2.5V and 1.25V
Supports DIMM package	200-pin soDIMM, 1.27" height (Max)
Memory module combinations	You can install memory modules in any combinations as long as they match the above specifications.

Memory Combinations

Slot 1	Slot 2	Total Memory
0MB	128MB	128MB
ОМВ	256MB	256MB
ОМВ	512MB	512MB
ОМВ	1024MB	1024MB
128MB	128MB	256MB
128MB	256MB	384MB
128MB	512MB	640MB
128MB	1024MB	1152MB
256MB	128MB	384MB
256MB	256MB	512MB
256MB	512MB	768MB
256MB	1024MB	1280MB
512MB	128MB	640MB
512MB	256MB	768MB
512MB	512MB	1024MB
512MB	1024MB	1536MB
1024MB	0MB	1024MB
1024MB	128MB	1125MB
1024MB	256MB	1280MB
1024MB	512MB	1536MB
1024MB	1024MB	2048MB

NOTE: Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. On above table, the configuration of slot 1 and slot 2 could be reversed.

LAN Interface

Item	Specification
Chipset	BroadCom BCM5705M
Supports LAN protocol	10/100 Mbps
LAN connector type	RJ45
LAN connector location	Rear panel

IR Interface

Item	Specification
Part name	VISHAY TFDU6102
Package	8-pin SMT type
Performance	4Mbit/s
Compliant	IrDA 1.1

Modem Interface

Item	Specification
Data modem data baud rate (bps)	56K
Supports modem protocol	V.90/V.92
Modem connector type	RJ11
Modem connector location	Rear panel

Bluetooth-MODEM Interface

Item	Specification	
Chipset	CSR BC02 (Blue-tooth)/Agere Scorpio I (MODEM)	
Data throughput	200k bps (Blue-tooth)/56K bps (MODEM)	
Protocol	Blue-tooth 1.1	
Interface	USB 1.1+MDC	
Connector type	RJ11 (MODEM)	

Wireless Module 802.11b (optional device)

Item	Specification
Chipset	Intel
Data throughput	11M bps
Protocol	802.11b
Interface	Mini-PCI type II

Wireless Module 802.11a/b (optional device)

Item	Specification
Chipset	Intel
Data throughput	11M~54M bps
Protocol	802.11 a+b
Interface	Mini-PCI type II

Wireless Module 802.11b/g (optional device)

Item	Specification
Chipset	Intel
Data throughput	11M~54M bps
Protocol	802.11 b+g
Interface	Mini-PCI type II

Four-in-One Card Reader

Item	Specification	
Chipset	OZ711M3	
Protocol	SMC, MS, MMC, and SD	

Hard Disk Drive Interface

Item	Specification

Item	Specification
Applicable disc format	Support disc formats 1. Reads data in each CD-ROM, CD-ROM XA, CD-1, Video CD, CD-Extra and CD-Text 2. Reads data in Photo CD (single and Multi-session) 3. Reads standard CD-DA 4. Reads and writes CD-R discs 5. Reads and writes CD-RW discs 6. Reads and writes in each dVD+R/RW (Ver. 1.1) 7. Reads data in each DVD-ROM and DVD-R (Ver. 2.0 for Authoring) 8. Reads and writes in each DVD-R (Ver. 2.0 for general), DVD-RW and DVD+R/RW (Ver1.1)
Loading mechanism	Load: Manual Release: (a) Electrical Release (Release Button) (b) Release by ATAPI command (c) Emergency Release
Power Requirement	
Input Voltage	5 V +/- 5 % (Operating)

Audio Interface

Item	Specification
Audio Controller	RealTek ALC202
Audio onboard or optional	Built-in
Mono or Stereo	Stereo
Resolution	20 bit stereo Digital to analog converter 18 bit stereo Analog to Ditial converter
Compatibility	AC97
Mixed sound source	Line-in, CD
Voice channel	8/16-bit, mono/stereo
Sampling rate	44,1 KHz (48K byte for AC97 interface)
Internal microphone	Yes
Internal speaker / Quantity	Yes/2

Audio Jack

Item	Specification
Number of audio jack	3
Rated input	1W
Connector type	Headphone out, microphone in and line-in

Video Interface

Item	Specification
Chipset	Intel 855GME built-in for TravelMate 6000 series ATI Mobility RADEON 9700 for TravelMate 8000 series
Interface	AGP 4X
Supports ZV (Zoomed Video) port	No

Video Memory

Item	Specification
Chipset	ATI Mobility RADEON 9700 for TravelMate 8000 series
Memory size	64MB/128MB
Interface	DDR

USB Port

Item	Specification
Chipset	ICH4M
USB Compliancy Level	2.0
OHCI	USB 2.0
Number of USB port	4
Location	Left side
Serial port function control	Enable/Disable by BIOS Setup

IEEE 1394 Port

Item	Specification
Chipset	TI 43AB21
InterfaceUSB Compliancy Level	IEEE 1394 1.0
Number of IEEE 1394 port	1
Location	Left side
Connector type	IEEE 1394

PCMCIA Port

Item	Specification
PCMCIA controller	OZ7111M3
Supports card type	Type-II
Number of slots	One type-II
Access location	Right panel
Supports ZV (Zoomed Video) port	No ZV support
Supports 32 bit CardBus	Yes

Smart Card Reader

Item	Specification
Chipset	PCMCIA chip built-in
Number of slot	1
Location	Left side

Input rating	90VAC to 264VAC, 47Hz to 63Hz
Maximum input AC current	3.16A
Inrush current	50A@115VAC 100A@230VAC
Efficiency	83% min. @115VAC input full load

System Power Management

ACPI mode	Power Management
Mech. Off (G3)	All devices in the system are turned off completely.
Soft Off (G2/S5)	OS initiated shutdown. All devices in the system are turned off completely.
Working (G0/S0)	Individual devices such as the CPU and hard disk may be power managed in this state.

Chapter 1 29

System Power Management

ACPI mode	Power Management	
Suspend to RAM (S3)	CPU set power down VGA Suspend	
	PCMCIA Suspend	
	Audio Power Down	
	Hard Disk Power Down	
	CD-ROM Power Down	
	Super I/O Low Power mode	
Save to Disk (S4)	Also called Hibernate state. System saves all system states and data onto the disk prior to power off the whole system.	

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press to enter setup. Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Chapter 2 31

Navigating the BIOS Utility

There are six menu options: Info., Main, System Devices, Security, Boot, and Exit.

Follow these instructions:

To choose a menu, use the cursor left/right keys (☐ ☑).
To choose a parameter, use the cursor up/down keys (<a>↑ .
To change the value of a parameter, press or or or
A plus sign (+) indicates the item has sub-items. Press [step to expand this item.
Press ESS while you are in any of the menu options to go to the Exit menu.
In any menu, you can load default settings by pressing <a>

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values.

This menu provides you the information of the system.

Information

Parameter	Description
IDE1 Model Name	This field displays the model name of HDD installed on Primary IDE master. The system can automatically detect the hard disc model name. If there is no hard disc drive or unknown type, this field would display "None".
IDE1 Serial Number	This field shows the serial number of HDD installed on Primary IDE master. If no hard disc drive or other devices are installed, this field would display a blank line.
IDE2 Model Name	This field displays the model name of HDD installed on Secondary IDE master. The system can automatically detect the hard disc model name. If there is no hard disc drive or unknown type, this field would display "None".
Serial Number	This field shows the serial number of HDD installed on Secondary IDE master. If no hard disc drive or other devices are installed, this field would display a blank line.
UUID	This will be visible only when there is an internal LAN device present.

Chapter 2 33

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters. It allows the user to specify standard IBM PC AT system parameters.

NOTE: The screen above is for reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
System Time	Sets the system time.	Format: HH:MM:SS (hour:minute:second) System Time
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/ year) System Date
System Memory	This field reports the memory size of the system. Memory size is fixed to 640MB	
Extended Memory	This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-2MB	
Video Memory	Shows the VGA memory size. The default value is set to 16MB	Option: 16 /32MB Note: VGA memory size for TravelMate 8000 series 128MB
Quiet Boot	Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled.	Option: Enabled or Disabled
Power on display	Auto: During power process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be in CRT (or projector) only mode. Otherwise it will be in LCD only mode. Both: Simultaneously enable both the integrated LCD screen and the system's external video port (for an external CRT or projector).	Option: Auto or Both
LCD Auto Dim	Determines if the system will automatically dim the LCD brightness in order to save power when AC is not present.	Option: Enabled or Disabled

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Chapter 2 35

Advanced

The Advanced menu screen contains parameters involving your hardware devices. It also provides advanced settings of the system.

	PI	noenixBIOS S	etup Utility

Chapter 2 37

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description Option	
Supervisor Password is	Shows the setting of the supervisor password.	Clear or Set
User Password is	Shows the setting of the uer password.	Clear or Set
Primary Harddisk Security	This feature is available to user when Supervisor password is set. Password can be written on HDD only when Supervisor password or user password is set and password on HDD is set to enabled. Supervisor Password is written to HDD only when Supervisor password is being set. User password is written to HDD when both passwords are set. When both Supervisor and user password are present, both passwords can unlock the HDD.	
Password on Boot	Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup.	Disabled or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Supervisor Password box appears:

Set Supervisor Password		
Enter New Password]]
Confirm New Password]	1

2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

- 3. Press ENTER .
 - After setting the password, the computer sets the User Password parameter to "Set".
- 4. If desired, you can opt to enable the Password on boot parameter.
- 5. When you are done, press me to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

Set Supervisor Passwo	rd	
Enter current password	[]
Enter New Password	[]
Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press 🔤 .
- 3. Press without typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press of to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the 1 and 1 keys to highlight the Set Supervisor Password parameter and press the key. The Set Password box appears:

- 2. Type the current password in the Enter Current Password field and press [see].
- 3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press [see]. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.

If the verification is OK, the screen will display as following.

The password setting is complete after the user presses .

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

Chapter 2 39

Setup Warning

Invalid password

Re-enter Password

[continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

Setup Warning

Password do not match

Re-enter Password

Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the distette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.

Chapter 2 41

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

The table below describes the parameters in this screen.

Parameter	Description	
Exit Saving Changes	Exit System Setup and save your changes to CMOS.	
Exit Discarding Changes	Exit utility without saving setup data to CMOS.	
Load Setup Default	Load default values for all SETUP item.	
Discard Changes	Load previous values from CMOS for all SETUP items.	
Save Changes	Save Setup Data to CMOS.	

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery**Diskette before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Phlash.

- 1. Prepare a bootable diskette.
- 2. Copy the Phlash utilities to the bootable diskette.
- 3. Then boot the system from the bootable diskette. The Phlash utility has auto-execution function.

Chapter 2 43

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

Wrist grounding strap and conductive mat for preventing electrostatic discharge
Small Philips screw driver
Philips screw driver
Flat head screwdriver
Plastic flat head screw driver
Hex screw driver
Tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

General Information

Before You Begin

Before proceeding with the disassembly procedure, make sure that you do the following:

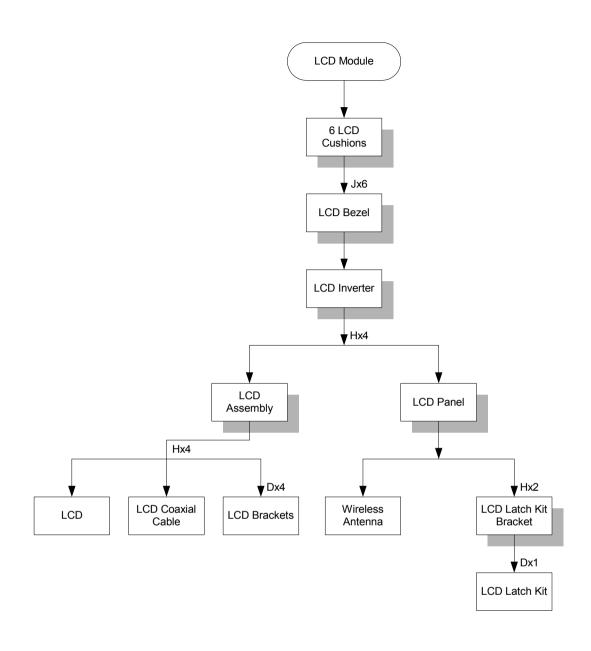

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system.
- 3. Remove the battery pack.

NOTE: TravelMate 6000/ TravelMate 8000 series product uses mylar or tape to fasten the FFC/FPC/ connectors/cable, you may need to tear the tape or mylar before you disconnect different FFC/FPC/ connectors.,

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the system board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Removing the Battery Pack

- 1. Release the battery lock.
- 2. Slide the battery latch then remove the battery.

Removing the Optical Module/HDD Module/Wireless Lan Card and LCD module

Removing the Optical Module

- 1. Slide the optical disk drive latch.
- 2. Remove the ODD module.

Removing the HDD Module

- 1. Remove the two screws holding the HDD cover.
- 2. Remove the HDD cover.
- 3. Remove the HDD module.

Removing the Wireless LAN Card

- 1. Remove the screw that secures the PCI door then remove the PCI door.
- 2. Disconnect the right and the left wireless antenna.
- 3. Pop out the wireless LAN card then remove it.

Removing the LCD Module

- 1. Remove the four screws that secures the middle cover; two one each side.
- 2. Detach middle cover with the assistance of a plastic flat head screw driver.
- 3. Disconnect the LCD cable then take out the cable from the upper case.

- **4.** Disconnect the left wireless LAN antenna line. Then take out the antenna from the upper case with a tweezers.
- **5.** Unscrew the four screws holding the LCD hinges; two on each side.
- 6. Then remove the entire LCD module.

Disassembling the Main Unit

Remove the function key board and the keyboard

- 1. Take the wireless antenna out of the hook on the function key board.
- 2. Disconnect function key board connector
- 3. Unscrew the three screws holding the function key board.

- 4. Remove the three screws that secure the keyboard.
- 5. Turn over the unit and remove the two screws as the picture shows.
- 6. Turn over the keyboard. Disconnect the keyboard FFC then remove the keyboard.

Separate the main unit into the logic upper and the logic lower assembly

- 1. Remove the three screws on the rear panel.
- 2. Unscrew the 19 screws on the bottom panel.
- 3. Detach the front bezel from the main unit.

- 4. Remove the two screws. Then take the right and the left antenna off the main unit.
- 5. Disconnect the touchpad cable.
- **6.** Pull out the right and the left wireless LAN antenna, then detach the logic upper assembly from the logic lower assembly.

Disassembling the logic upper assembly

- 1. Take out the touchpad cable from the small hook on touchpad holder.
- 2. Remove the four screws holding the touchpad shielding and the touchpad board.

- 3. Disconnect the touchpad FFC from the touchpad board.
- **4.** Remove the touchpad board.
- **5.** Remove the wireless and bluetooth button off the touchpad board.

- **6.** Remove the four screws that fasten the touchpad holder.
- 7. Remove the touchpad off the logic upper assembly.
- 8. Disconnect touchpad FFC.

Disassembling the logic lower assembly

- 1. In order to take out the main board from the upper case, first remove the four screws that fasten the top cover shielding.
- 2. Remove the three screws holding the 4-in-1 card reader, then remove it.

- 3. Unscrew the four screws that secure the thermal module.
- 4. Disconnect the fan connector then remove the thermal module.

- **5.** Remove one screw that secures the main board as picture shows.
- 6. Remove another screw that fastens the main board.
- 7. Take out the bluetooth antenna.

- 8. Disconnect the speaker set cable.
- 9. To remove the main board from the lower case assembly, first press the PCMCIA card button.
- 10. Then take the main board off the lower case assembly.

- 11. Unscrew the two screws that fasten the HDD bracket.
- 12. Remove one screw holding the top cover shielding.

13. Disconnect the microphone cable. Then remove the top cover shielding.

- 14. Turn the CPU lock counter clock-wise with a flat head screw driver. Then remove the CPU.
- 15. Pop out the memory then remove it.
- **16.** Unscrew the two screws that secure the modem/bluetooth combo card. Remove the modem/bluetooth combo card then disconnect the connector.

- 17. Disconnect the bluetooth antenna and the modem cable.
- 18. Disconnect the smart card reader FPC.
- 19. Unscrew the two screws holding the smart card reader then remove it.

Disassembling the LCD Module

- 1. Remove the six screw pad and the six screws.
- 2. Detach the LCD bezel carefully.
- 3. Disconnect LCD inverter.

- 4. Remove the two screws holding the LCD to LCD panel.
- **5.** Then remove the LCD.
- 6. Remove the four screws that fasten the right and the left LCD brackets. Then remove the right and the left LCD brackets.

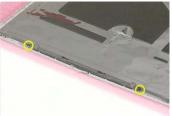

- 7. Tear off the electric conductive tape that fastens the LCD coaxial cable.
- 8. Tear off another electric conductive tape that fastens the LCD coaxial cable.
- 9. Disconnect the LCD coaxial cable.

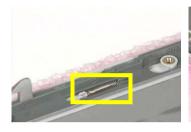

- 10. Detach the wireless antenna from the LCD panel.
- 11. Remove the two screws holding the LCD latch kit.
- 12. Remove the LCD latch kit bracket.

- 13. Unhook the spring.
- 14. Remove the screw that fastens the LCD latch kit.
- 15. Then remove the LCD latch kit.

Disassembling the External Modules

Disassembling the HDD Module

- 1. Remove the four screws holding the HDD bracket; two on each side.
- 2. Take out the HDD from the HDD bracket.

Disassembling the Optical Drive Module

- 1. Remove the two screws holding the ODD bracket.
- 2. Remove another screw as the picture shows.
- 3. Then remove the last two screws on the back side of the ODD module.

- 4. Slide the ODD from the ODD bracket.
- 5. Then remove the optical bracket.

- **6.** In order to open the ODD, use an uncurved pin to press the emergency eject hole.
- 7. Remove the three screws that fasten the ODD door.
- 8. Then detach the ODD door.

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test this model. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

- 1. Duplicate symptom and obtain the failing symptoms in as much detail as possible.
- 2. Distinguish symptom. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Disassemble and assemble the unit without any power sources.
- **4.** If any problem occurs, you can perform visual inspection before you fellow this chapter's instructions. You can check the following:

power cords are properly connected and secured;

there are no obvious shorts or opens;

there are no obviously burned or heated components;

all components appear normal.

5. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go То
Power failure. (The power indicator does not go on or stay on.)	"Power System Check" on page 63.
POST does not complete. No beep or error codes are indicated.	"Power-On Self-Test (POST) Error Message" on page 65
	"Undetermined Problems" on page 77
POST detects an error and displayed messages on screen.	"Error Message List" on page 66
Other symptoms (i.e. LCD display problems or others).	"Power-On Self-Test (POST) Error Message" on page 65
Symptoms cannot be re-created (intermittent problems).	Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 65
	"Intermittent Problems" on page 76
	"Undetermined Problems" on page 77

Chapter 4 61

System Check Procedures

External Diskette Drive Check

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

- Reconnect the external diskette drive/DVD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

- 1. Boot from the diagnostics diskette and start the diagnostics program.
- 2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
- 3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

- 1. Reconnect the external diskette drive/CD-ROM module.
- 2. Replace the external diskette drive/CD-ROM module.
- 3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

- 1. Reconnect the keyboard cables.
- 2. Replace the keyboard.
- 3. Replace the main board.

The following auxiliary input devices are supported by this computer:

- Numeric keypad
- External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

- 1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to main board.
- 2. Go to the diagnostic memory in the test items.
- 3. Press F2 in the test items.
- Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

- 1. Remove the battery pack.
- 2. Connect the power adapter and check that power is supplied.
- **3.** Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

"Check the Battery Pack" on page 64

Chapter 4 63

Check the Battery Pack

To check the battery pack, do the following:

From Software:

- Check out the Power Management in control Panel
- In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
- 3. Repeat the steps 1 and 2, for both battery and adapter.
- 4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

- 1. Power off the computer.
- Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground). See the following figure
- 3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

- After rebooting, run Tracking Pad PS2 Mode Driver. For example, run Syn touch driver.
- 2. Run utility with the PS/2 mouse function and check if the mouse is working.
- 3. If the the PS/2 mouse does not work, then check if the main board to switch board FPC is connected O.K.
- **4.** If the main board to switch board FPC is connected well, then check if the FCC on touch pad PCB connects properly.
- 5. If the FFC on touch pad PCB connects properly, then check if LS851 JP1 Pin6=5V are pulese. If yes, then replace switch board. If no, then go to next step.
- 6. Replace touch pad PCB.
- 7. If the touch pad still does not work, then replace FPC on Track Pad PCB.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see "Undetermined Problems" on page 77.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Chapter 4 65

Index of Error Messages

Error Message List

Error Messages	FRU/Action in Sequence
Struck Key	See "Keyboard or Auxiliary Input Device Check" on page 62
System CMOS checksum bad - Default configuration used	RTC battery Run BIOS Setup Utility to reconfigure system, then reboot system.
Real time clock error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. Main board
Previous boot incomplete - Default configuration used	"Load Default Settings" in BIOS Setup Utility. RTC battery Main baord
Invalid System Configuration Data	"Load Default Settings" in BIOS Setup Utility. Main board
Operating system not found	Enter Setup and see if fixed disk and drive A are properly identified. Dikette drive Hard disk drive Main board

Error Message List

No beep Error Messages	FRU/Action in Sequence
Power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter.) See "Power System Check" on page 63
	Ensure every connector is connected tightly and correctly.
	Reconnect the DIMM.
	Main board.
Power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter.) See "Power System Check" on page 63
	Reconnect the LCD connector
	Hard disk drive
	LCD cable
	LCD inverter
	LCD
	Main board
Power-on indicator turns on and LCD is blank.	Reconnect the LCD connectors.
But you can see POST on an external CRT.	LCD cable
	LCD inverter
	LCD
	Main board
Power-on indicator turns on and a blinking cursor	Ensure every connector is connected tightly and correctly.
shown on LCD during POST.	Main board

Chapter 4 67

Phoenix BIOS Beep Codes

Code	Beeps	POST Routine Description
02h	·	Verify Real Mode
03h		Disable Non-Maskable Interrupt (NMI)
04h		Get CPU type
06h		Initialize system hardware
08h		Initialize chipset with initial POST values
09h		Set IN POST flag
0Ah		Initialize CPU registers
0Bh		Enable CPU cache
0Ch		Initialize caches to initial POST values
0Eh		Initialize I/O component
0Fh		Initialize the local bus IDE
10h		Initialize Power Management
11h		Load alternate registers with initial POST values
12h		Restore CPU control word during warm boot
13h		Initialize PCI Bus Mastering devices
14h		Initialize keyboard controller
16h	1-2-2-3	BIOS ROM checksum
17h		Initialize cache before memory autosize
18h		8254 timer initialization
1Ah		8237 DMA controller initialization
1Ch		Reset Programmable Interrupt Controller
20h	1-3-1-1	Test DRAM refresh
22h	1-3-1-3	Test 8742 Keyboard Controller
24h		Set ES segment register to 4 GB
26h		Enable A20 line
28h		Autosize DRAM
29h		Initialize POST Memory Manager
2Ah		Clear 215 KB base RAM
2Ch	1-3-4-1	RAM failure on address line xxxx
2Eh	1-3-4-3	RAM failure on data bits xxxx of low byte of memory bus
2Fh		Enable cache before system BIOS shadow
30h	1-4-1-1	RAM failure on data bits xxxx of high byte of memory bus
32h		Test CPU bus-clock frequency
33h		Initialize Phoenix Dispatch Manager
36h		Warm start shut down
38h		Shadow system BIOS ROM
3Ah		Autosize cache
3Ch		Advanced configuration of chipset registers
3Dh		Load alternate registers with CMOS values
42h		Initialize interrupt vectors
45h		POST device initialization
46h	2-1-2-3	Check ROM copyright notice

Code	Beeps	POST Routine Description
E0h		Initialize the chipset
E1h		Initialize the bridge
E2h		Initialize the CPU
E3h		Initialize the system timer
E4h		Initialize system I/O
E5h		Check force recovery boot
E6h		Checksum BIOS ROM
E7h		Go to BIOS
E8h		Set Huge Segment
E9h		Initialize Multi Processor
EAh		Initialize OEM special code
EBh		Initialize PIC and DMA
ECh		Initialize Memory type
EDh		Initialize Memory size
EEh		Shadow Boot Block
EFh		System memory test
F0h		Initialize interrupt vectors
F1h		Initialize Run Time Clock
F2h		Initialize video
F3h		Initialize System Management Mode
F4h	1	Output one beep before boot
F5h		Boot to Mini DOS
F6h		Clear Huge Segment
F7h		Boot to Full DOS

Chapter 4 71

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

Symptom / Error	Action in Sequence
LCD backlight doesn't work	First, plug a monitor to CRT port. Next, enter BIOS utility to running "Load Default Settings" then reboot the system.
	Reconnect the LCD connectors.
	Keyboard (if the brightness function key doesn't work).
	LCD cable
	LCD inverter
	LCD
	Main board
LCD is too dark	Enter BIOS Utility to execute "Load Setup Default Settings", then
LCD brightness cannot be adjusted	reboot system.
	Reconnect the LCD connectors.
	Keyboard (if the brightness function key doesn't work).
	LCD cable
	LCD inverter
	LCD
	Main board
Unreadable LCD screen	Reconnect the LCD cable
Missing pels in characters	LCD cable
Abnormal screen	LCD
Wrong color displayed	Main board
LCD has extra horizontal or vertical lines displayed.	

Indicator-Related Symptoms

Symptom / Error	Action in Sequence
Indicator incorrectly remains off or on, but system runs correctly	Main board
HDD/CD-ROM active indicators cannot work	HDD/CD-ROM drive
	Device driver
	Main board

Power-Related Symptoms

Symptom / Error	Action in Sequence
Power shuts down during operation	Power source (battery pack and power adapter). See "Power System Check" on page 63.
	Battery pack
	AC adapter
	See if the thermal module is overheat (Heat sink or fan).
	Main board
The system cannot power-on.	Power source (battery pack and power adapter). See "Power System Check" on page 63.
	Battery pack
	Power adapter
	CPU
	Main board
The system cannot power-off.	In Windows XP operating system, hold and press the power switch for more than 4 seconds. If the system can power off, then the main board is OK. Verify OS in the HDD.
	Main board

Power-Related Symptoms

Symptom / Error	Action in Sequence	
Battery can't be charged or discharged	See "Check the Battery Pack" on page 64.	
	Battery pack	
	Main board	
System hang during POST	ODD/HDD/FDD/RAM module	
	Main board	

PCMCIA-Related Symptoms

Symptom / Error	Action in Sequence	
System cannot detect the PC Card (PCMCIA)	PCMCIA slot assembly	
	Main board	
PCMCIA slot pin is damaged.	PCMCIA slot assembly	
PC Card cannot be inserted or ejected	Check if the PCMCIA slot is blocked	
	Main board	

Memory-Related Symptoms

Symptom / Error	Action in Sequence
Memory count (size) appears different from actual size.	Enter BIOS Setup Utility to execute "Load Default Settings" then reboot system.
	RAM module
	Main board
	Check BIOS revision
System can power on, but you hear two long	Reinsert DIMM
beeps: "B, B" and the LCD is blank.	DIMM
	Main board

Speaker-Related Symptoms

Symptom / Error	Action in Sequence
In Windows, multimedia programs, no sound	OS volume control
comes from the computer.	Audio driver
	Speaker
	Main board
Internal speakers make noise or emit no sound.	Speaker
	Main board
Microphone cannot work	Audio driver
	Volume control in Windows XP
	Main board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system will not enter hibernation mode	Power option in Windows XP
	Hard disk drive
	Main board
The system doesn't enter standby mode after	Driver of Power Option Properties
closing the lid of the portable computer.	Lid close switch in upper case
	Main board

Chapter 4 73

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system doesn't resume from hibernation/	Connect AC adapter then check if the system resumes from
standby mode.	Standby/Hibernation mode.
	Check if the battery is low.
	Hard disk drive
	Main board
The system doesn't resume from standby mode	LCD cover switch
after opening the lid of the portable computer.	Main board
Battery fuel gauge in Windows doesn't go higher	Refresh battery (continue use battery until power off, then charge
than 90%.	battery).
	Battery pack
	Main board
System hangs intermittently.	Reconnect hard disk/CD-ROM drives.
	Main board

Peripheral-Related Symptoms

Symptom / Error	Action in Sequence
System configuration does not match the	Enter BIOS Setup Utility to execute "Load Setup defaults", then
installed devices.	reboot system.
	Reconnect hard disk/CD-ROM drives/FDD or other peripherals.
	Main board
External display does not work correctly.	Press Fn+F5, LCD/CRT/Both display switching
	Keyboard
	Main board
USB does not work correctly	Main board
Print problems.	Enter BIOS Setup Utility to execute "Load Default Settings" then
	reboot the system.
	Run printer self-test.
	Printer driver
	Printer cable
	Printer
	Main board
Parallel port device problems	Enter BIOS Setup Utility to execute "Load Default Settings" then
	reboot the system.
	Device driver
	Device cable
	Device
	Main board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable.
	Keyboard
	Main board
Touchpad does not work.	Reconnect touchpad cable.
	Touchpad board
	Main board

Modem/LAN-Related Symptoms

Symptom / Error	Action in Sequence
Internal modem does not work correctly.	Phone cable Driver Reconnect the Internal modem cable to the main board tightly. Main board
Internal LAN does not work correctly	Lan cable Driver Main board

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 77.

Chapter 4 75

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See "Power System Check" on page 63):

- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:

Non-Acer devices
Printer, mouse, and other external devices
Battery pack
Hard disk drive
DIMM
PC Cards

- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:

System boardLCD assembly

Clear BIOS Password

If you need to clear BIOS password, please have G3 a short-circuit.

Chapter 5 81

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate 6000 and TravelMate 8000 series products. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

NOTE: Exploded diagram is not ready as service guide released. We will update the service guide to CSD website, please download the exploded diagram from the website if you need the file.

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows[®] XP Home environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the TravelMate 6000/TravelMate 8000 series Compatibility Test Report released by the Acer Mobile System Testing Department.

Microsoft® Windows® XP Pro Environment Test

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

	-
	Service guides for all models
	User's manuals
	Training materials
	Bios updates
	Software utilities
	Spare parts lists
	TABs (Technical Announcement Bulletin)
For these technical n	ourposes, we have included an Acrobat File to facilitate the problem-free downloading of our naterial.
Also conta	ained on this website are:
	Detailed information on Acer's International Traveler's Warranty (ITW)
	Returned material authorization procedures
	An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.
We are alv	vays looking for ways to optimize and improve our services, so if you have any suggestions or

comments, please do not hesitate to communicate these to us.
