

# Notebook PC Service Manual

## Model : 340S8

### Chapter 1 General System Description

#### 1.1 System features

##### 1.1.1 General features

- a. Support cost efficient CPU,
  - Celeron-128K Socket 370 Type FCPGA 500~700 MHz
  - Pentium III Socket 370 Type FCPGA 500~1.0GHz
- b. Superior portability with all in one design
- c. Support high quality audio include 2 internal high power speaker
- d. Fully Support ACPI 1.0, meet PC98/PC99 requirement
- e. Built-in 56K modem for Data/Fax/Voice modem or Internet (optional)
- f. Support high performance hardware 2D/3D graphic engine

- g. Support high capacity memory up to 256 MB
- h. Support one most flexibility of 32-bit Cardbus slot and PCMCIA card

### 1.1.2 Hardware specification

#### A. CPU:

##### **Celeron-128K 500MHz to 700MHz**

- System bus frequency at 66 MHz
- Dynamic execution micro-architecture
- MMX technology capability
- Optimized for 32 bits AP and OS
- Power Management capability
- Integrated 32KB instruction and data L1 cache
- Integrated 128 KB instruction and data L2 cache

##### **Pentium III 500MHz and 1.0 GHz**

- System bus frequency at 100MHz / 133MHz
- On-die 256KB L2 advanced transfer cache with ECC
- Dual independent bus architecture
- SIMD extensions for enhanced video, sound and 3D performance
- Dynamic execution micro architecture
- Power management capability
- Optimized for 32bits AP and OS
- Integrated 16KB instruction and 16KB data L1 cache
- 256bit cache data bus
- 8-way cache associatively
- ECC for system bus data

#### B. Core Logic

##### **SIS 630S**

- Integrated North Bridge, advanced hardware 2D/3D GUI engine, Super South Bridge and a 4X AGP internal
- Integrated Ultra AGP technology and advanced 64-bit graphic display interface and delivers AGP 4X performance and Fast Write transactions
- Provides powerful hardware decoding DVD accelerator to improve DVD playback performance.
- Provides standard interface between PC and a digital flat panel monitor.
- Adopts Share System Memory Architecture which the Super South Bridge in SIS 630S integrates all peripheral controllers /accelerators /interfaces
- Provides total communication solution including 10/100MB Fast Ethernet
- Offers AC'97 compliant interface that comprises digital audio engine with 3D-hardware accelerator, on-chip full duplex sample rate converter
- Provides interface to Low Pin Count (LPC) operating at 33MHz clocks which is the same as the PCI clock on the Host.
- Built-in fast PCI-IDE controller supports the ATA PIO/DMA and ultraDMA33/66/100 functions that supports the data transfer rate up to 100 MB/s

**C. PCMCIA Controller**

**O2 Micro OZ6812**

- ACPI-PCI bus power management interface specification Rev.1.0 compliant
- Compliant with PCI specification V2.1S, 1995 PC Card Standard and JEIDA 4.1
- Supports PCMCIA ATA specification
- Supports 5V/3.3V PC Cards and 3.3V Cardbus Cards
- Supports single PC card or Cardbus slot with hot insertion and removal
- Supports multiple FIFOs for PCI/CB data transfer
- Supports Direct memory access for PC/PCI and PC/Way on PC Card socket
- Win98IRQ and PC-97/98 compliant
- Integrated PC98 Subsystem Vendor ID support with auto lock bit

**D. Embedded Controller / Keyboard Controller**

**NS PC87570**

- Hot key for brightness, volume control
- ACPI controller
- SMB bus for smart battery
- Support Win-95 defined 3 new keys and down load-able key-matrix

**E. Super I/O Controller**

**NS PC87393**

- LPC System Interface with synchronous cycles, up to 33 MHz bus clock
- PC99 and ACPI Compliant
- Floppy Disk Controller (FDC)
- Support SPP, EPP and ECP Parallel port
- Software compatible with the 16550A and the 16450 serial port
- HP-IR, ASK-IR, Fast-IR support

**F. Clock Generator**

**Realtek W83194R-63S**

- Multiple CPU clocks for SDRAM architecture
- Provide power down mode in slowing down CPU clock
- Spectrum modulation reduce EMI
- Provide programmable clocks
- 166MHz Clock Support

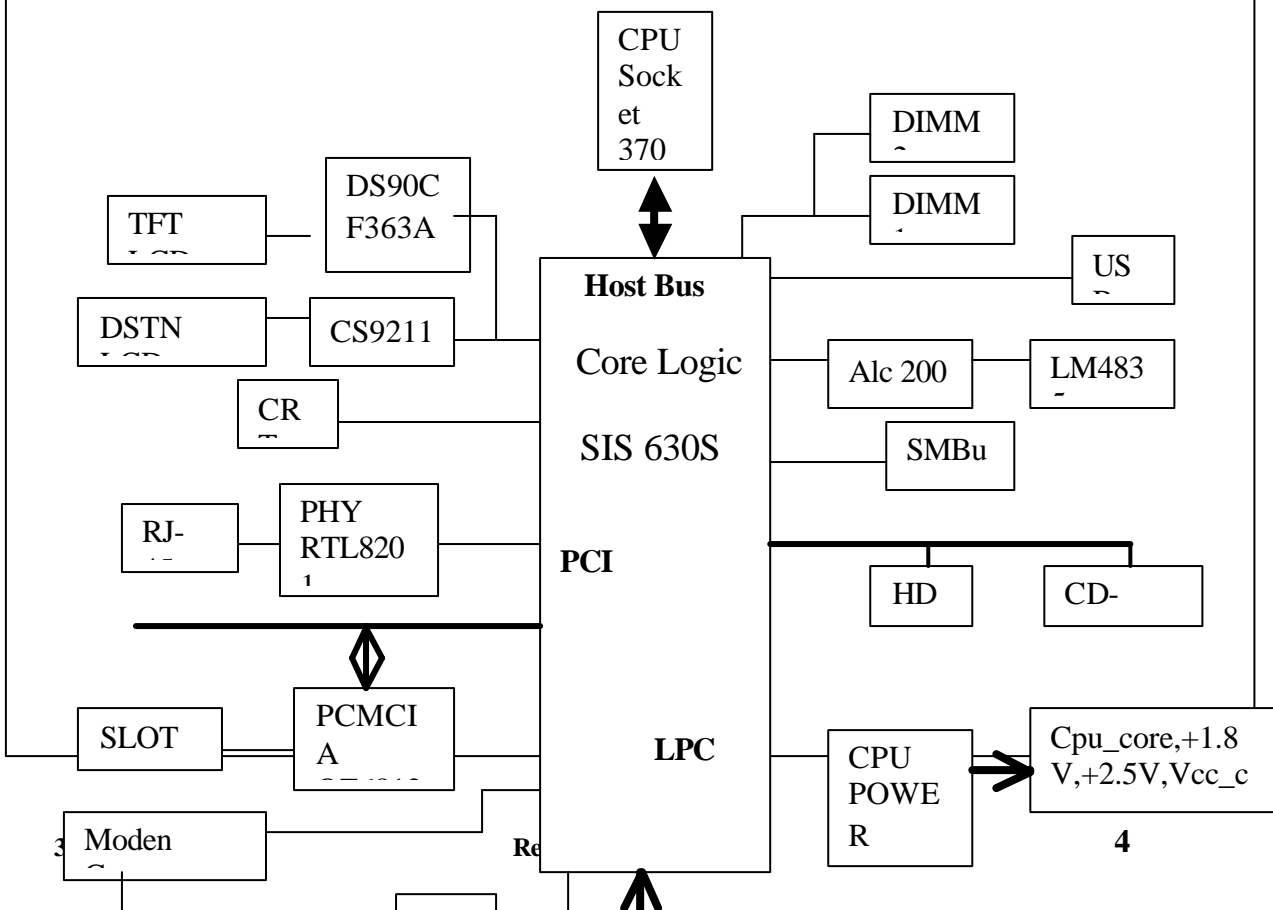

**1.2 System Specification**

**1.2.1 System Board**

The major components of the computer include the system board, XGA color LCD display, FDD module, CD-ROM module (24X rotational speed max) / DVD module, keyboard, built-in glide pad with 2 click buttons, Lithium-ION battery pack, and AC adapter.

The system board incorporates CPU module, system memory, system and VGA BIOS, audio controller, CPU/ PCI bus controller, PCI/ ISA bus controller. The

System Block Diagram shows how these components are integrated as shown in the next page.

### 1.2.2 LCD Display

14.1" TFT

13.3" TFT

12.1" TFT

### 1.2.3 Power Plans

#### Power Source Descriptions

+5V : 5V power source

+3V : 3.3V power source

+12V : 12V power source

CPU\_Core : CPU Core power source.

For Celeron, the voltage is 2.0V

For Pentium III, it is 1.7V

+2.5V : 2.5V power source

+1.8V : 1.8V power source for SIS630 & CPU AGTL + termination  
power source

KBVCCA : KBC AD/DA 3.3V reference voltage

RTCVDL : Real time clock power source

+5V\_AUX : LAN 5V always power source

+3V\_AUX : LAN 3.3V always power source & KBC 3.3V power  
Source

+3V\_RX\_TR : LAN 3.3V analog power source

+3V\_TX\_TR : LAN 3.3V analog power source  
 LCDVCC : LCD display 3.3V power source  
 VIN : Inverter 8~20V power source  
 ADAP+ : 20V Power supply from AC adapter  
 AMPVDD : 5V analog power for audio

**1.2.4 Power Source Status**

	5V	3.3V	12V	CPU _core	VCC_ CMOS	2.5V	1.5V	1.8V
<b>FULL-ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>
<b>SLEEP</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>	<b>ON</b>
<b>STD</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>
<b>SOFT-OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>	<b>OFF</b>

**1.2.5 DC/DC Board**

The DC/DC (system power) can support +3.3V, +5V, +12V for the main system.  
 The DC/DC (CPU power) can support +1.3V~2.05V, +1.8V, +2.5V for the CPU.

**1.2.6 AC-DC Adapter**

Input Voltage : 100 ~ 240 ±10% AC  
 Input Frequency : 50 ~ 60 Hz ±3Hz  
 Input AC current : 1.5A max @ 90 VAC  
 Efficiency : Better than 80%  
 Inrush Current : 50A @ 115VAC, 100A @ 230VAC  
 Holdup Time : 5mS (minimum)  
 Output Voltage/Current : 20V / 3.0A  
 Output Load Regulation : ±5%

**1.2.7 Inverter**

Input Voltage : 8-22 VDC  
 Output Voltage : 620 Vrms @ 45~55KHz  
 Start Up Voltage : 1200 Vrms (min.)  
 Brightness Adjust Range (tube current) : 3mA rms – 5.5mA rms  
 Protection : Open circuit protect, current limit protect

**1.2.8 Battery Pack**

**A. Lithium – Ion Battery packs**

- Battery type : Li-Ion
- Battery cells : 8 cells
- Battery Spec : 3.7V / 1800mAH

- Battery power : 47.36 watts (total)
- Battery protection : over charge protect, over discharge protect, over temperature protect, short protect, over current protect

**B. Ni-MH battery packs**

- Battery type : Ni MH
- Battery cells : 10 cells
- Battery specs : 12V, 3800 mAh
- Battery power : 45.6 watts (total)
- Battery protection : over charge protect, over discharge protect, over temperature protect, short protect, over current protect

**1.2.9 Memory Module**

144 pins SO-DIMM, 3.3V, SDRAM

memory type = 1Mx16, 4Mx16, 16Mx16, 2Mx8, 8Mx8, 16Mx8

memory size = 16M, 32M, 64M, 128M,

memory clock = 66 MHz / 100MHz / 133MHz

**Memory Configuration Table**

DIMM 1	DIMM 2	Total
16M	0	16M
32M	0	32M
64M	0	64M
128M	0	128M
16M	16M	32M
16M	32M	48M
32M	32M	64M
16M	64M	80M
32M	64M	96M
64M	64M	128M
64M	128M	192M
128M	128M	256M

**1.2.10 Interrupt Request Channel**

Setting	Hardware using the setting
00	System timer
01	Standard 101/102-Key Microsoft Natural Keyboard
02	Programmable Interrupt Controller
03	IrDA V3.0 Fast Infrared Port
04	Communications Port (Com1)
06	Standard Floppy Disk Controller
07	ECP Printer Port (LPT1)

08	System CMOS/ Real Time Clock (RTC)
09	ACPI IRQ Holder for PCI IRQ Steering
09	SiS 900 PCI Fast Ethernet Adapter
10	ACPI IRQ Holder for PCI IRQ Steering
10	HAMR 5600 Voice Modem
10	O2Micro OZ6812 CardBus Controller
10	SIS 7018 Audio Driver
11	ACPI IRQ Holder for PCI IRQ Steering
11	SIS 7001 PCI to USB Open Host Controller
11	SIS 7001 PCI to USB Open Host Controller
11	SCI IRQ used by ACPI bus
12	Microsoft PS/2 Port Mouse
13	Numeric data processor
14	SIS 5513 Dual PCI IDE Controller
14	Primary IDE Controller (dual FIFO)
15	Intel 82371AB/EB PCI Bus Master IDE Controller
15	Secondary IDE Controller (dual FIFO)

**1.2.11 DMA Channel**

Setting	Hardware using the setting
01	IrDA V3.0 Fast Infrared Port
02	Standard Floppy Disk Controller
03	ECP Printer Port (LPT1)
04	Direct memory access controller

**1.2.12 System LED Indicator**

- 4 Num-lock (on/off)
- 4 Cap-lock (on/off)
- 4 Scroll-Lock (on/off)
- 4 FDD (on/off)
- 4 HDD (on/off)
- 4 CDROM (on/off)
- 4 Power (on/off)

When the system is powered on, the Power LED will be lighted on.  
 When 'Battery Low Warning' occurs, the Power LED will flash at a rate of 1 time every 16 second.

When 'Battery Very Low Warning' occurs, the Power LED will flash at a rate of 1 time every 4 seconds if there is no 'Suspend to Disk' partition in the hard disk.

- 4 Charge (flash/off): Will be flashing when the battery pack is being charged.

**1.2.13 Hot Key:**

<b>Key combination</b>	<b>Function</b>
Fn + F1 (SMI)	Standby Mode
Fn + F4 (SMI)	Toggle LCD / CRT display
Fn + F5 (SMI)	Volume increase
Fn + F6 (SMI)	Volume decrease
Fn + F7 (SMI)	Brightness up
Fn + F8 (SMI)	Brightness down
Fn + F9 (SMI)	Contrast up (for DSTN LCD)
Fn + F10 (SMI)	Contrast down(for DSTN LCD)

# MODEM

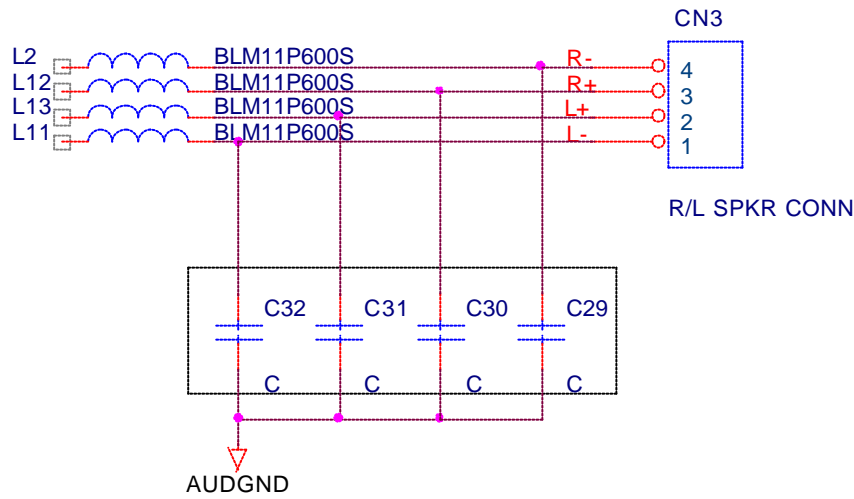

## 2.1.8 LAN - RJ45 Connector (CN16)

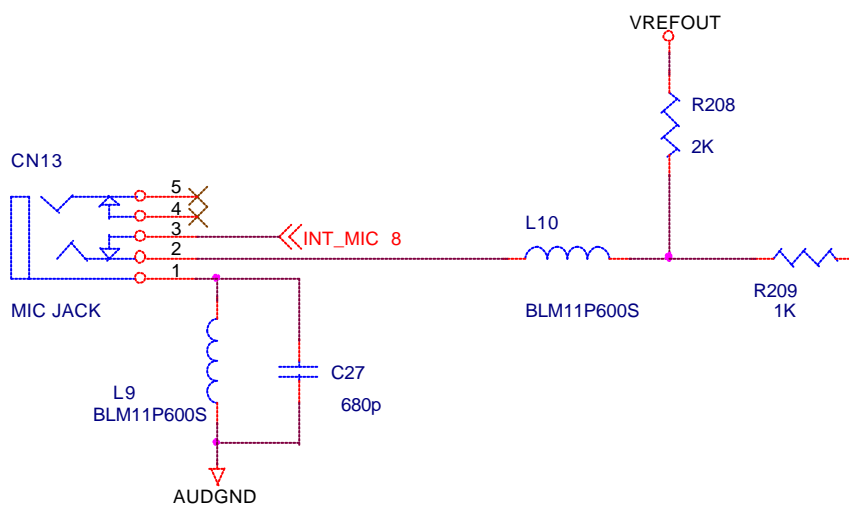

## 2.1.9 Speaker Jack (CN12)

### 2.1.10 R/L Speaker Connector (CN3)

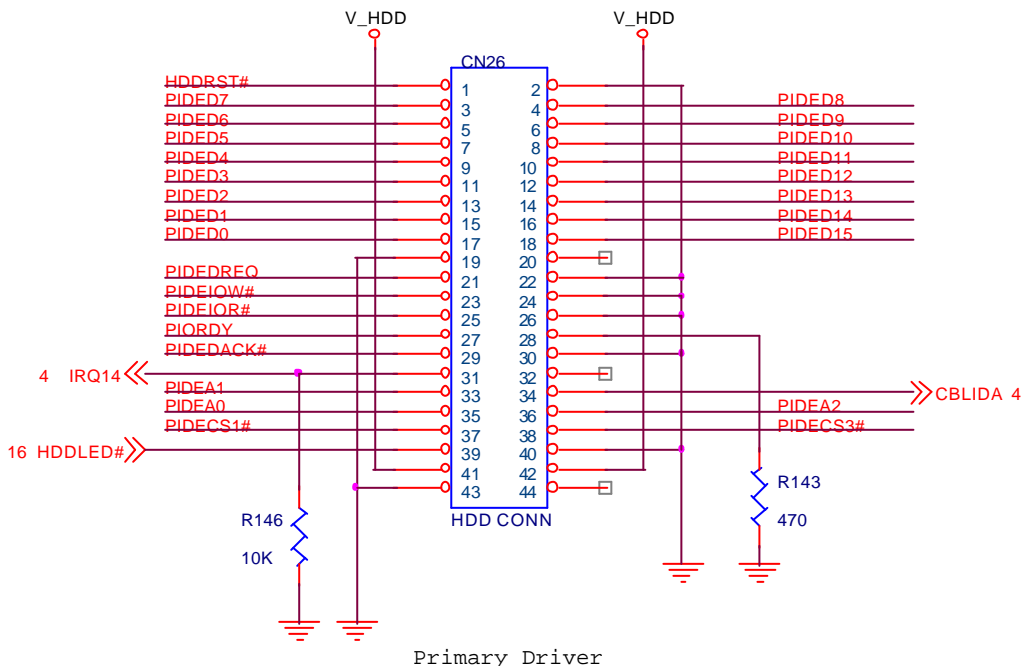

### 2.1.11 Microphone Jack (CN13)

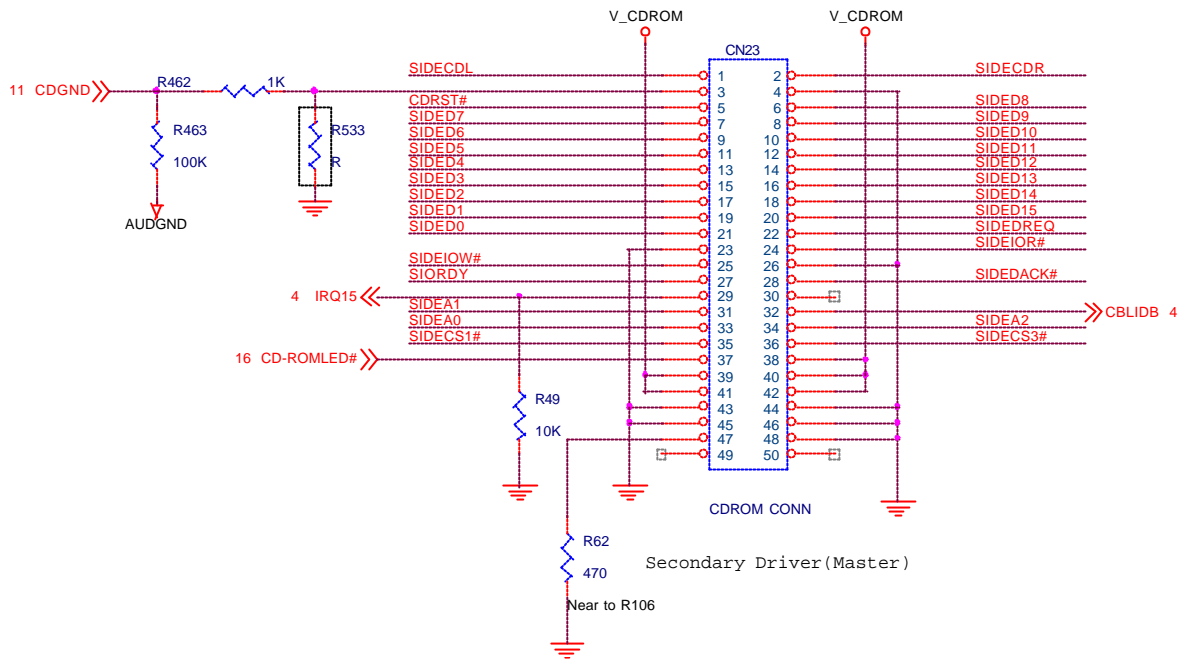

### 2.1.12 PCMCIA Connector (CN28)

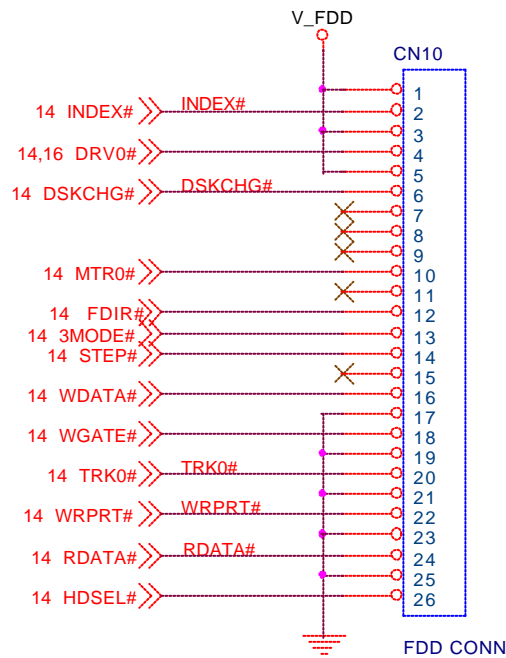

### 2.1.13 HDD Connector (CN26)

### 2.1.14 CDROM Connector (CN23)

### 2.1.15 FDD Connector (CN10)

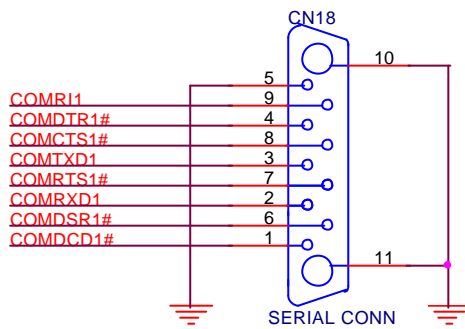

### 2.1.16 Parallel Connector (CN17)

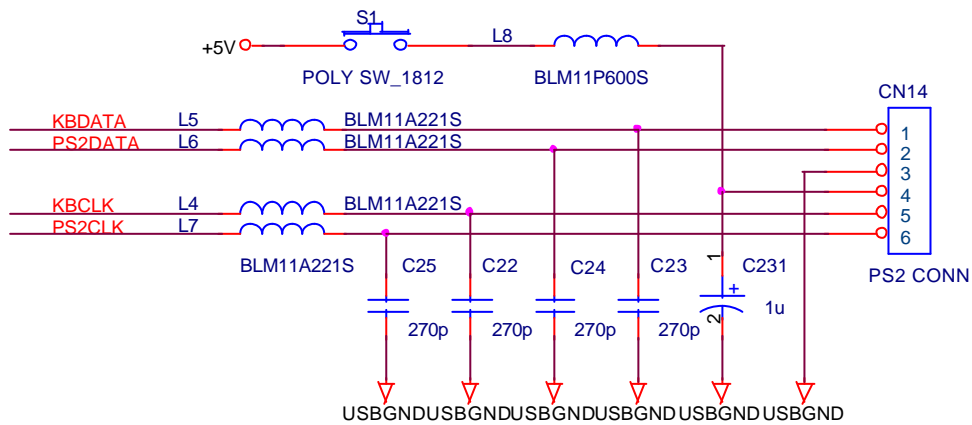

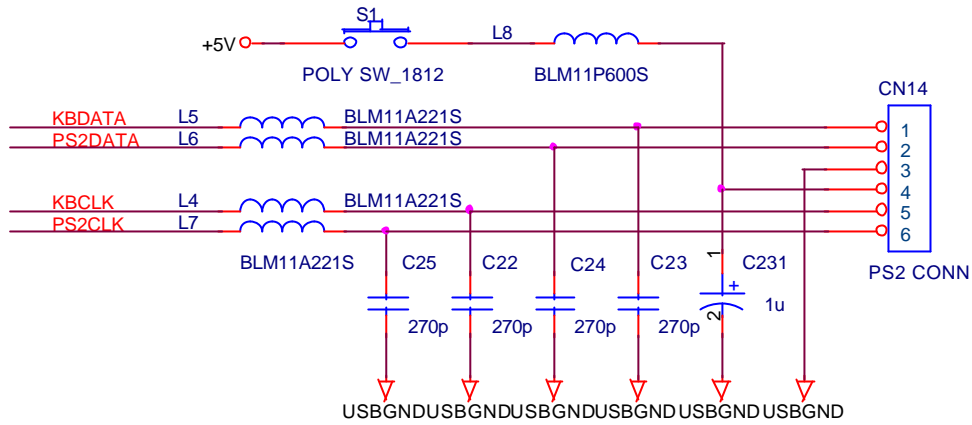

### 2.1.17 Serial Connector (CN18)

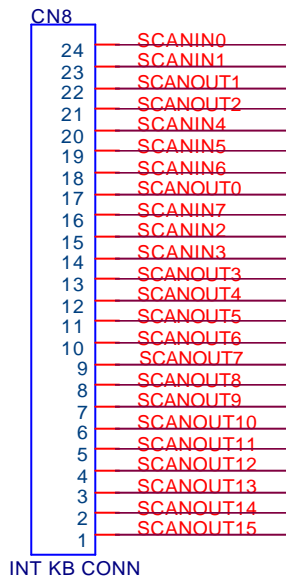

### 2.1.18 PS/2 Connector (CN14)

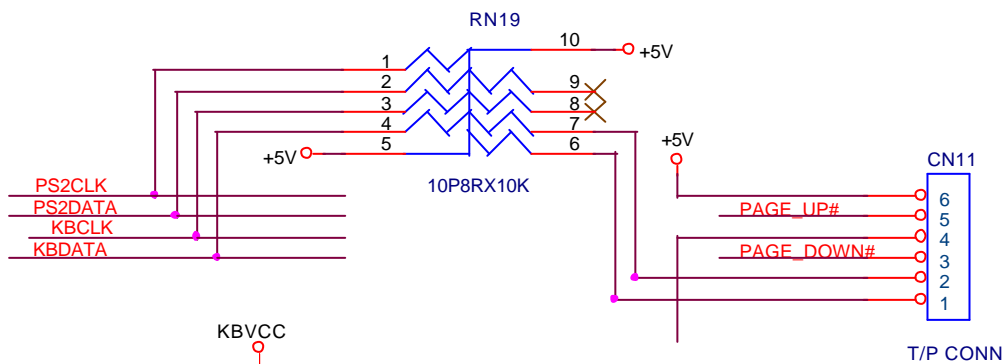

### 2.1.19 PS/2 Connector (CN14)

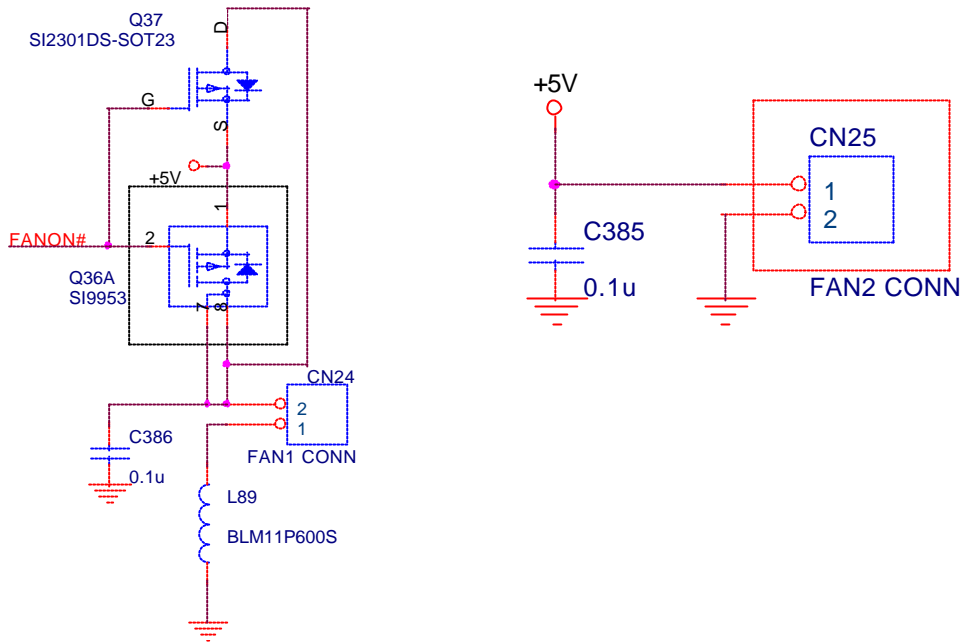

### 2.1.20 Internal KB Connector (CN8)

### 2.1.21 Touch Pad Connector (CN11)

### 2.1.22 Fan 1 (CN24) and Fan2 (CN25) Connector

## 2.2 Mechanical Buttons and Switch Definition

### 2.2.1 Power on/off button

1. If the system is in S0, S1 or S2 state, pressing the power button will transit the system to S4 (Suspend to Disk) or S5 (Soft-off) state depending on the “Power button function” setting in the BIOS Setup menu.
2. If the system is in S4 or S5 states, pressing the power button will awaken the system into S0 states.
3. If the power button is pressed for more than four seconds, a power button over-ride event is generated and the system will be put into S5 (Soft-off) state.

### 2.2.2 Cover (Lid) Switch

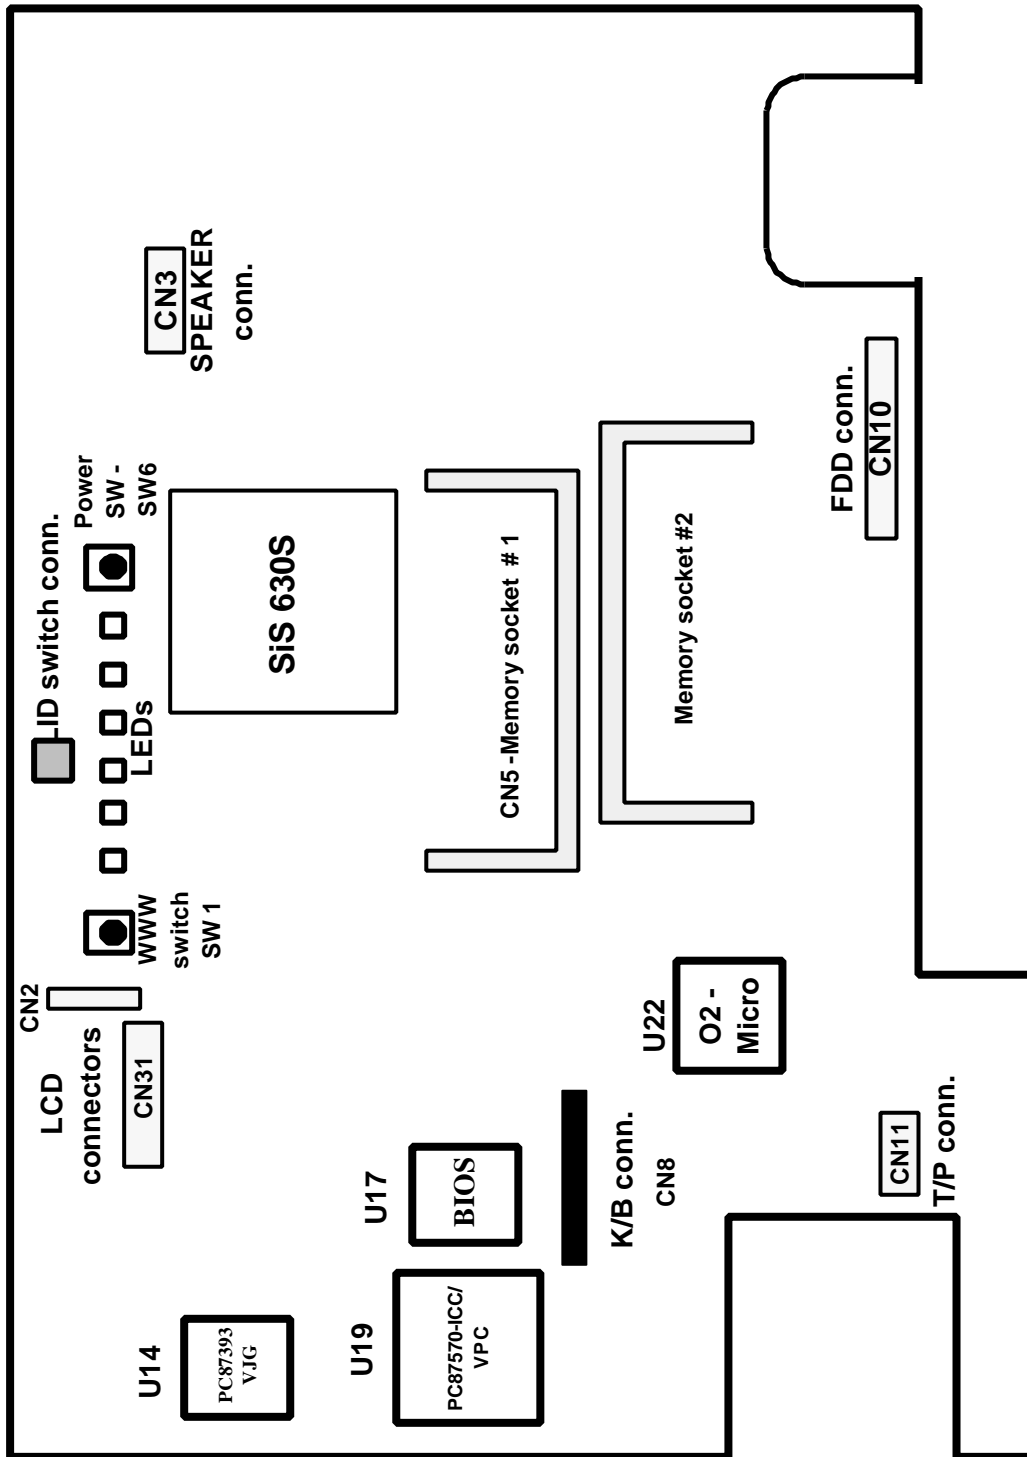

When LCD cover is closed, this Lid switch is triggered and an SMI/SCI is generated to put the system into ‘Suspend to RAM’ or ‘Suspend to Disk’ mode depending on the “Cover Switch” setting in the BIOS Setup menu.

### 2.2.3 Quick Start Button

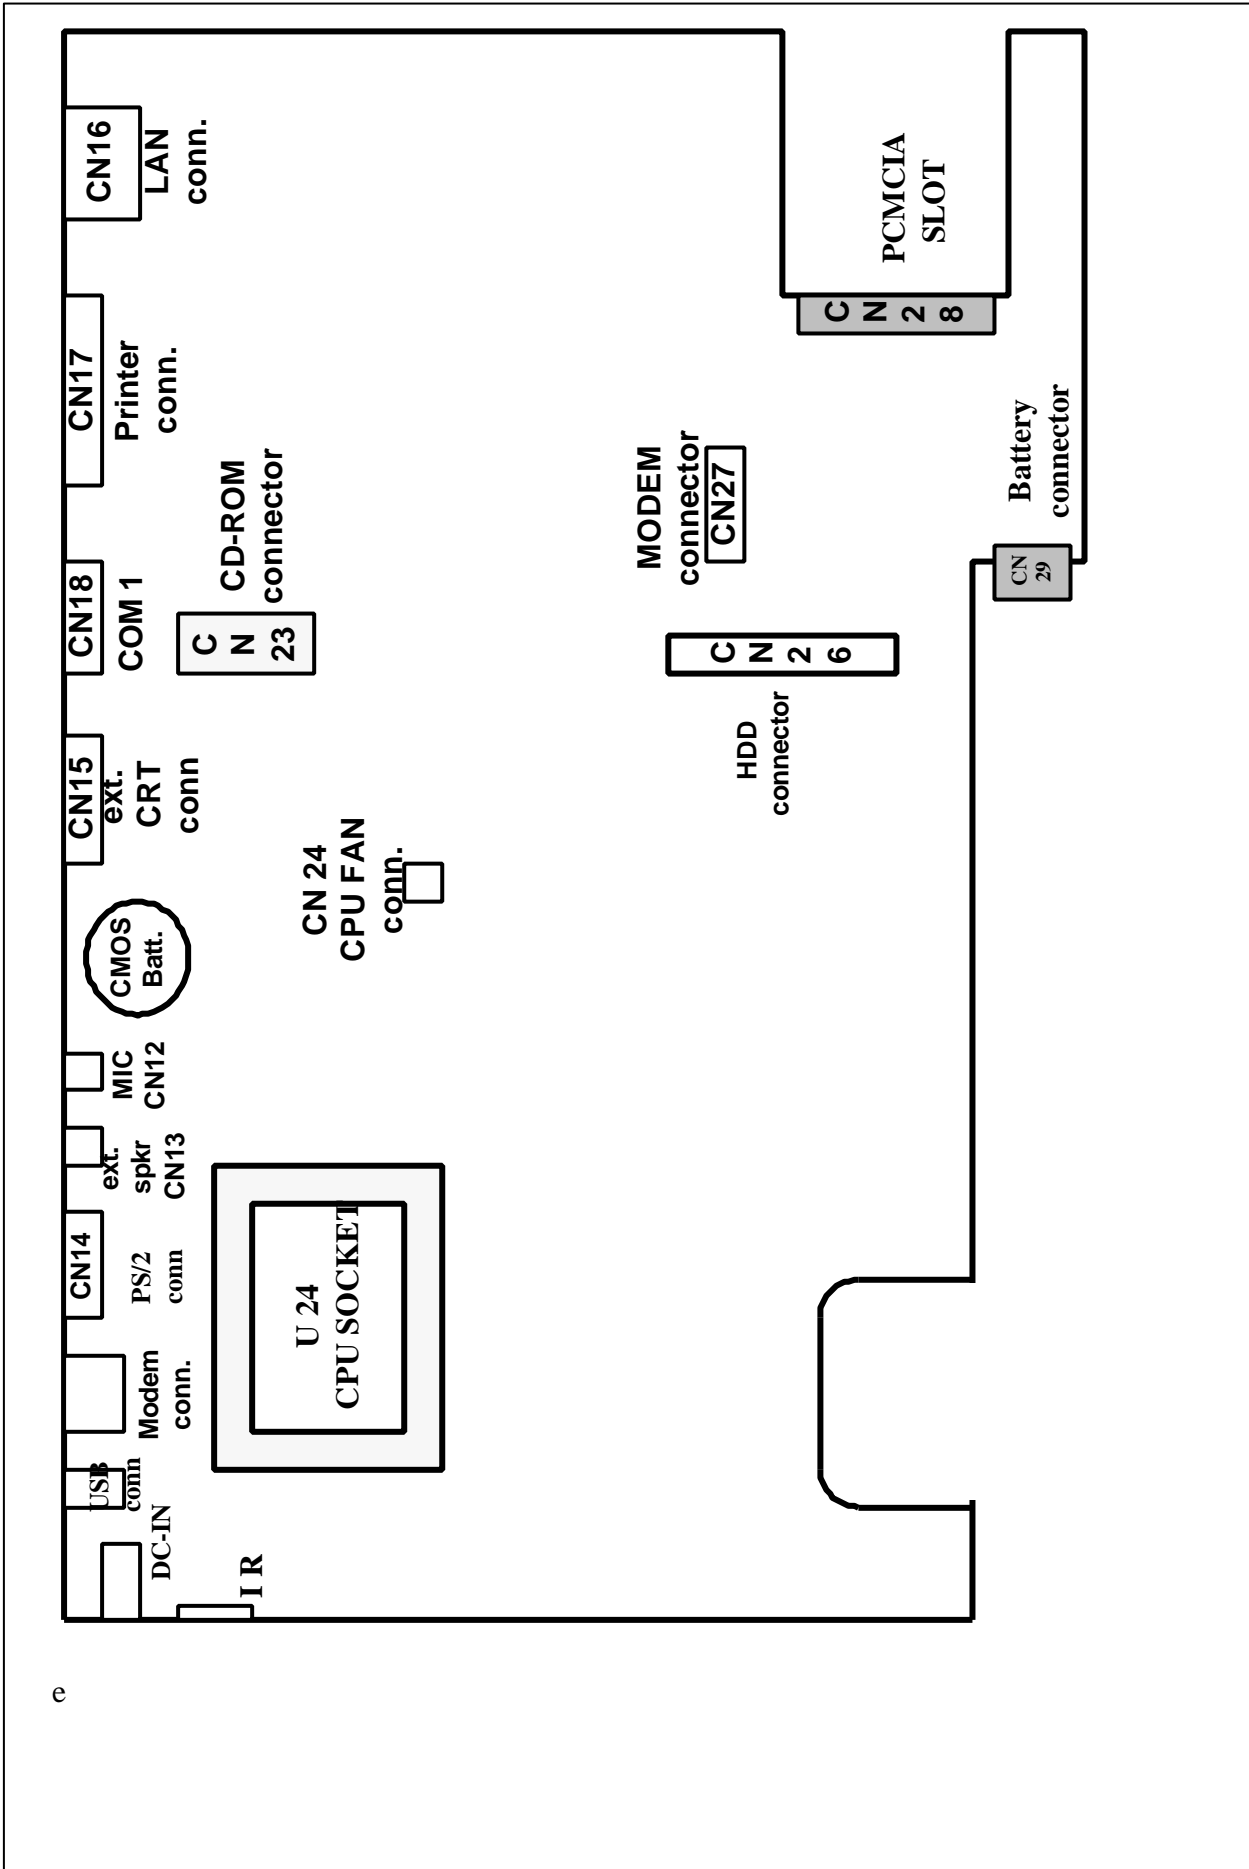

When this button has been pressed, the system will launch either Microsoft Internet Explorer, E-Support or E-mail/User Defines etc. 3 quick buttons demands.

**Chapter 4**  
**System Disassembly**

**System Disassembly Procedure**

1. Before doing the disassembly, you **MUST** first remove the battery from the battery compartment and no external power is supplied to the machine.
  
2. Unfasten the one (1) screw on the CPU cover.
  
3. Unfasten four (4) screws on the CPU fan + heat sink assembly. Please follow the sequence when unfastening.

When fastening, you must start on # 4 , 3 , 2 and 1 ( counter clockwise direction)

4. Disconnect the cable CPU fan + heat sink assembly from the mainboard.

5. Gently press down the lever arm of the CPU socket and lift it up until the lever arm is in stand position.

6. Make sure the CPU socket is in release position before you remove the CPU.

7. Unfasten one (1) screw on the HDD cover.

8. Unfasten two (2) screws on the HDD metal bracket.

9. Pull out the HDD assembly and disconnect the HDD cable from the mainboard.

10. Use a small flat screwdriver , insert to the K/B lock to release the three lock.

11. Gently lift the keyboard and disconnect the keyboard cable from the connector.

12. Remove the keyboard shielding or plate.

13. Unfasten two (2) screws on the ram cover and remove the RMA cover.

14. Use both thumbs, push in and remove the left and right hinge covers.

15. Close the display panel, press down the middle cover and then pull out to remove.

16. Unfasten one screws of the CD-ROM ( or DVD-ROM drive).

17. On the bottom case, push out the CD-ROM drive as shown in the photo.

18. Unfasten six (6) screws on the bottom case.

19. Grasp the top cabinet as shown in the photo and gently lift to release the snap lock. Do the same procedure on both side of the top cabinet.

20. After releasing the snap lock on both side and palm rest. Lift up to release and remove the top cabinet.

21. Close the display panel and unfasten four (4) screws on both sides of the display hinges.

22. Unfasten one (1) screw on the LCD cable and disconnect the two LCD cables from the mainboard connectors.

23. Unfasten two (2) screws on the hinge frame as shown in the photo.

24. Disconnect the FDD cable.

25. Disconnect the Touchpad cable.

26. Unfasten three screws on the top housing ( Magnesium alloy). To remove the mainboard together with the top housing, push in the

together with the top housing, push in the PCMCIA eject button and on the other hand, lift the mainboard assembly and separate it from the bottom case.

27. At the bottom side of the mainboard, unfasten two (2) screws on the modem card. And disconnect the modem card from the mainboard.

28. Unfasten the two (2) hexagonal screws of the modem card.

29. On the bottom side of the mainboard, unfasten four (4) screws on the mainboard shielding and peel off the aluminum foil near the I/O port as shown in the picture.

30. From the I/O port, unfasten six (6) hexagonal screws on the I/O ports.

31. Starting from the I/O port portion, flip over the mainboard shielding.

32. Lift the mainboard and disconnect the speaker cable and LID switch cable.

33. When replacing mainboard, make sure to have all the insulation and thermal pads

removed from the defective mainboard and transfer it to a good mainboard ( because sometimes, the good mainboard doesn't have all the tapes and thermal pad as indicated in the photo).

34. Unfasten one (1) screw on the FDD assembly.

Lift to remove the FDD assembly from the bottom case.

### Display Disassembly Procedure

1. Remove the four rubber stopper on the front display cover and unfasten four (4) screws underneath.

Grasp and remove the display front cover.

2. Unfasten two (2) screws on the D-A inverter card and disconnect the cables on both sides.

3. Unfasten four (4) screws on the LCD display and unfasten four (4) screws on both side of the hinges.

Remove the LCD from the display cover.

Make sure to remember the LCD cable arrangement to avoid problem when assembling the LCD display.

## ***Trouble Shooting***

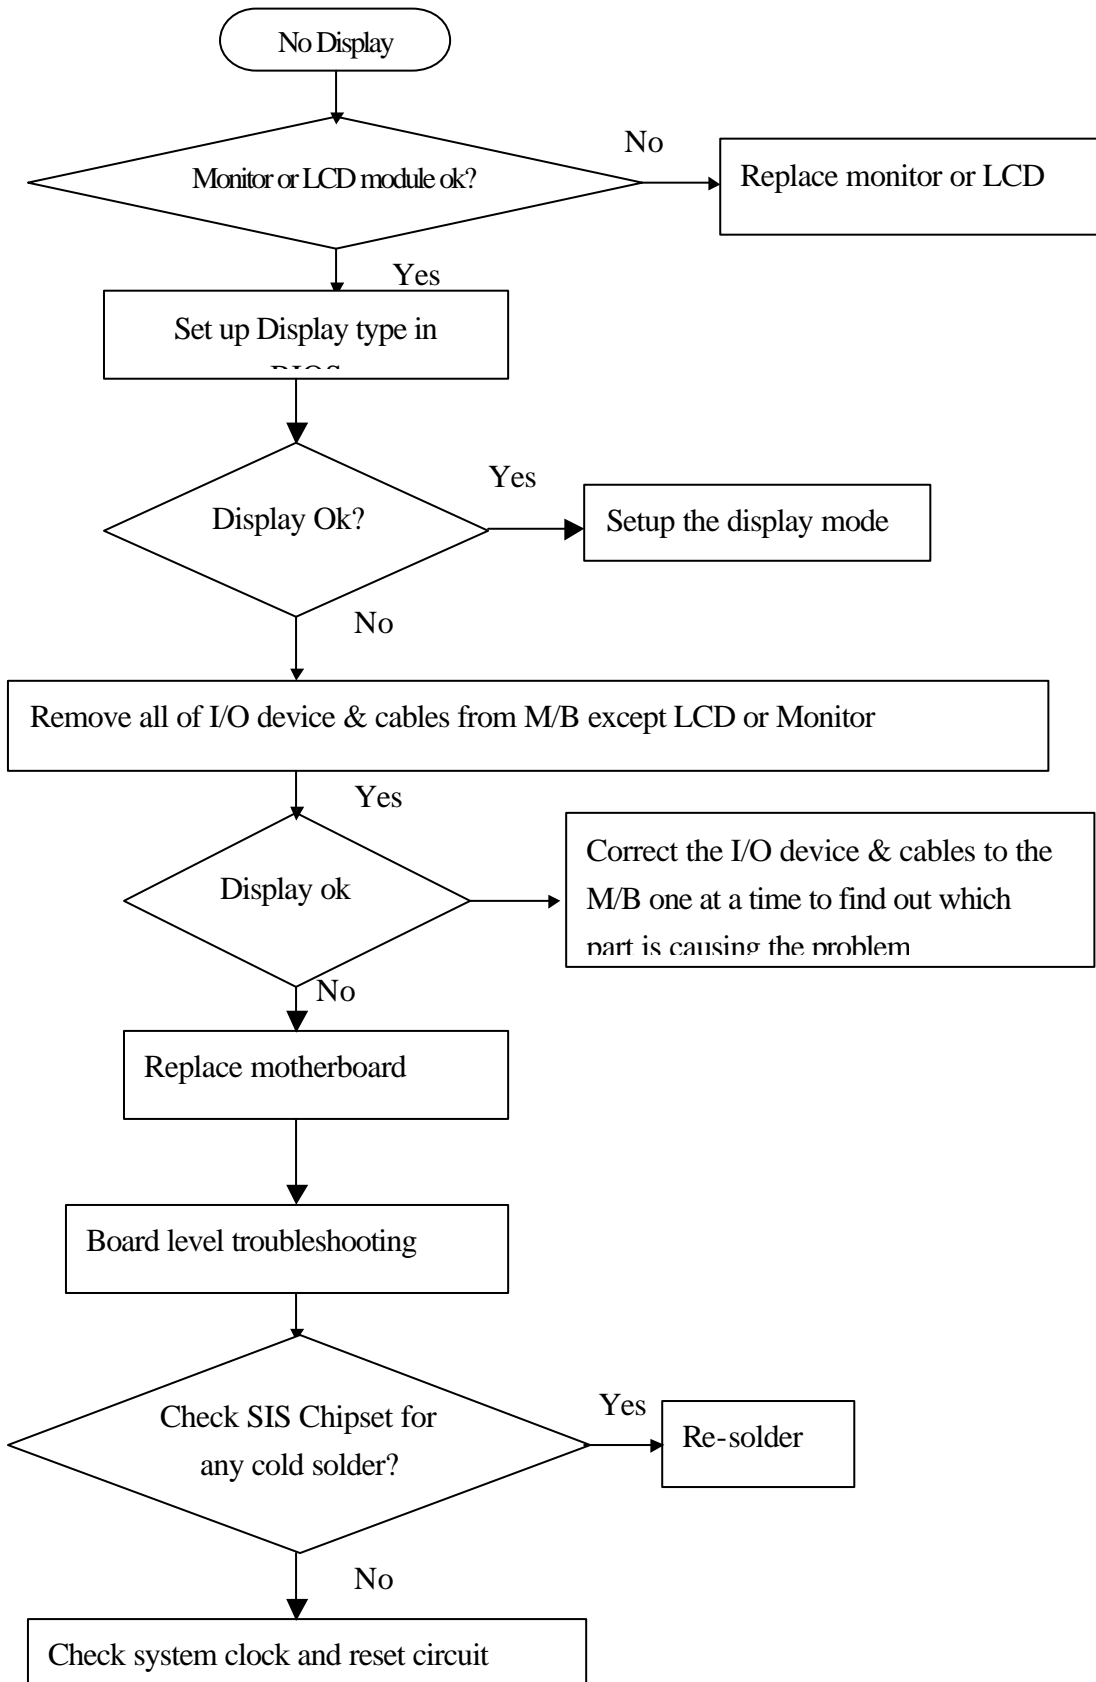

UNIWILL COMPUTER CORP.  
No. 24, Pei Yuan Rd., Chung Li Industrial Park  
Chung Li City, Taiwan, R.O.C.  
TEL: 886-3-461-6000  
FAX: 886-3-461-8000  
URL: <http://uniwill.com.tw/>

**Trouble Shooting List**

- 5.1 No display**
- 5.2 VGA controller failure**
- 5.3 LCD no display / Invalid picture**
- 5.4 External monitor has no display or color incorrect**
- 5.5 Memory test error**
- 5.6 Keyboard test error**
- 5.7 Touch pad test error**
- 5.8 Diskette drive test error**
- 5.9 Hard disk drive test error**
- 5.10 CMOS test error**
- 5.11 SIO port test error**
- 5.12 PIO port test error**
- 5.13 Audio failure**
- 5.14 No power symptom**
- 5.15 CDROM drive test error**
- 5.16 Stopping in LCD screen while booting**
- 5.17 PCMCIA Card Bus failure**
- 5.18 IR Port cannot transfer data**
- 5.19 Modem Failure**

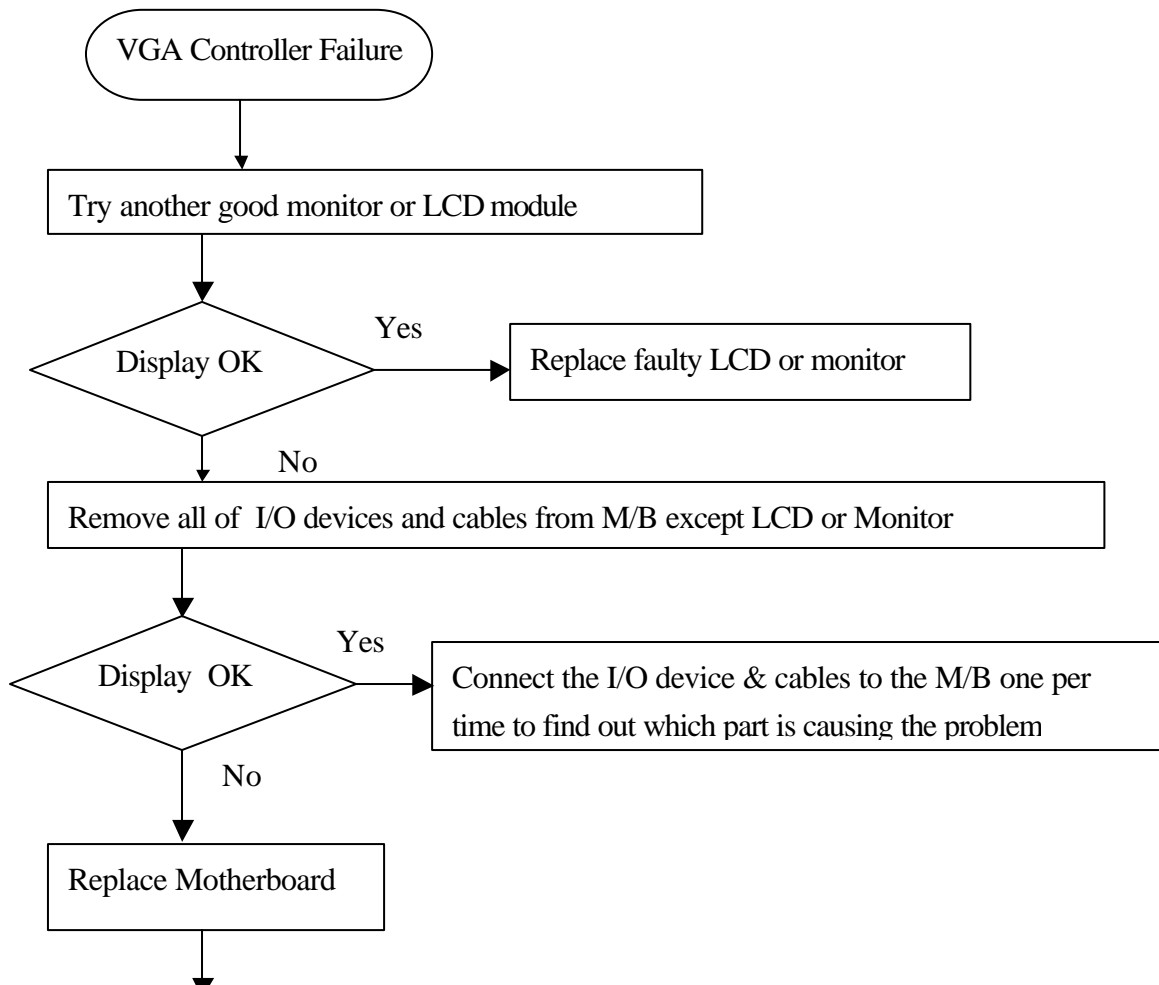

**5.1 No display (system failure)**

Symptom: There is no display on both LCD and Monitor after power on although the LCD and Monitor are known-good.

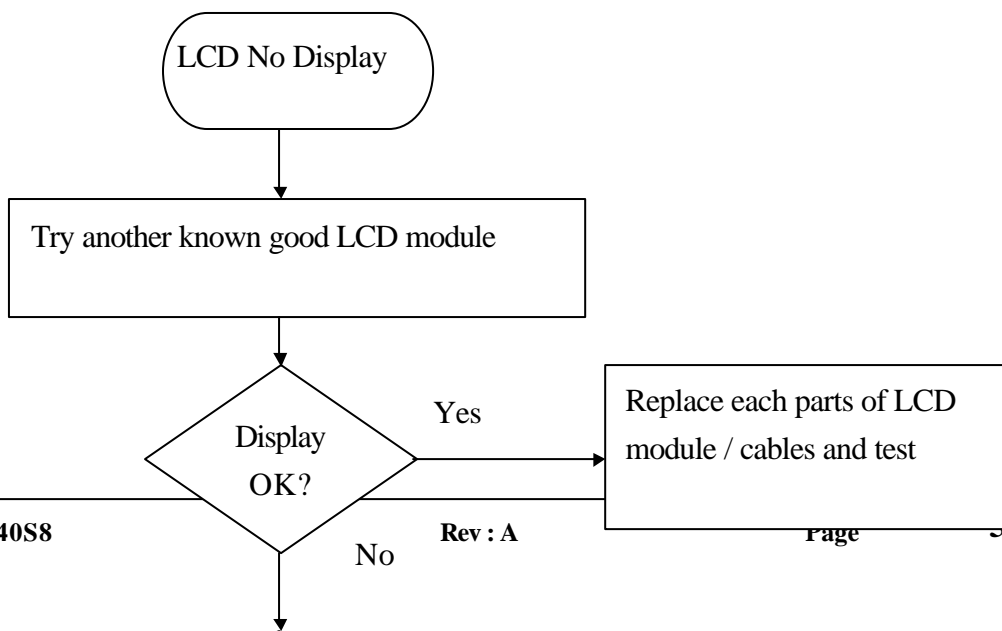

**5.2 VGA controller failure**

Symptom: There is no display on both LCD and Monitor although Power-On-Self-Test is passed

**5.3 LCD no display or Invalid Picture**

Symptom: The LCD shows nothing or abnormal picture, but it is ok for external monitor.

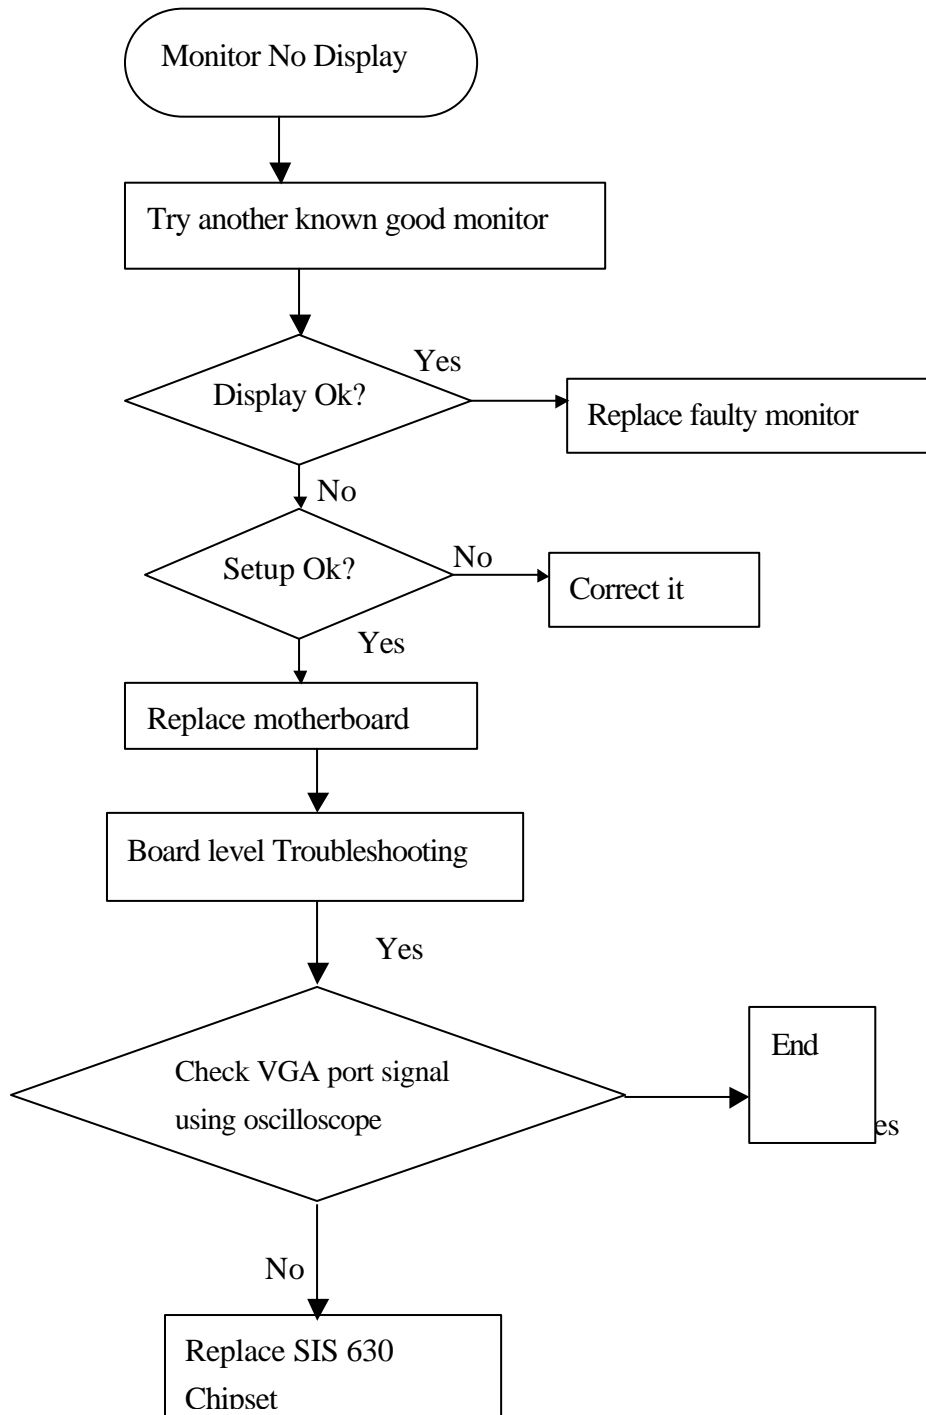

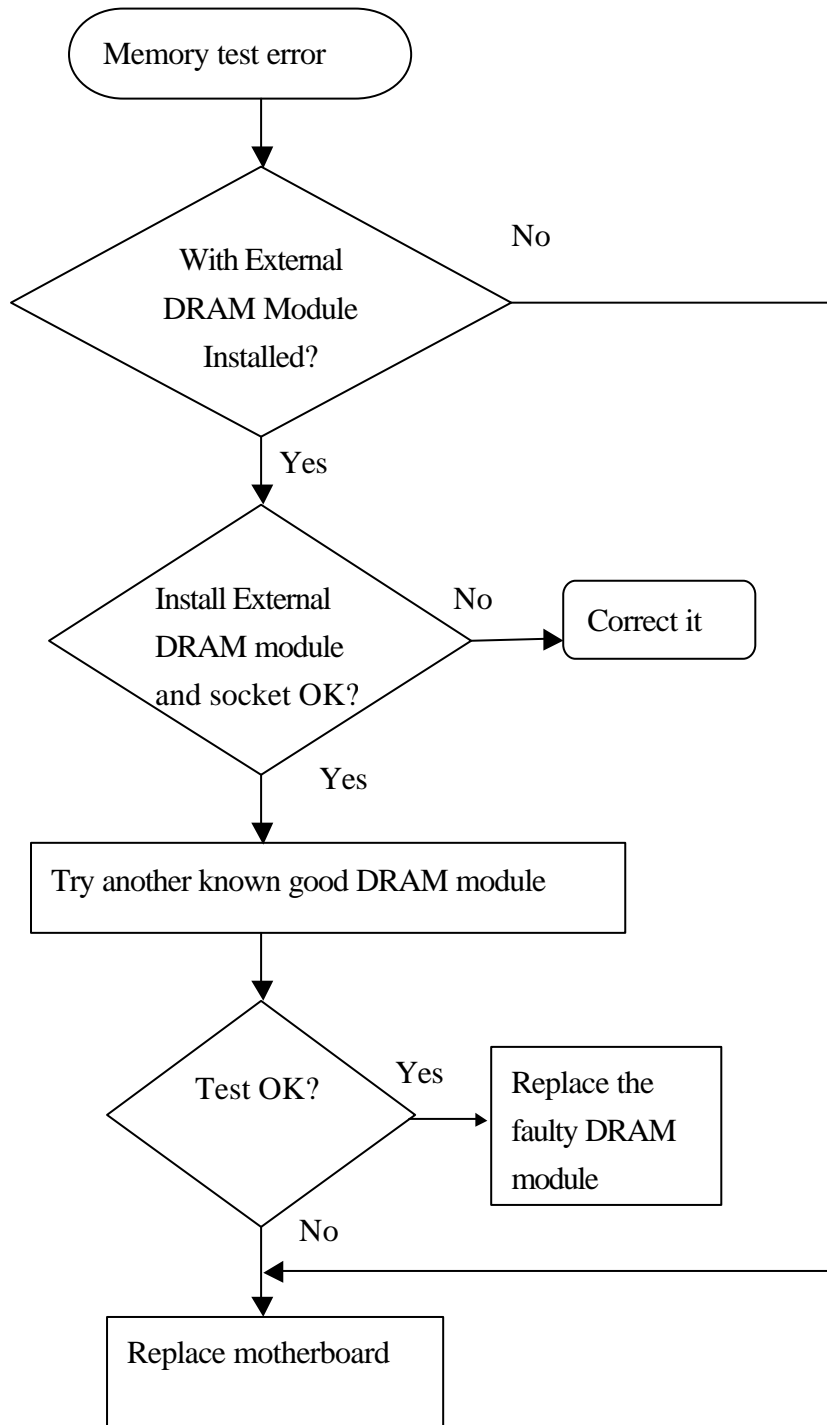

**5.4 External monitor has no display or color abnormal**

Symptom: The CRT monitor shows nothing or abnormal color, but it is ok for LCD

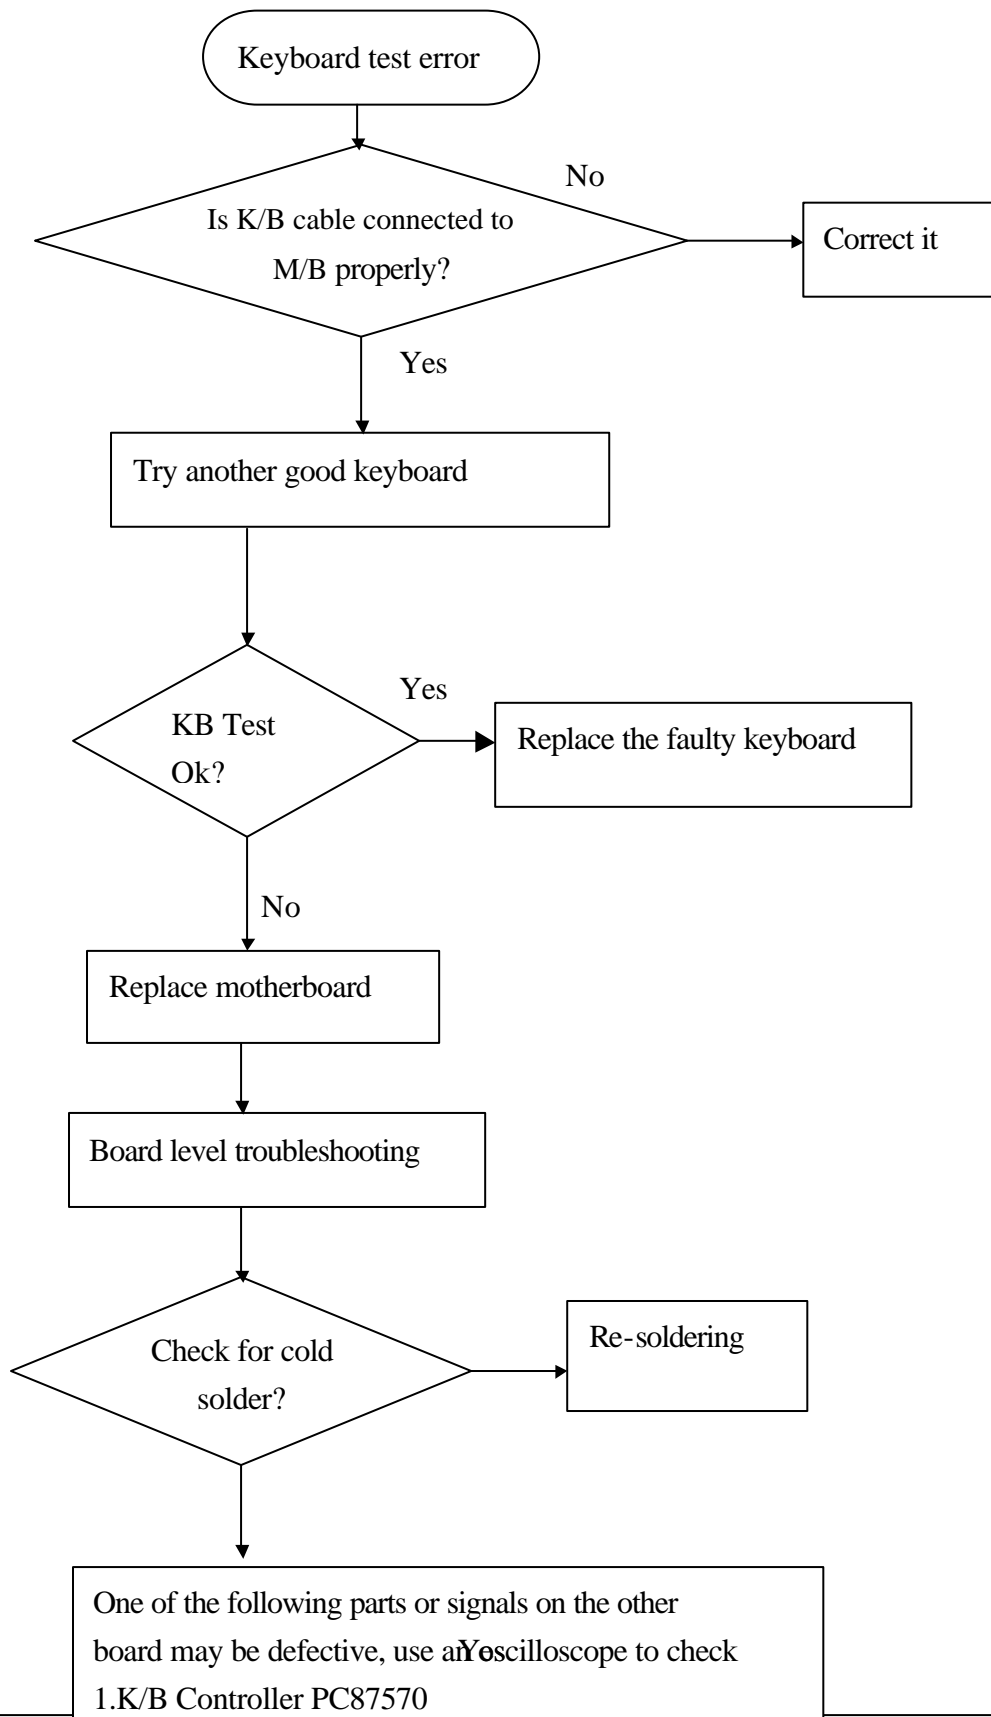

5.5 Memory test error

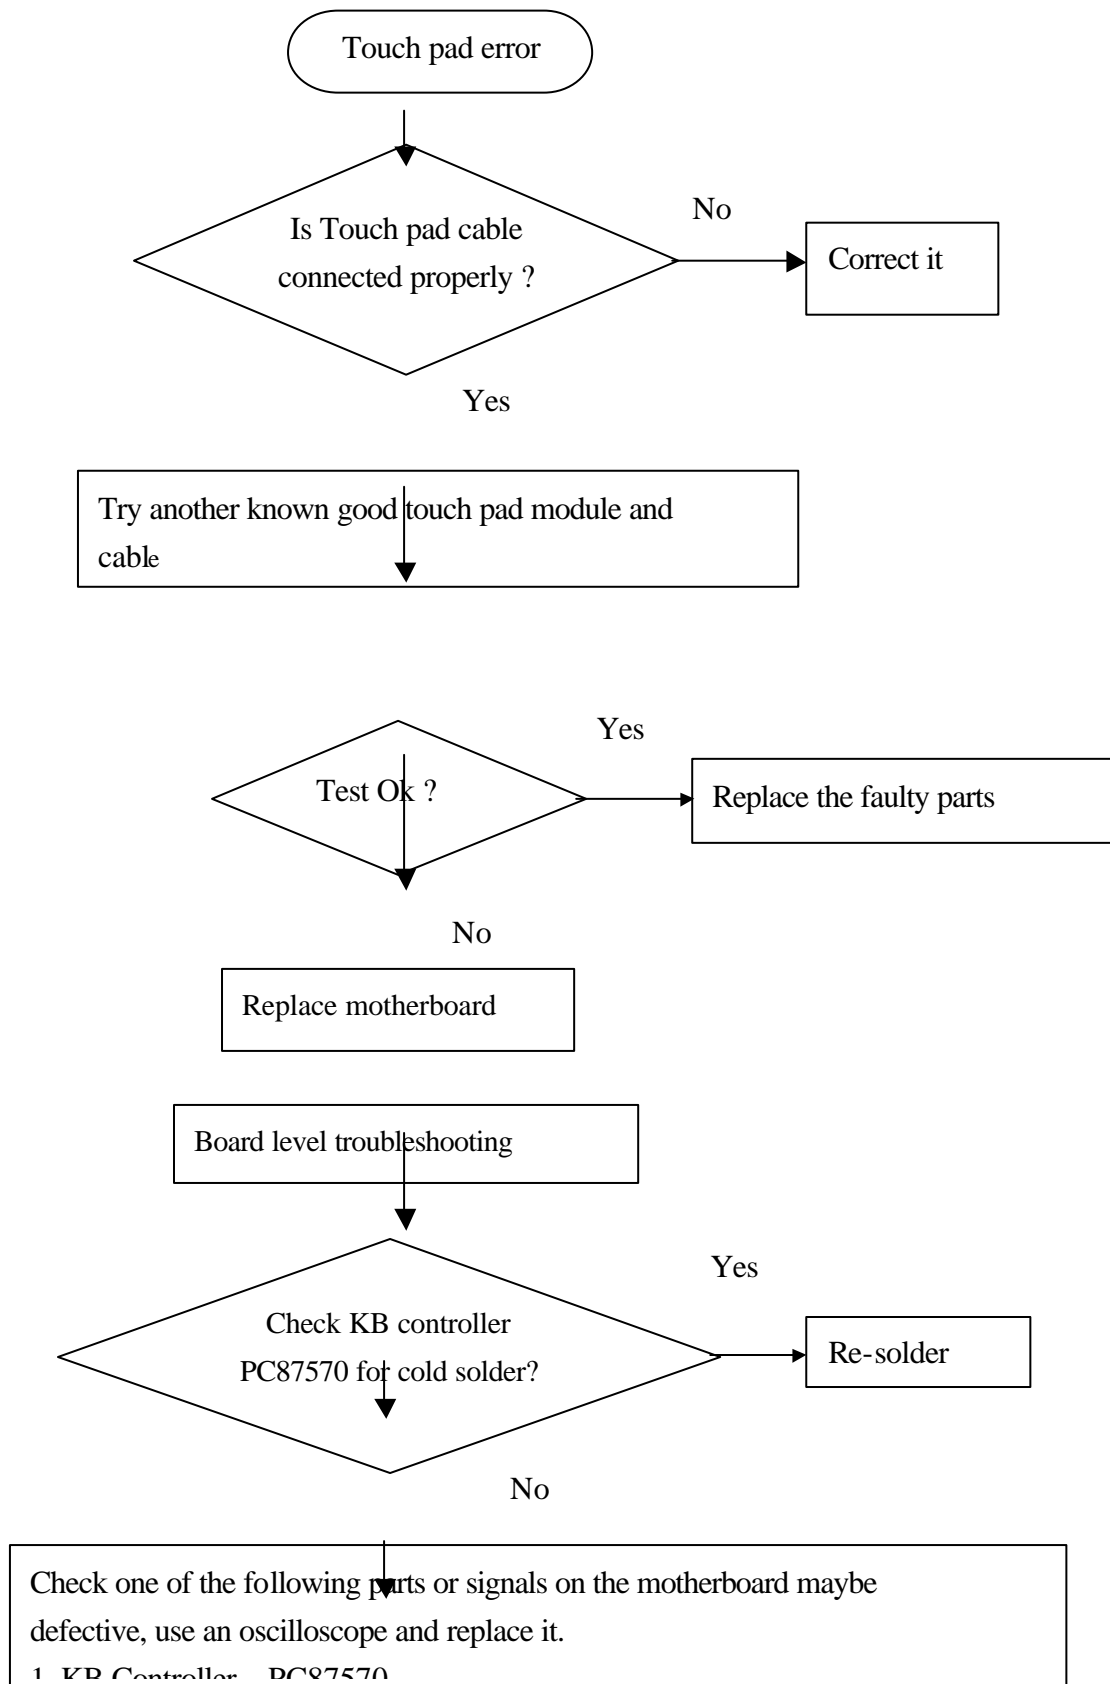

**5.6 Keyboard test error (including external K/B & PS/2 mouse)**

Symptom: error message of keyboard failure is shown or any key doesn't work

5.7 Touch Pad test error

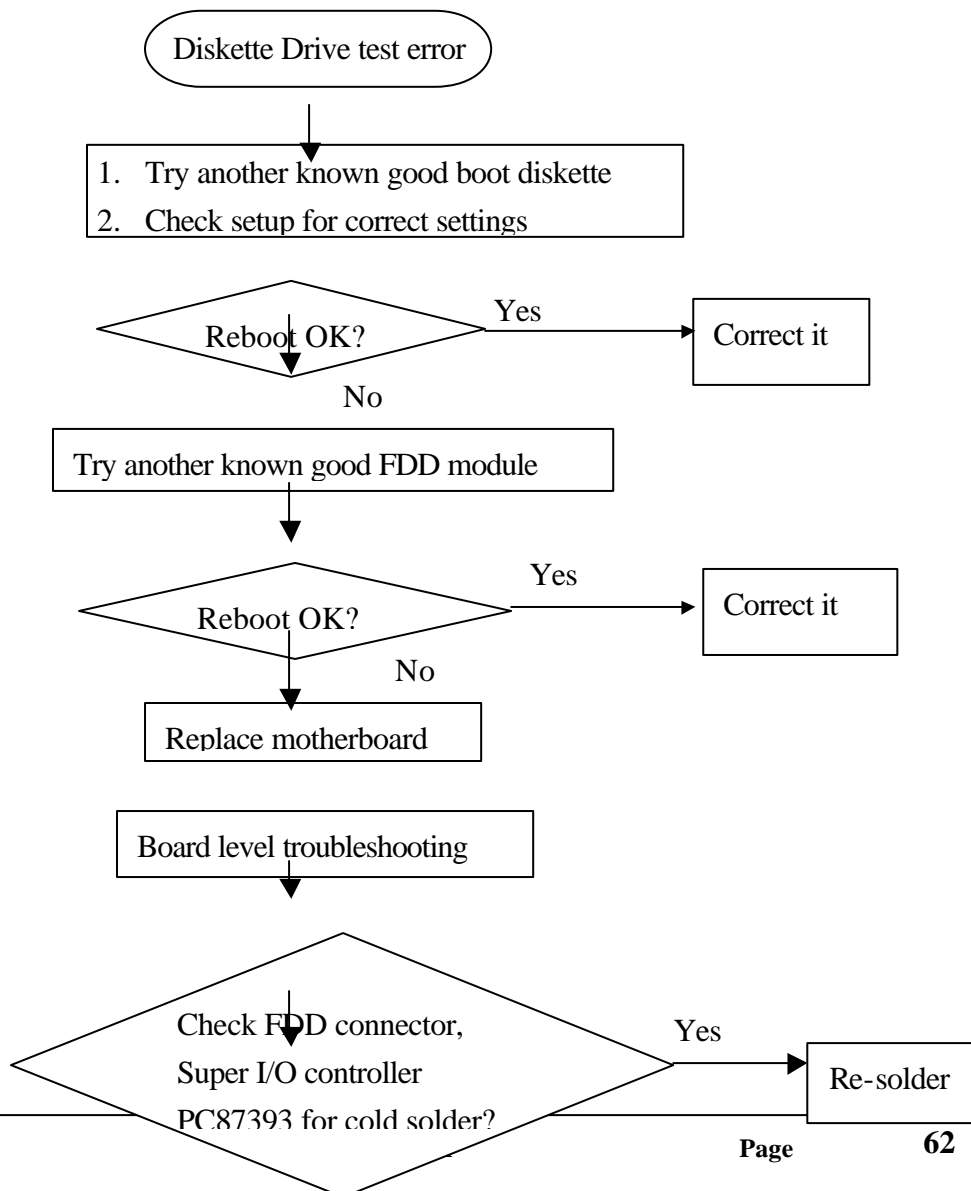

Symptom: An error message is shown when the Touch Pad point is enabled

**5.8 Diskette drive test error**

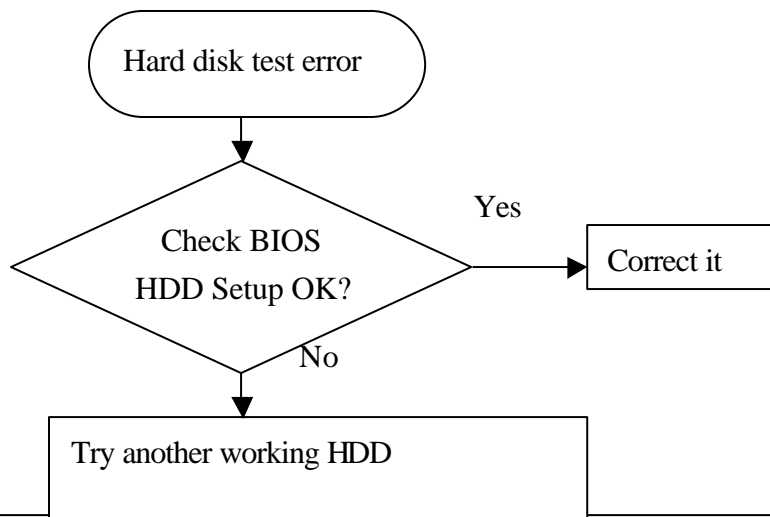

Symptom: An error message is shown while loading data from FDD to system

**5.9 Hard disk drive test error**

Symptom: Either an error message is shown, or the drive motor spins non-stop, while reading data from or writing data to Hard disk

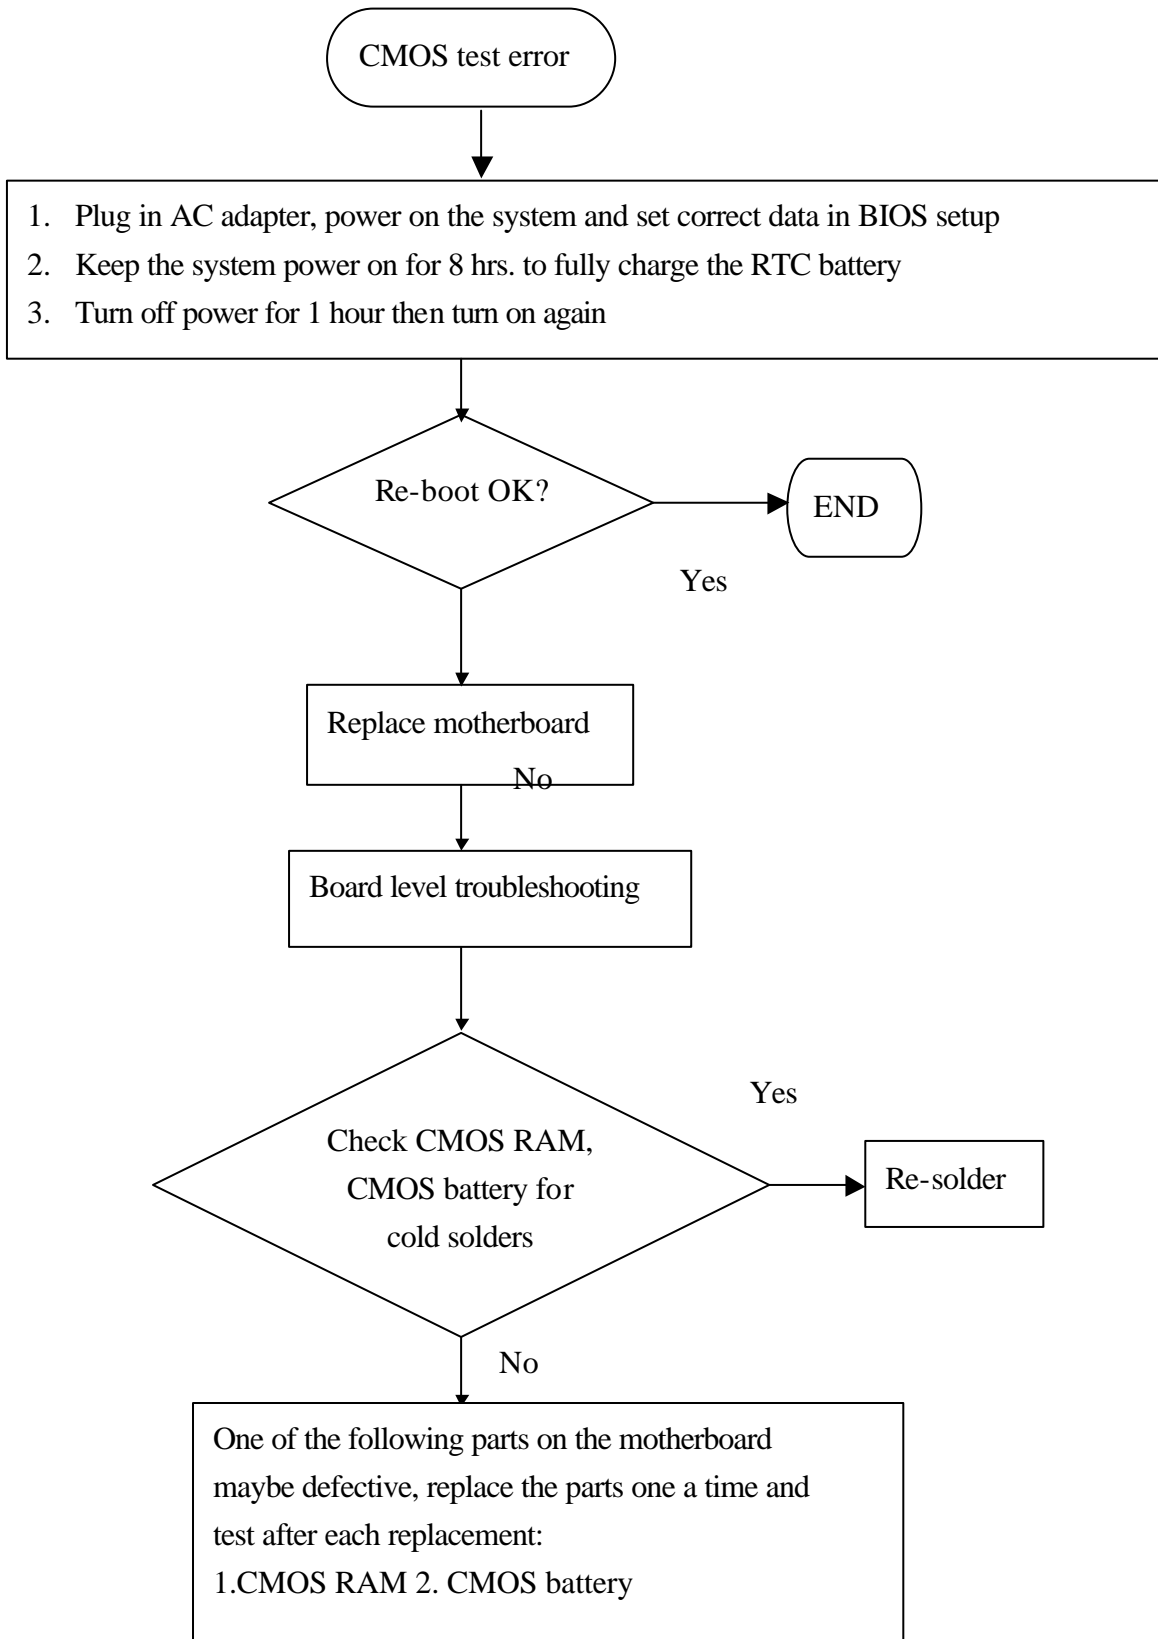

Yes

Replace the faulty parts

**5.10 CMOS test error**

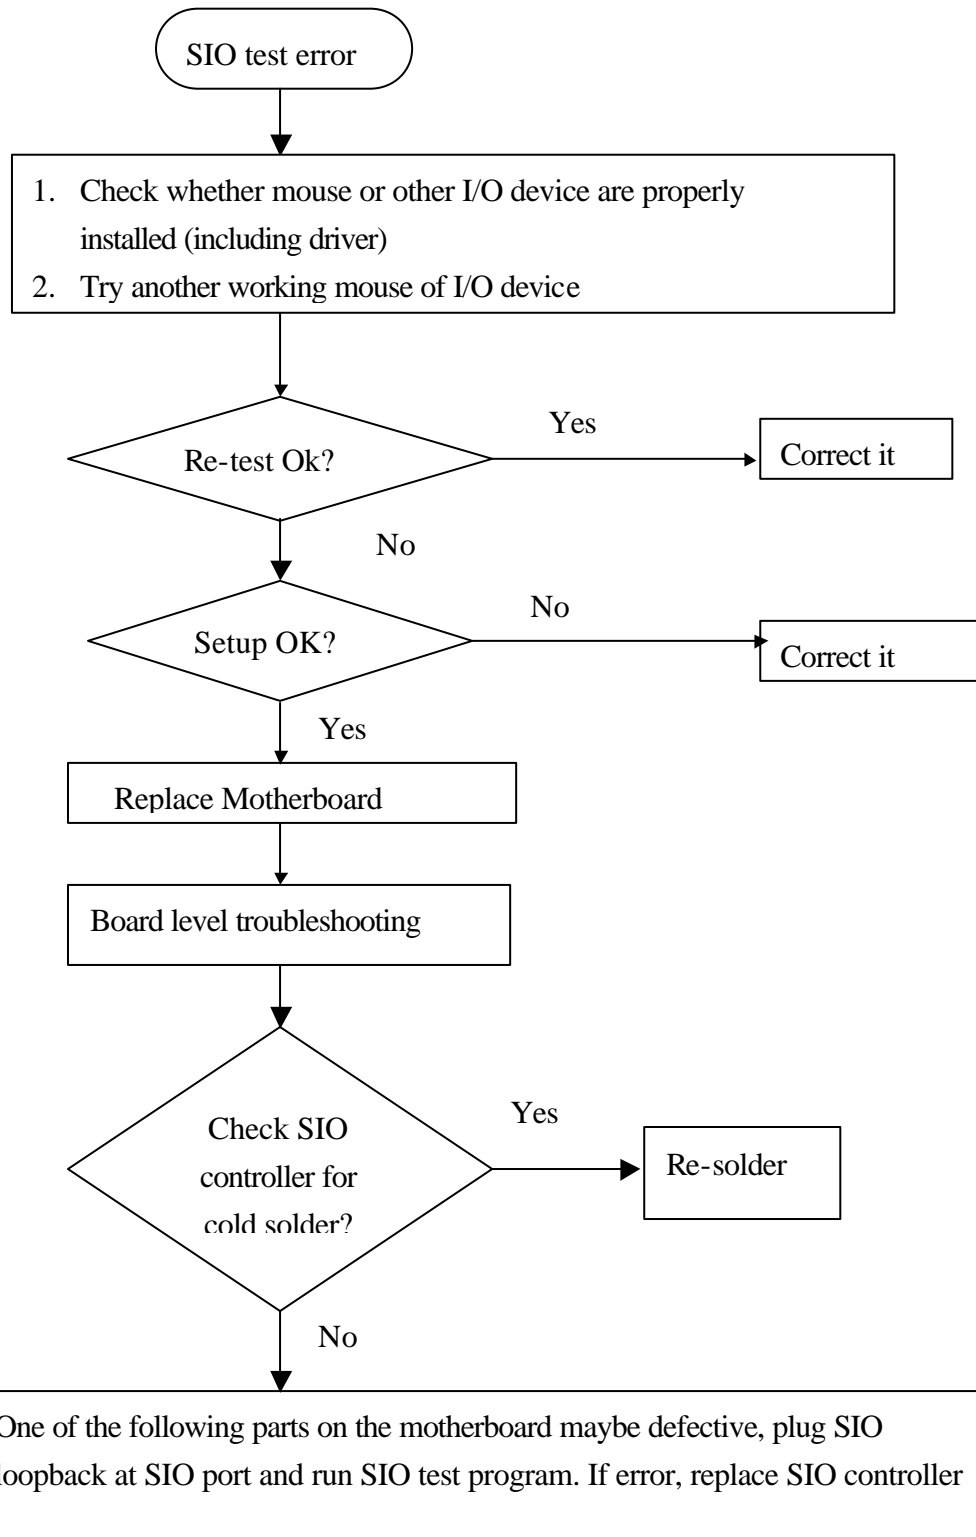

1. CMOS data lost, or inaccurate system time & data

**5.11 SIO port test error**

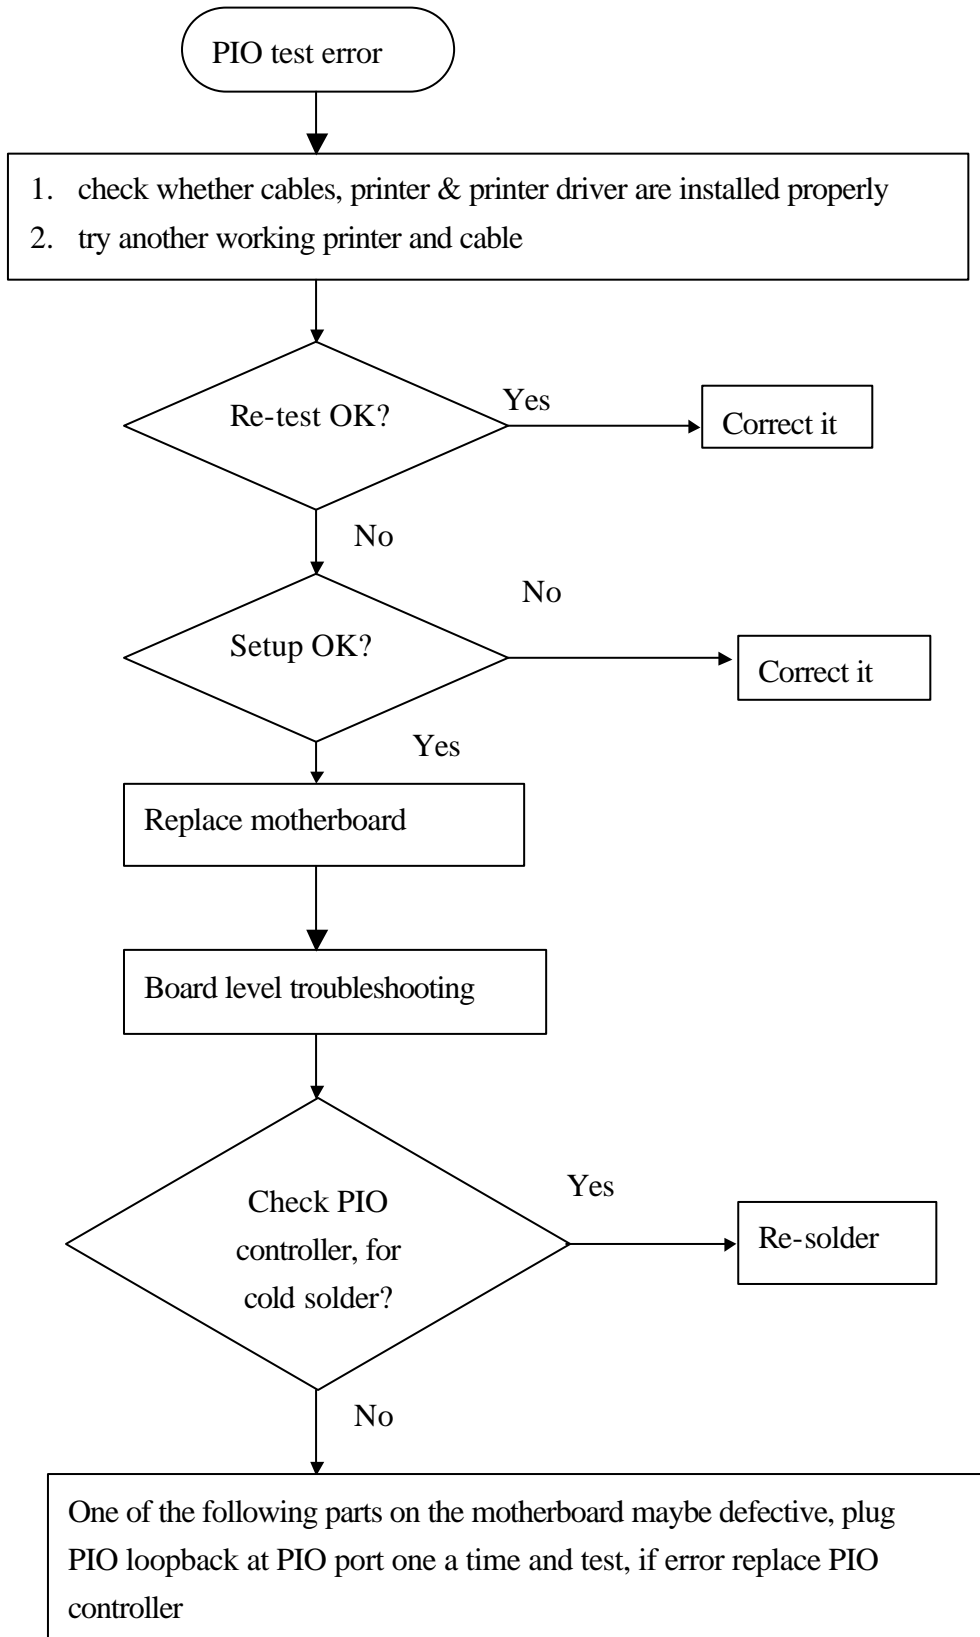

Symptom: An error display occurs when a mouse or other I/O device is installed

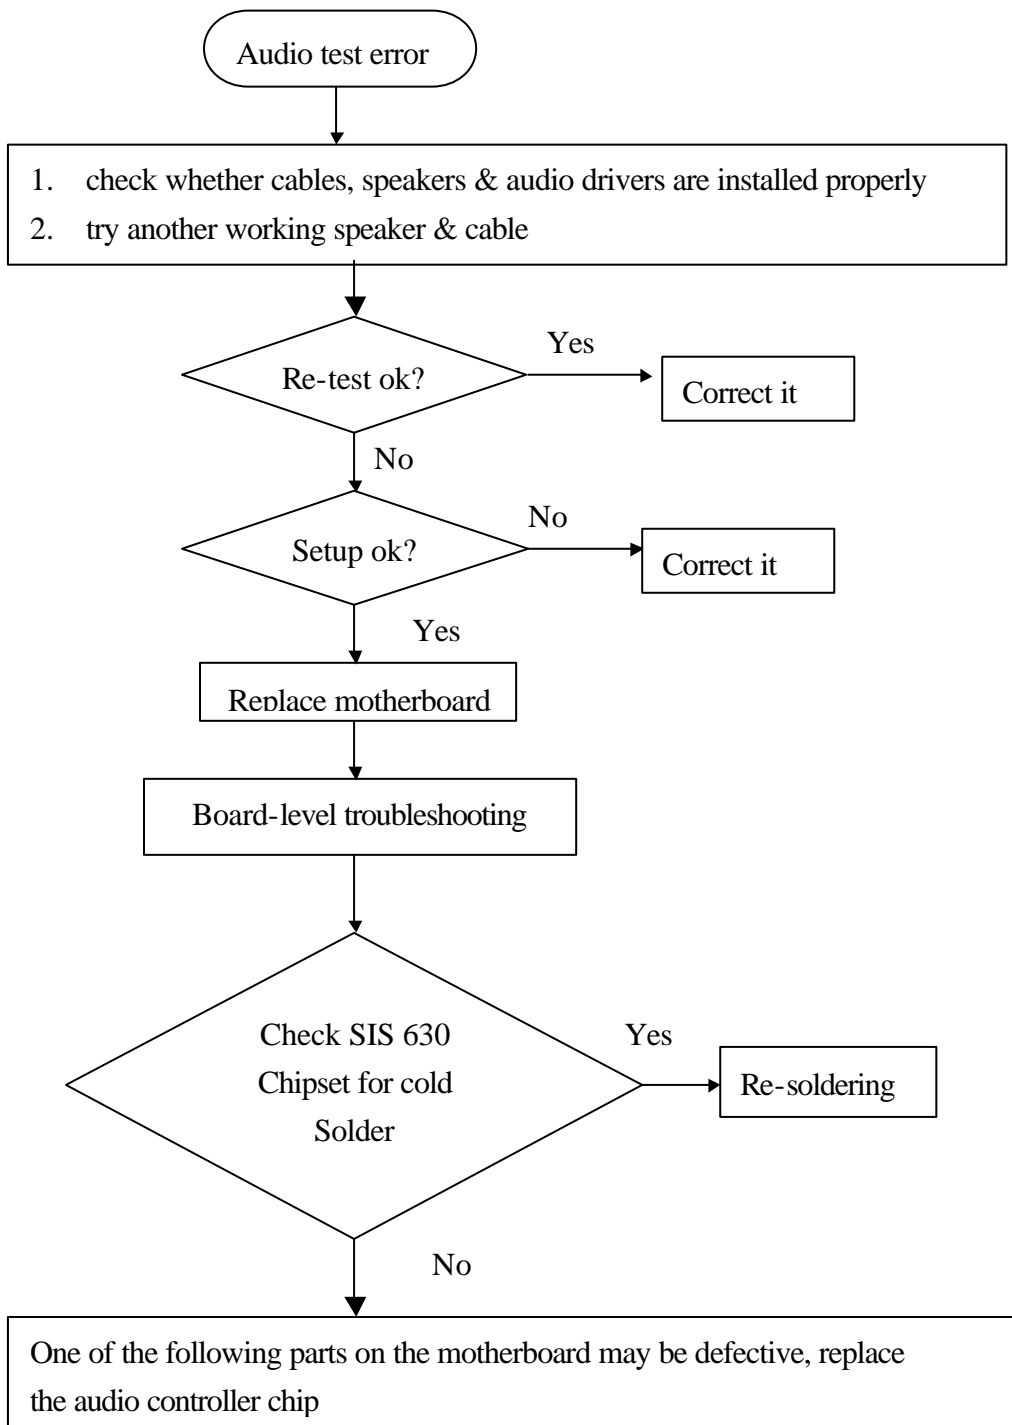

**5.12 PIO port test error**

Symptom: When a print command is issued, printer prints nothing or garbage.

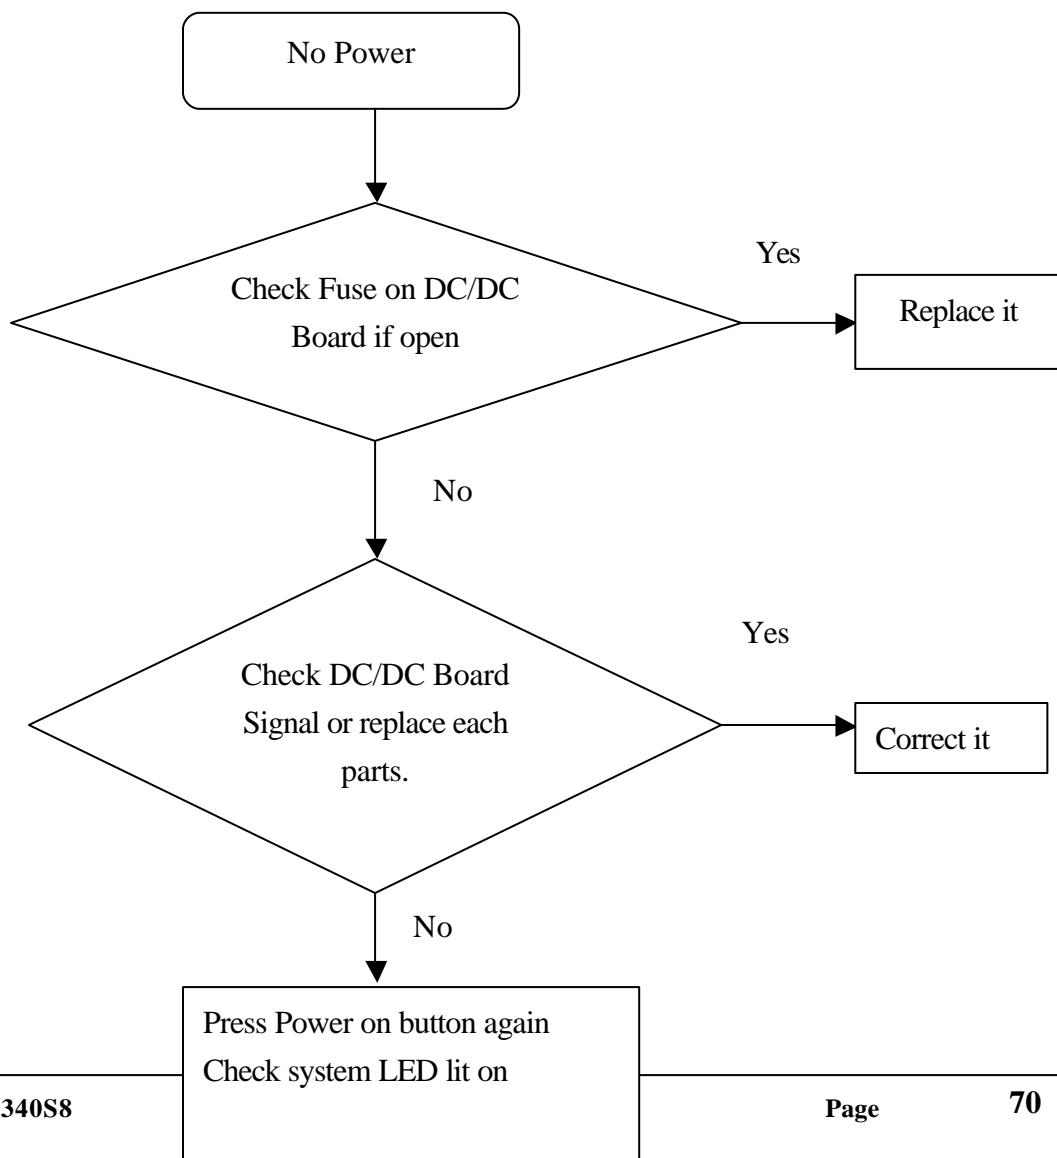

**5.13 Audio failure**

Symptom: No sound from speaker after audio drive is installed.

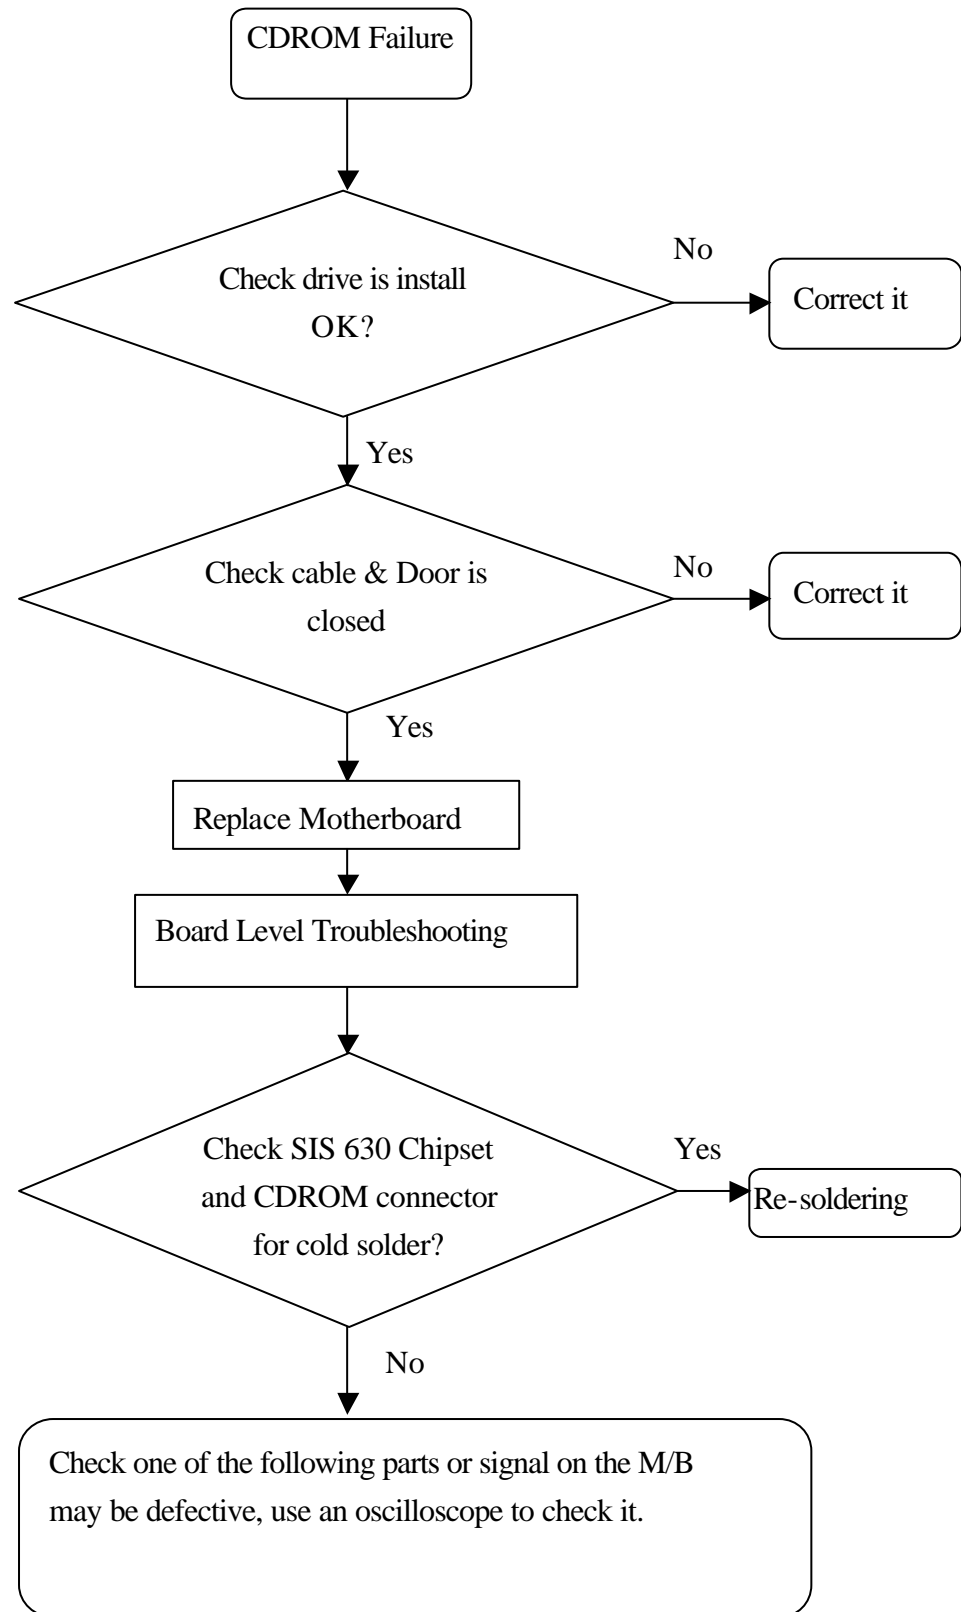

**5.14 No power symptom:**

Symptom: When the power button is pressed, nothing happens, power indicator is not light up.

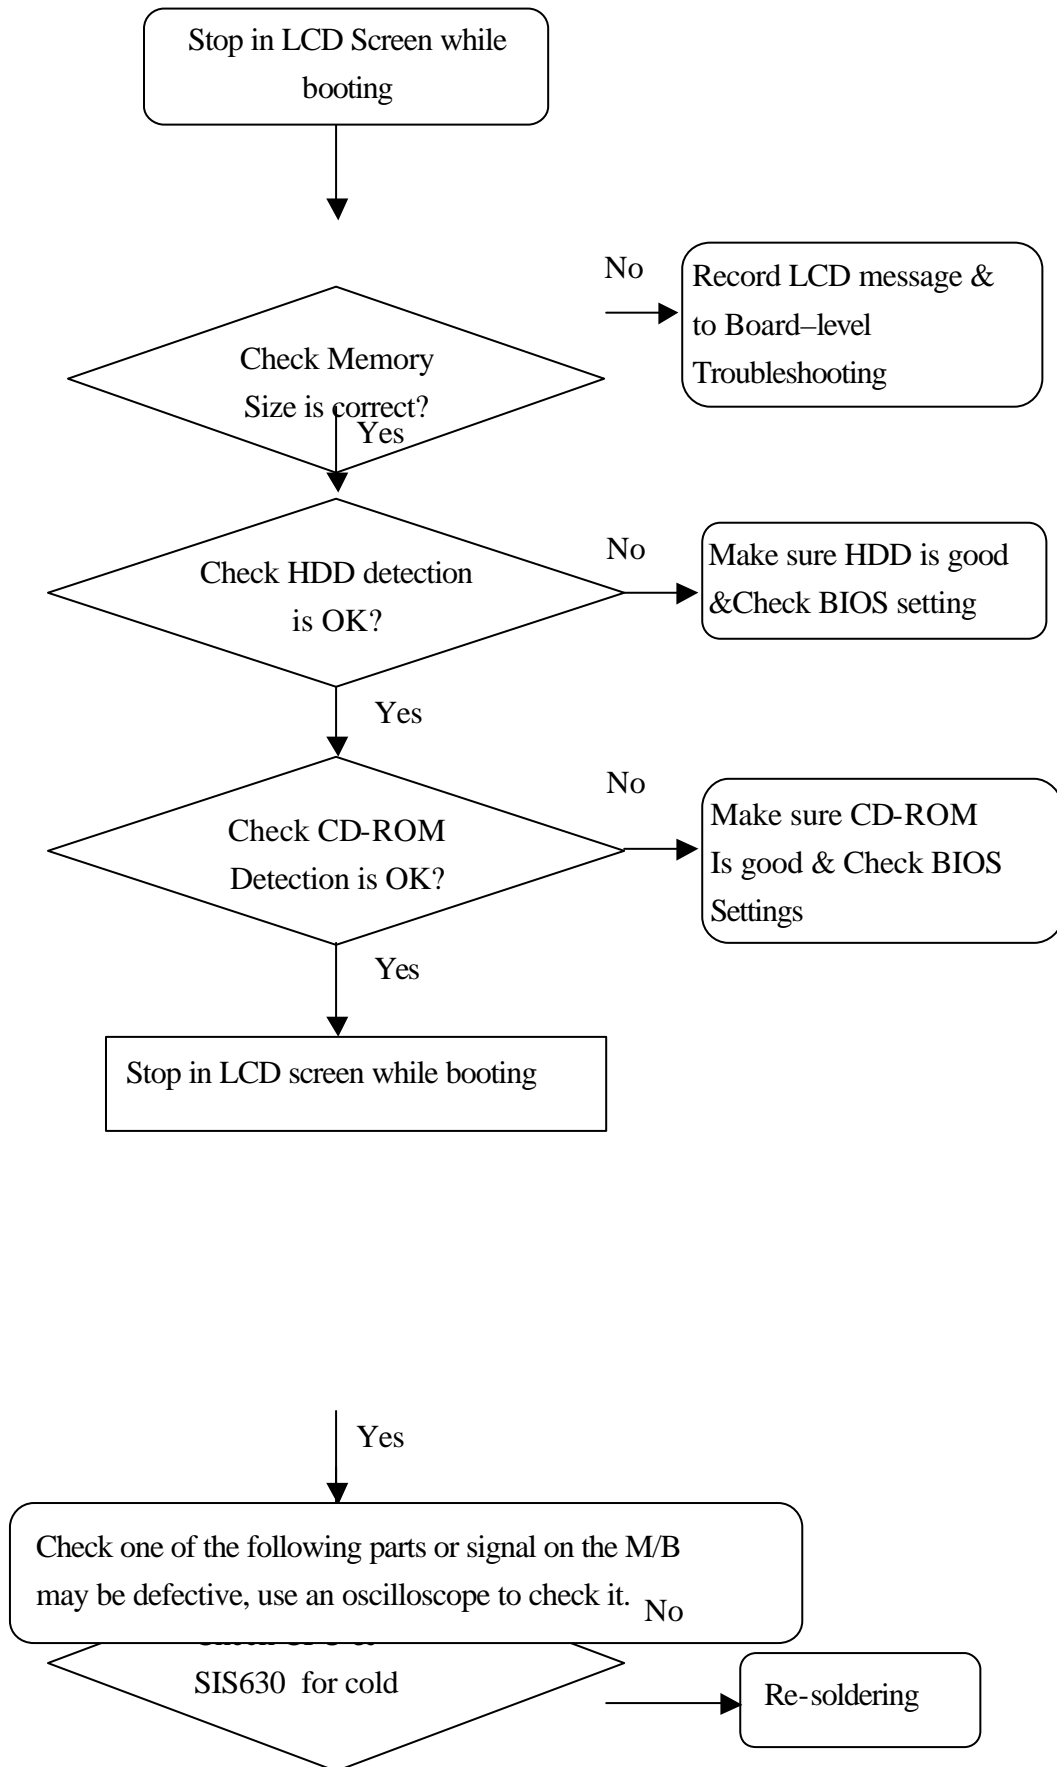

**5.15 CD-ROM drive test error**

An error message is shown when reading data from CD-ROM drive

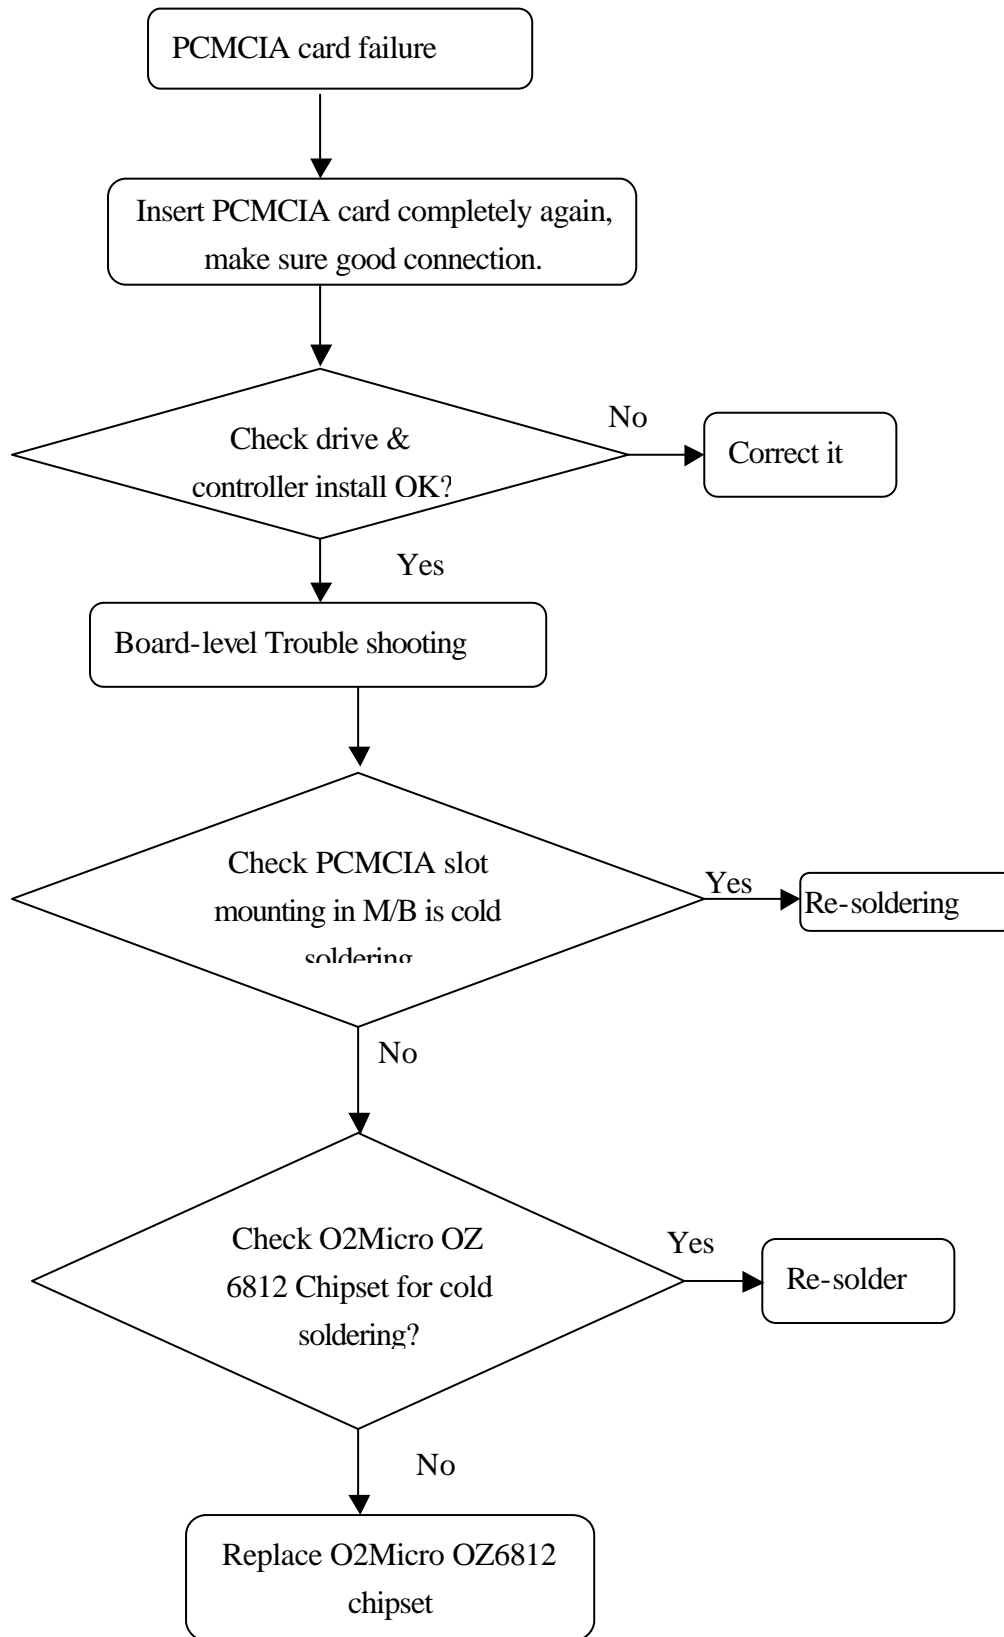

5.16 Stopping in LCD screen while booting

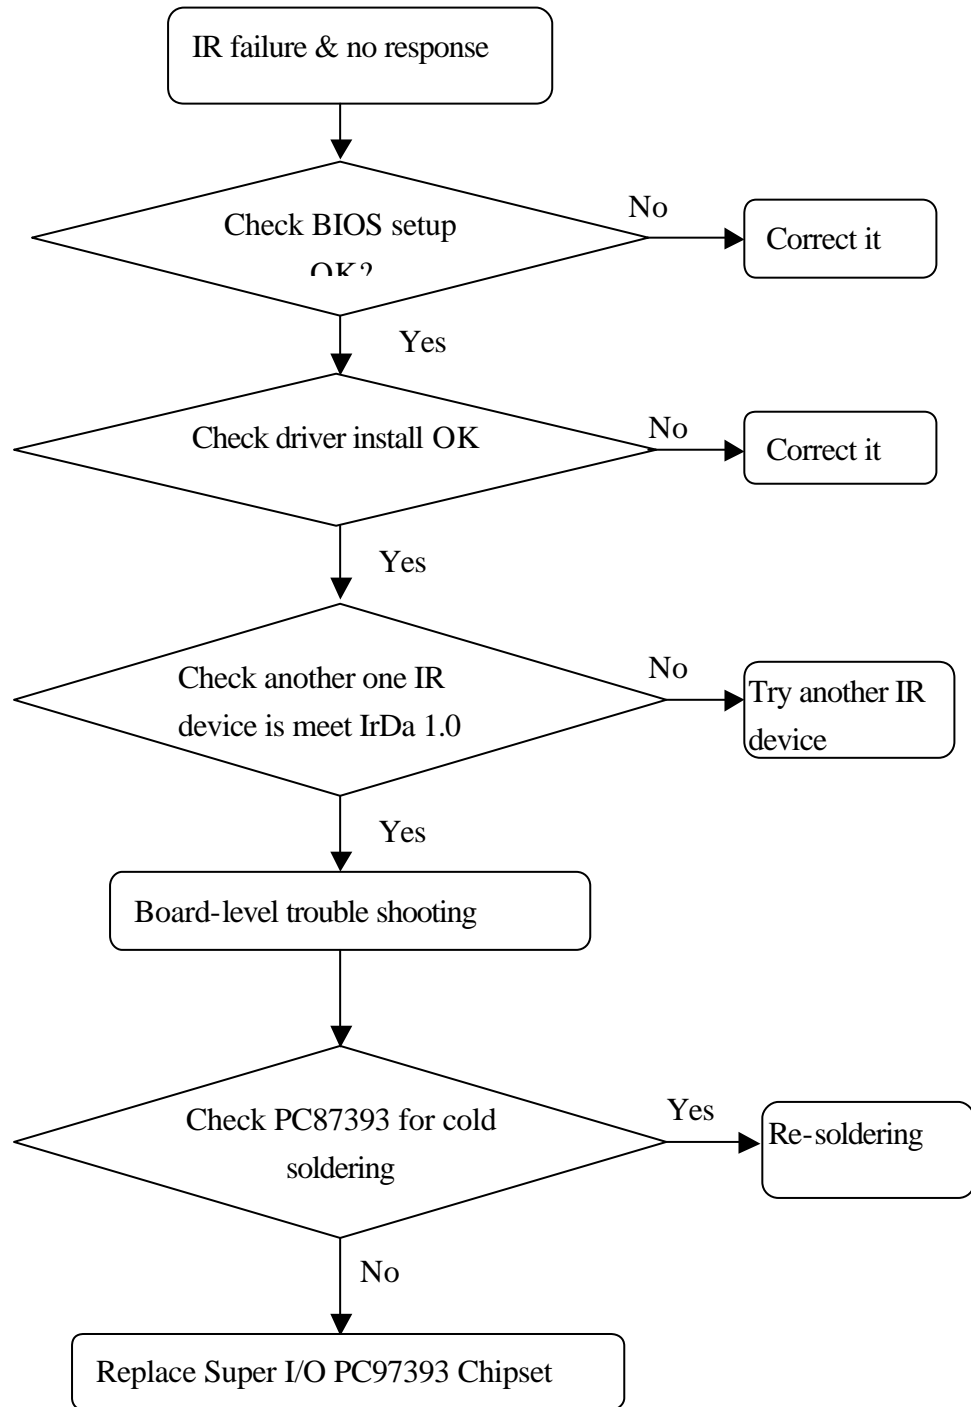

**5.17 PCMCIA CardBus failure**

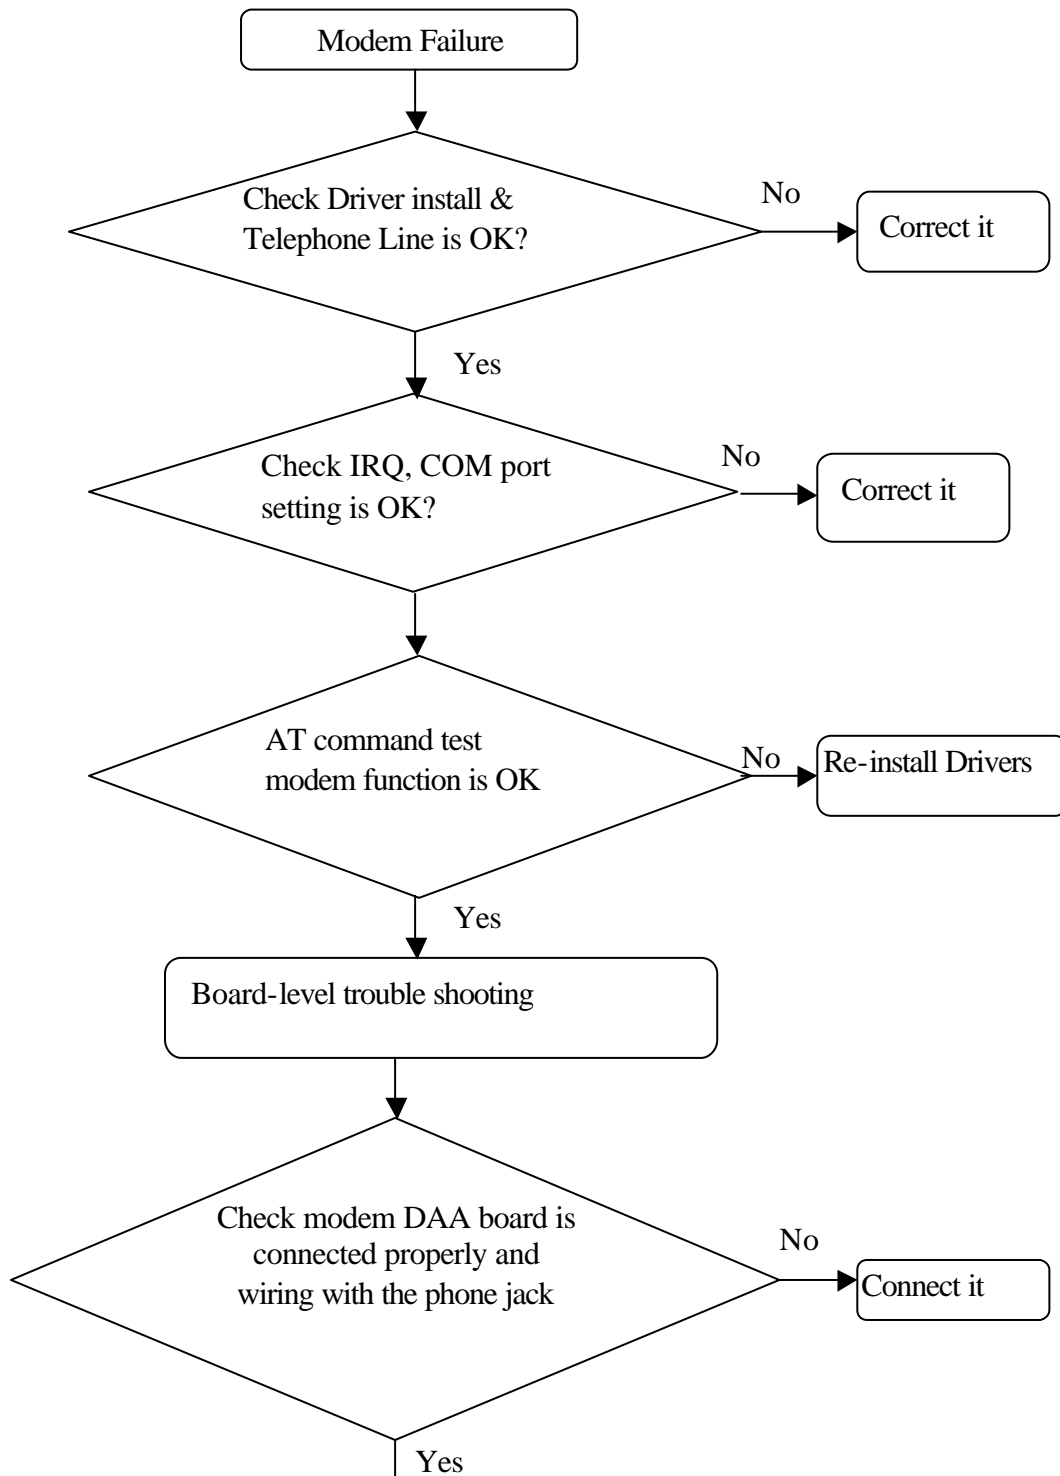

**Symptom :** when insert PCMCIA card to PCMCIA slot, but system can't detect.

5.18 IR Port can't transfer data.

### 5.19 Modem failure

## 6.1 LCD

- I. 14.1" TFT, XGA - Vendor – UNIPAC, CHI MEI,
- II. 13.3" TFT, XGA – Vendor – ACER, IMES
- III. 12.1" TFT, SVGA – Vendor – Sanyo, Torisan

## 6.2 FDD

Internal FDD: 3.5" format  
Capacity : 720KB / 1.44MB / 1.2MB (3 mode)  
Vendor : TEAC or MITSUMI

## 6.3 HDD

Dimension : 2.5", 8.5 / 9.5 mm height  
Vendor : Toshiba, and Fujitsu

## 6.4 CD-ROM

Vendor : QMATE, TEAC  
Dimension : 12.7-mm height, 12/8 cm CD-ROM disc  
PIO Mode 4, 24X  
Average 3.1W, Sleep 0.05W  
ATAPI Interface

### DVD

Vendor : TORISAN, TOSHIBA, QMATE  
Dimension : 12.7mm height, 12/8cm CD-ROM disc  
PIO Mode 4  
Average 3.1W, Sleep 0.05W  
ATAPI Interface

## 6.5 BATTERY:

### Li-ION

Vendor : PANASONIC , GS  
Battery type : Li-Ion, 8 cells (4S2P)  
Battery capacity : 14.8V, 3600mAh, (47.36Whrs)

#### 1.1.1. Charge Voltage : 16.8V +2.5% -1.0%

Charge temperature : 0~45°C

Discharge temperature : -20~60°C

End of Discharge : 11V

Cycle life= 500 times

Overcharge protection : when battery voltage reach 17.2 ±0.2V

Over-discharge protection : when battery voltage decrease to 10 ± 1V

Pre-charge current: 0.2A

Charge current : When system is power off : 2A  
When system is powered ON : 1A

### Ni-MH

Vendor : PANASONIC, TOSHIBA

Battery Type : Ni-MH, 10 cells (10S)

Battery Capacity : 12.0V, 4500mAh (54.0 watts)

Charge voltage : 16.8V +2.5% -1.0%

Charge temperature : 0~45°C

Discharge temperature : -20~60°C  
End of Discharge : 10V  
Cycle life= 500 times  
Pre-charge current: 0.2A  
Charge current : When system is power off : 2A  
When system is powered ON : 1A

## 6.6 TOUCH PAD

Synaptic  
Capacitor sensor  
Support edge motion  
Support virtual scroll bar  
Support 2 or 3 button mode  
ESD withstand: 15KV  
Power Consumption: 2.75mA / 5V  
X/Y resolution: 500 points/inch  
Interface: PS/2

## 6.7 KEYBOARD

Supplier : KC Matrix-290  
Travel : 3.0 ±0.2mm  
Support : 3 window keys  
Key pitch : 19mm  
Dimension : 249mm x 100.85mm x 7.8 mm

## 6.8 MODEM/FAX MODULE

Modem chip : SamrtLink HAMR5603+Si3014  
Meet PC99 Window modem requirement  
Support :

AMR / MDC slot / V.90 (56Kbps) / AC'97 2.1 / APM & ACPI  
V.34bis (4.8Kbps to 33.6Kbps) /  
V.32 bis (4.8Kbps to 14 Kbps) / AT command set  
V.42 (LAPM) and MNP 2-4 error correction, 5 data compression  
V.22 bis ( 50 bps to 2.4Kbps) / V.21 Bell 103 / Bell 212  
Fax Group3 Class 1/V.17, V.29, V.27ter, V.21 ch2/  
Group III fax / telephony answering machine / DTMF generation and detection  
Local handset, telephone and microphone record / telephone line and headset or  
Peaked playback / VOX voice Detection/ Caller ID (optional) / host base DSVD
