

Service Manual

Simplified

Notebook Computer

Model No. **CF-19FHGAXxM**

TOUGHBOOK

This is the Service Manual for
the following areas.
M ...for U.S.A. and Canada

Model No. CF-19FHGAX 1 M

1: Operation System

A: Microsoft® Windows® XP Professional
J: Microsoft® Windows® VISTA Business

 **WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Panasonic[®]

Unauthorized copying and distribution is a violation of law.

WARNING

For U.K.

This apparatus must be earthed for your safety.

To ensure safe operation the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe.

For your safety, if you have any doubt about the effective earthing of the power point, consult a qualified electrician.

FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 3 amp fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 3 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

Warning: THIS APPLIANCE MUST BE EARTHED.

Important

The wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow:	Earth
Blue:	Neutral
Brown:	Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured GREEN-and-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol  coloured GREEN or GREEN-and-YELLOW.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured BLACK.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured RED.

The mains plug on this equipment must be used to disconnect the mains power.

Please ensure that a socket outlet is available near the equipment and shall be easily accessible.

How to replace the fuse

Open the fuse compartment with a screwdriver and replace the fuse.

Warnings

- This equipment is not designed for connection to an IT power system.
(An IT system is a system having no direct connections between live parts and Earth; the exposed-conductive-parts of the electrical installation are earthed.
An IT system is not permitted where the computer is directly connected to public supply systems in the U.K.)
- Disconnect the mains plug from the supply socket when the computer is not in use.

This equipment is produced to BS800/1983.

LASER SAFETY INFORMATION

For U.S.A.

Class 1 LASER-Product

This product is certified to comply with DHHS Rules 21 CFR Subchapter J.

This product complies with European Standard EN60825 (or IEC Publication 825)

For all areas

This equipment is classified as a class 1 level LASER product and there is no hazardous LASER radiation.

Caution:

- (1) Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
- (2) The drive is designed to be incorporated into a computer-based system or unit which has an enclosing cover. It should never be used as a stand alone drive.

Danger:

The serviceman should not remove the cover of drive unit and should not service because the drive unit is a nonserviceable part.
Please check DANGER label on PD-drive unit.

- Unplug the AC power cord to the equipment before opening the top cover of the drive.
When the power switch it on, do not place your eyes close to the front panel door to look into the interior of the unit.

LASER Specification

Class 1 level LASER Product

Wave Length: DVD 658±8 nm

CD 775~815 nm

Laser safety information is appropriate only when drive with laser is installed.

SAFETY PRECAUTIONS

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacturer's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

SAVE THESE INSTRUCTIONS

LITHIUM BATTERY

This computer contains a lithium battery to enable the date, time, and other data to be stored. The battery should only be exchanged by authorized service personnel.

Warning! A risk of explosion from incorrect installation or misapplication may possibly occur.

LITHIUM BATTERY ⚠

• CAUTION

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the equipment manufacturer.
Dispose of used batteries according to the manufacturer's instructions.

LITHIUMBATTERIES ⚠

Vorsicht!

Explosionsgefahr bei unsachgemäßem Austausch der Batterie. Ersatz nur durch denselben oder einen vom Hersteller empfohlenen ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

PILE AU LITHIUM ⚠

ATTENTION: IL Y A DANGER D'EXPLOSION S' IL Y A REMPLACEMENT INCORRECT DE LA PILE. REMPLACER UNIQUEMENT AVEC UNE PILE DU MÊME TYPE OU D'UN TYPE RECOMMANDÉ PAR LE CONSTRUCTEUR. METTRE AU RÉBUT LES PILES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS DU FABRICANT.

Precautions (Battery Pack)

Do Not Use with Any Other Product

The battery pack is rechargeable and was intended for the specified product. If it is used with a product other than the one for which it was designed, electrolyte leakage, generation of heat, ignition or rupture may result.

Do Not Charge the Battery Using Methods Other Than Those Specified

If the battery is not charged using one of the specified methods, electrolyte leakage, generation of heat, ignition or rupture may result.

Do Not Throw the Battery Pack into a Fire or Expose It to Excessive Heat

Generation of heat, ignition or rupture may result.

Avoid Extreme Heat (Near the Fire, in Direct Sunlight, for Example)

Electrolyte leakage, generation of heat, ignition or rupture may result.

Do Not Insert Sharp Objects into the Battery Pack, Expose It to Bumps or Shocks, Disassemble, or Modify It

Electrolyte leakage, generation of heat, ignition or rupture may result.

Do Not Short the Positive (+) and Negative (-) Contacts

Generation of heat, ignition or rupture may result. Do not place the battery pack together with articles such as necklaces or hairpins when carrying or storing.

Do Not Use This Product with a Battery Pack Other Than the One Specified

Use only the specified battery pack with your product. Use of battery packs other than those manufactured and supplied by Panasonic may present a safety hazard (generation of heat, ignition or rupture).

A lithium ion battery that is recyclable powers the product you have purchased.

Please call 1-800-8-BATTERY for information on how to recycle this battery.

L'appareil que vous vous êtes procuré est alimenté par une batterie au lithium-ion.

Pour des renseignements sur le recyclage de la batterie, veuillez composer le 1-800-8-BATTERY.

- Do not touch the terminals on the battery pack. The battery pack may no longer function properly if the contacts are dirty or damaged.
- Do not expose the battery pack to water, or allow it to become wet.
- If the battery pack will not be used for a long period of time (a month or more), charge or discharge (use) the battery pack until the remaining battery level becomes 30% to 40% and store it in a cool, dry place.
- This computer prevents overcharging of the battery by recharging only when the remaining power is less than approx. 95% (when Economy Mode (ECO) is enabled: 75%) of capacity.
- The battery pack is not charged when the computer is first purchased. Be sure to charge it before using it for the first time. When the AC adaptor is connected to the computer, charging begins automatically.
- Should the battery leak and the fluid get into your eyes, do not rub your eyes. Immediately flush your eyes with clear water and see a doctor for medical treatment as soon as possible.

NOTE

- The battery pack may become warm during recharging or normal use. This is completely normal.
- Recharging will not commence if internal temperature of the battery pack is outside of the allowable temperature range (0 °C to 55 °C {32 °F to 131 °F}). (→  *Reference Manual* "Battery Power") Once the allowable range requirement is satisfied, charging begins automatically. Note that the recharging time varies based on the usage conditions. (Recharging takes longer than usual when the temperature is 10 °C {50 °F} or below.)
- If the temperature is low, the operating time is shortened. Only use the computer within the allowable temperature range.
- The battery pack is a consumable item. If the amount of time the computer can be run by using a particular battery pack becomes dramatically shorter and repeated recharging does not restore its performance, the battery pack should be replaced with a new one.
- When transporting a spare battery inside a package, briefcase, etc., it is recommended that it be placed in a plastic bag so that its contacts are protected.
- Always power off the computer when it is not in use. Leaving the computer on when the AC adaptor is not connected will exhaust the remaining battery capacity.

1. Specifications

This page provides the specifications for the basic model CF-19FHGAXBM/CF-19FDGAXVM. The model number is different according to the unit configuration.

To check the model number:

Check the bottom of the computer or the box the computer came in at the time of purchase.

To check CPU speed, memory size and the hard disk drive (HDD) size:

Run the Setup Utility ( *Reference Manual* "Setup Utility") and select [Information] menu.

[CPU Speed]: CPU speed, [System Memory]: Memory size, [Hard Disk]: Hard disk drive size

Main Specifications

Model No.		CF-19FHGAXBM	CF-19FDGAXVM
CPU		Intel® Core™ 2 Duo Processor U7500 (1.06 GHz, 2 MB ¹¹ L2 cache, 533 MHz FSB)	
Chipset		Intel® GM965	
Memory ^{2,4}		1 GB (4 GB Max.)	
Video Memory ^{11,3}		UMA (384 MB Max.)	
Hard Disk Drive ⁴		80 GB	
Display Method		10.4 XGA type (TFT)	
Internal LCD ⁵		65,536/16,777,216 colors (800 × 600 dots/1024 × 768 dots)	
External Display ⁶		65,536/16,777,216 colors (800 × 600 dots/1024 × 768 dots/1280 × 768 dots/1280 × 1024 dots/1440 × 900 dots)	
Wireless LAN ⁷			
Bluetooth™ ⁸			
LAN		IEEE 802.3 10BASE-T, IEEE 802.3u 100BASE-TX, IEEE 802.3ab 1000BASE-T	
Modem		Data: 56 kbps (V.92) FAX: 14.4 kbps	
Sound		WAVE and MIDI playback, Intel® High Definition Audio subsystem support, Monaural speaker	
Security Chip		TPM (TCG V1.2 compliant) ⁹	
Card Slot	PC Card	Type I or Type II x 1 (3.3 V: 400 mA, 5 V: 400 mA)	
	ExpressCard ¹⁰	ExpressCard/34 ¹¹ or ExpressCard/54 x 1	
	Smart Card ¹²	ISO7816 x 1	
	SD Memory Card ¹³	x 1, Data transfer rate = 8 MB per second ¹⁴	
RAM Module Slot		200-pin, 1.8 V, SO-DIMM, DDR2 SDRAM, PC2-4200 Compliant	
Interface		USB port (4-pin, USB 2.0) x 2, Serial Port (Dsub 9-pin male), Modem port (RJ-11), LAN port (RJ-45), External display port (Mini Dsub 15-pin female), Expansion Bus Connector (Dedicated 100-pin female), External Antenna Connector (Dedicated 50 coaxial connector) x 2, IEEE 1394a Interface Connector (4-pin x 1), Microphone Jack (Miniature jack, 3.5 DIA, Stereo), Headphone Jack (Miniature jack, 3.5 DIA, Impedance 32 Ω, Output Power 4 mW x 2)	
Keyboard / Pointing Device		82 keys / Touch Pad / Touchscreen (Anti-Reflection, Stylus (included) touch capable)	82 keys / Touch Pad / Digitizer (Anti-Reflection)
Power Supply		AC adaptor or Battery pack	
AC Adaptor ¹⁵		Input: 100 V to 240 V AC, 50 Hz/60 Hz, Output: 16.0 V DC, 3.75 A	
Battery Pack		Li-ion 10.65 V, 5.7 Ah	
Operating Time ¹⁶		Approx. 7 hours ¹⁷	
Charging Time ¹⁶	Power on	Approx. 7.5 hours	
	Power off	Approx. 4.5 hours	
Clock Battery		Coin type lithium battery 3.0 V	
Power Consumption ¹⁸		Approx. 30 W ¹⁹ / Approx. 60 W (Maximum when recharging in the ON state)	
Physical Dimensions (W × H × D) (excluding the hand strap/shoulder strap)		271 mm × 49 mm × 216 mm {10.7" × 1.93" × 8.5"}	
Weight (excluding the hand strap/shoulder strap)		Approx. 2.30 kg {Approx. 5.06 lb.}	Approx. 2.35 kg {Approx. 5.17 lb.}
Operation Environment		Temperature: 5 °C to 35 °C {41 °F to 95 °F} Humidity: 30% to 80% RH (No condensation)	
Storage Environment		Temperature: -20 °C to 60 °C {-4 °F to 140 °F} Humidity: 30% to 90% RH (No condensation)	

Main Specifications

Operating System	Microsoft® Windows® XP Professional Service Pack 2 with Advanced Security Technologies (NTFS File System)	Microsoft® Windows® XP Tablet PC Edition 2005 (NTFS File System)
Utility Programs	DMI Viewer, Microsoft® Windows® Media Player 10, Adobe Reader, PC Information Viewer, SD Utility, Icon Enlarger, Loupe Utility, Intel® Matrix Storage Manager, Intel® PROSet/Wireless Software ⁷ , Bluetooth™ Stack for Windows® by TOSHIBA ⁸ , Wireless Switch Utility, Hotkey Settings, Battery Recalibration Utility, Panasonic Hand Writing ²⁰ , Software Keyboard ²⁰ , Display Rotation Tool, InMnion TPM Professional Package ²¹ , Recover Pro™ 6 ²¹ or Recover Pro™ VX ²¹ , Tablet Buttons Settings ²⁰ , Power Saving Utility, Wireless Connection Disable Utility ²¹	
	Setup Utility, Hard Disk Data Erase Utility ²² , PC-Diagnostic Utility	

Wireless LAN <Only for model with wireless LAN>

Intel Wireless WiFi Link 4965AG (802.11 a + b + g) ²³	
Data Transfer Rates ²⁴	IEEE802.11a: 54/48/36/24/18/12/9/6 Mbps (automatically switched) IEEE802.11b: 11/5.5/2/1 Mbps (automatically switched) IEEE802.11g: 54/48/36/24/18/12/9/6 Mbps (automatically switched)
Standards Supported	IEEE802.11a/IEEE802.11b/IEEE802.11g
Transmission method	OFDM system, DSSS system
Wireless Channels Used	IEEE802.11a: Channels 36/40/44/48/52/56/60/64/149/153/157/161/165 IEEE802.11b/IEEE802.11g: Channels 1 to 11
RF Frequency Band	IEEE802.11a: 5.18-5.32 GHz, 5.745-5.825 GHz IEEE802.11b/IEEE802.11g: 2.412-2.462 GHz

Bluetooth™ <Only for model with Bluetooth>

Bluetooth Version	2.0 + EDR
Transmission method	FHSS system
Wireless Channels Used	Channels 1 to 79
RF Frequency Band	2.402-2.48 GHz

¹ 1 MB = 1,048,576 bytes

² You can physically expand the memory upto 4 GB, but the total amount of usable memory available will be less depending on the actual system configuration.

³ A segment of the main memory is allotted automatically depending on the computer's operating status. The size of the Video Memory cannot be set by the user.

⁴ 1 GB = 1,000,000,000 bytes. Your operating system or some application software will report as fewer GB.

⁵ A 16,777,216 color display is achieved by using the dithering function.

⁶ Maximum resolution depends on the specifications of the external display.

⁷ Only for model with wireless LAN

⁸ Only for model with Bluetooth

⁹ For information on TPM, click [start] - [Run] and input "c:\util\drivers\tpm\README.pdf", and refer to the Installation Manual of "Trusted Platform Module (TPM)".

¹⁰ Only for model with ExpressCard slot

¹¹ When using ExpressCard/34, the card slot cover cannot be closed.

¹² Only for model with Smart Card slot

¹³ SD Memory Cards that support high-speed transfer rates can be used. Windows Ready Boost function is also supported. Operation has been tested and confirmed using Panasonic SD Memory Cards and SDHC Memory Cards with a capacity of up to 8 GB. Operation on other SD equipment is not guaranteed.

¹⁴ This computer is not compatible with MultiMediaCards. Do not insert this kind of cards.

¹⁴ Theoretical value and not the actual speed. The transfer rate does not become higher even if you use a card that supports the higher transfer rate.

¹⁵ <Only for North America>

The AC adaptor is compatible with power sources up to 240 V AC adaptor. The computer is supplied with a 125 V AC compatible AC cord. ^{20-M-2-1}

¹⁶ Varies depending on the usage conditions.

¹⁷ Measured using MobileMark™ 2005 (LCD brightness: 60 cd/m²)

¹⁸ Approx. 0.9 W when the battery pack is fully charged (or not being charged) and the computer is OFF.

¹⁹ Rated power consumption ^{23-E-1}

²⁰ Only for model with Windows XP Professional

²¹ You need to install to use the feature.

²² The Product Recovery DVD-ROM is required.

²³ It does not correspond to IEEE802.11.n.

²⁴ These are speeds specified in IEEE802.11a+b+g standards. Actual speeds may differ.

2. Names and Functions of Parts

A: Wireless LAN Antenna

<Only for model with wireless LAN>

Reference Manual "Wireless LAN"

B: Bluetooth Antenna

<Only for model with Bluetooth>

Reference Manual "Bluetooth"

C: Stylus/Pen Holder

D: Touch Pad

E: LED Indicator

: Wireless ready
This indicator lights when Wireless LAN, Bluetooth, and/or Wireless WAN are connected and ready. It does not necessarily indicate the On/Off condition of the wireless connection.

Reference Manual "Disabling / Enabling Wireless Communication"

: Wireless WAN status
<Only for model with wireless WAN>
Refer to the instruction manual of the wireless device.

: Caps lock

: Numeric key (NumLk)

: Scroll lock (ScrLk)

: Hard disk drive status

F: Tablet Buttons

Reference Manual "Tablet Buttons"

G: LCD

<Only for model with touchscreen>

Reference Manual "Touchscreen"

<Only for model with digitizer>

Reference Manual "Digitizer"

H: Display Release Latch

I: Speaker

<for model with Smart Card Slot>

PC Card Slot

→ Reference Manual "PC Card / ExpressCard"

K: Headphone Jack

You can connect headphones or amplified speakers. When they are connected, audio from the internal speakers is not heard.

L: Microphone Jack

A condenser microphone can be used. If other types of microphones are used, audio input may not be possible, or malfunctions may occur as a result.

- When recording in stereo using a stereo microphone:
Click [start] - [All Programs] - [SoundMAX] - [Control Panel] and select [Microphone], and then add a check mark for [No Filtering] in [Microphone Enhancements].
- When using a monaural microphone with a 2-terminal plug:
Click [start] - [All Programs] - [SoundMAX] - [Control Panel] and select [Microphone], and then add a check mark for [Voice Recording] in [Microphone Enhancements].
Otherwise, only audio on the left track will be recorded.

M: Security Lock

A Kensington cable can be connected. For further information, read the manual that comes with the cable.

N: External Display Port

→ Reference Manual "External Display"

O: Serial Port

P: RAM Module Slot

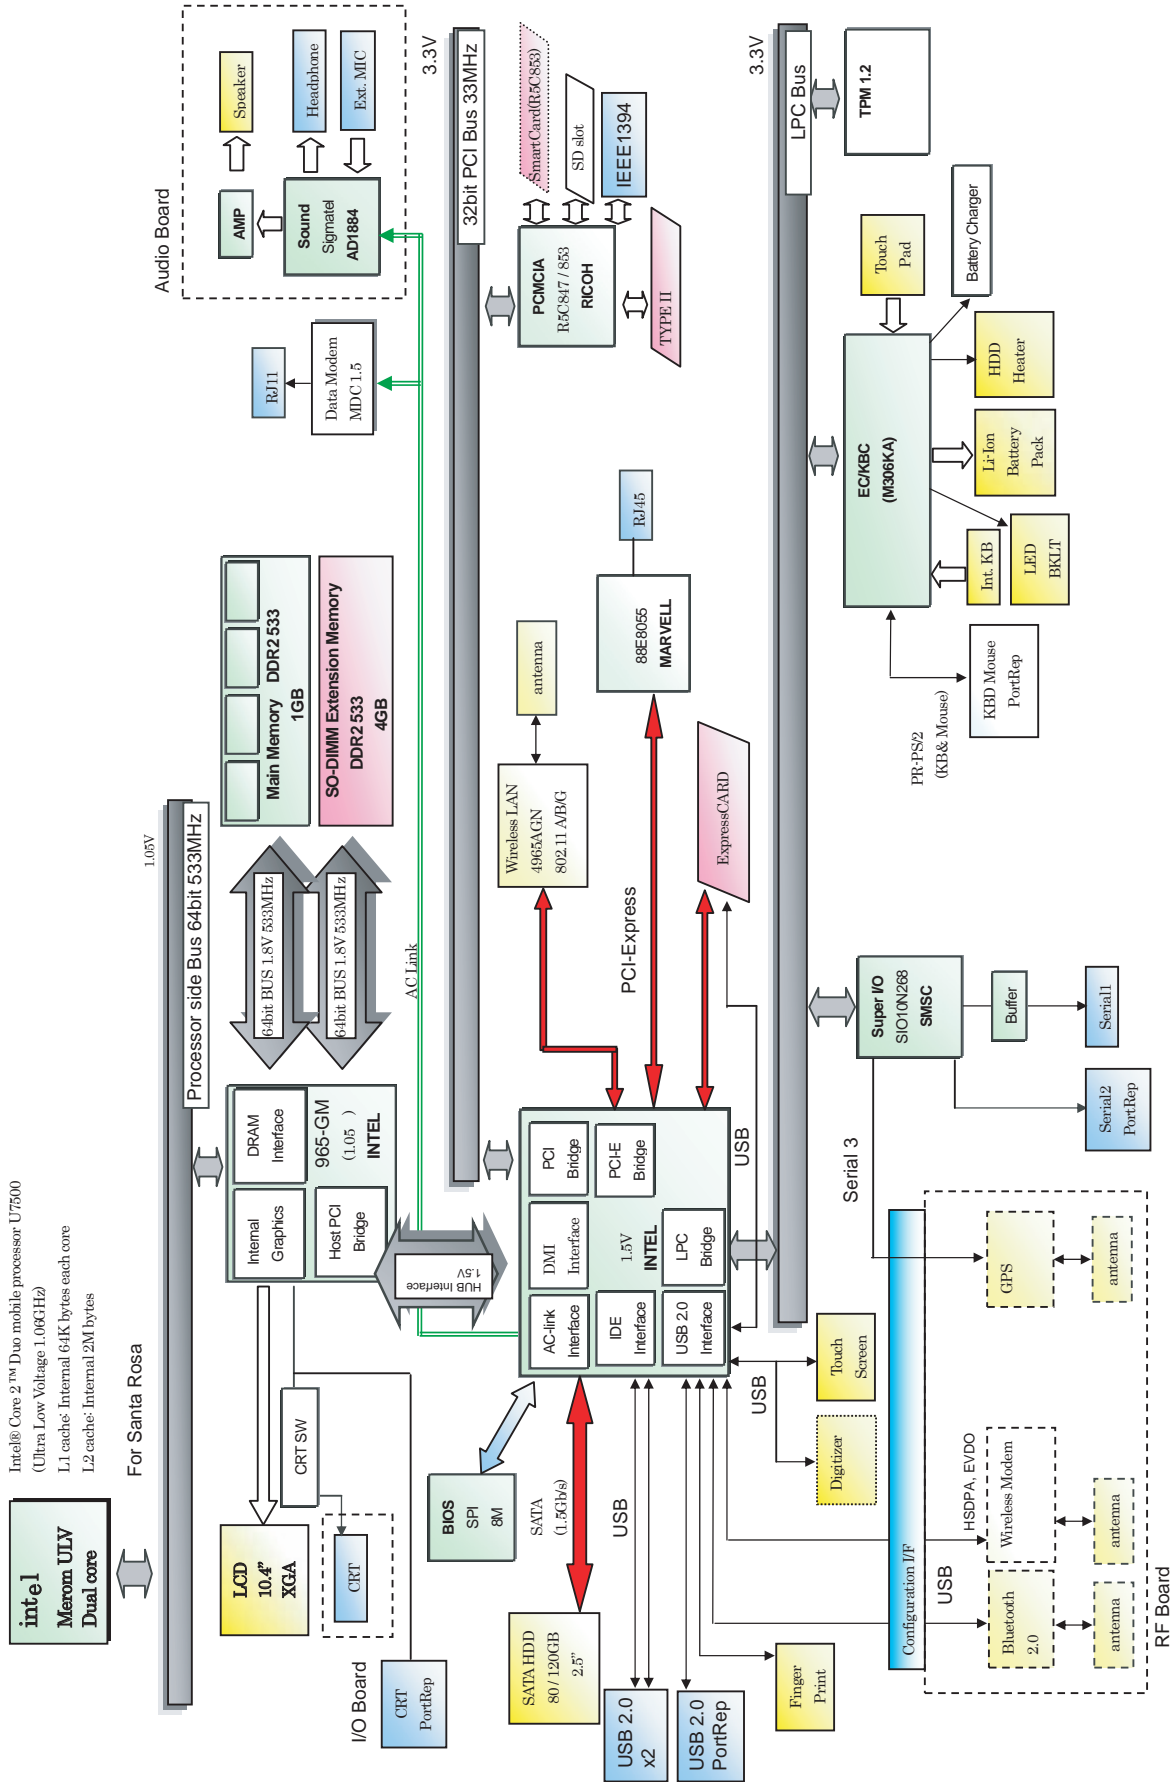

→ Reference Manual "RAM Module"

Q: Expansion Bus Connector

→ Reference Manual "Port Replicator / Car Mounter"

R: External Antenna Connector

4 Diagnosis Procedure

4.1. Basic Procedures

The basic procedures for diagnosis, disassembly, and test of defective parts of a set to be repaired are summarized below. For details, refer to relevant pages in the Service Manual.

● Flow Chart

4.2. Troubleshooting

Please take note of the following two points with regard to troubleshooting:

1. Know-how of diagnosis upon occurrence of heavy troubles, e.g. Set cannot be turned ON, Set fails to start, No display on screen, etc.
2. Explanation of each trouble, mainly symptom of trouble in operation.

Flow Chart

START

Pay attention to the following points when in pursuit of the cause of a troubleshooting.
 1. Peripheral apparatus connected with the set should all be removed before operation check.
 2. Make sure that cables, boards, etc. are not coming off, and recheck the contact condition.

Set cannot be supplied with current.
Power lamp fails to light up.

AC Adaptor/Battery Output voltage

NG → Replace AC Adaptor/Battery

Power lamp check

NO → Check contact condition of power input terminal. Replace if defective.
Check Power SW. Replace if defective.

Dark display on screen.
Screen fails to display.

Inverter board

NG → Replace inverter board.
Check inverter cable continuity. Replace if defective

LCD back light lighting

NO → Replace LCD back light.

LCD unit check

NG → Replace LCD unit.

Failure in starting

BIOS operation check

NO → Replace main board (Check fuse at power source).

Result of POST

NG → Refer to POST error code table. → Replace main board.

Set-up utility starting

NG → Replace main board.

Return set-up utility setpoint to the state of delivery from factory.

HDD access

NO → Check HDD cable connection and continuity. Replace if defective. Replace HDD & Reinstall. Replace main board.

Heavy trouble e.g., Set cannot be turned ON, Set fails to start, No display on screen, etc.

Not displayed properly on screen.

Main board check

NG → Replace main board

Some or all keys cannot be input.

Make sure of contact of K/B connector in use. Replace keyboard or main board.

CD CALL not practicable.

Trouble symptoms on some of CD

NO → Check if there are any flaws on CD media. Since flaws may appear on specific media, CD media can be defective.

Replace main board.

Starts but operates unstably.

Reinstall HDD. Replace main board.

END

Each kind of trouble in operation.

5 Power-On Self Test (Boot Check)

Outline of POST

The set has a boot check function called POST (Power-On Self Test) in it.

The condition of the main body is diagnosed by checking beep sound or error code.

StartTest begins automatically when power switch is set to ON.

Normal finishAfter memory checking, a beep sound is issued once and the set is placed into automatic stop.

Note: If no error occurs, nothing is displayed. (No display of OK, etc.)

Error Diagnosis by Checking Beep Signal Sound

The beep sound is as follows:

(Length of bar shows length of sound.)

■ = long sound (about 0.4 sec.), ■ = short sound (about 0.2 sec.), Length between sounds is about 0.1 sec.

Table of errors classified by beep sounds

Diagnosis	Beep signal sound	Error message
Main board	1(long sound)-2	BIOS ROM error
	1-2-2-3	BIOS ROM error
	1-3-1-1	RAM error
	1-3-1-3	Keyboard controller error
	1-3-4-1	RAM error
	1-3-4-3	RAM error
	1-4-1-1	RAM error
	2-1-2-3	BIOS ROM error
	2-2-3-1	Occurrence of unexpected offering

(Note) A beep sound is also issued in case of other I/O trouble.

6 List of Error Codes <Only when the port replicator is connected>

The following is a list of the messages that BIOS can display. Most of them occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured. Following the list are explanations of the messages and remedies for reported problems. If your system displays one of except the messages marked below with an asterisk (*), write down the message and contact Panasonic Technical Support. If your system fails after you make changes in the Setup menus, reset the computer, enter Setup and install Setup defaults or correct the error.

0200 Failure Fixed Disk

Fixed disk in not working or not configured properly. Check to see if fixed disk is attached properly. Run Setup. Find out if the fixed-disk type is correctly identified.

0210 Stuck key

Stuck key on keyboard.

0211 Keyboard error

Keyboard not working.

0212 Keyboard Controller Failed

Keyboard controller failed test. May require replacing keyboard controller.

0213 Keyboard locked - Unlock key switch

Unlock the system to proceed.

0230 System RAM Failed at offset : *nnnn*

System RAM failed at offset *nnnn* of in the 64k block at which the error was detected.

0231 Shadow RAM Failed at offset : *nnnn*

Shadow RAM failed at offset *nnnn* of the 64k block at which the error was detected.

0232 Extended RAM Failed at offset : *nnnn*

Extended memory not working or not configured properly at offset *nnnn*.

0250 System battery is dead - Replace and run SETUP

The CMOS clock battery indicator shows the battery is dead. Replace the battery and run Setup to reconfigure the system.

***0251 System CMOS checksum bad - Default configuration used**

System CMOS has been corrupted or modified incorrectly, perhaps by an application program that changes data stored in CMOS. The BIOS installed Default SETUP Values. If you do not want these values, enter Setup and enter your own values. If the error persists, check the system battery or contact Panasonic Technical Support.

0260 System timer error

The timer test failed. Requires repair of system board.

0270 Real time clock error

Real-time clock fails BIOS test. May require board repair.

***0280 Previous boot incomplete - Default configuration used**

Previous POST did not complete successfully. POST loads default values and offers to run Setup. If the failure was caused by incorrect values and they are not corrected, the next boot will likely fail. On systems with control of **wait states**, improper Setup settings can also terminate POST and cause this error on the next boot. Run Setup and verify that the wait-state configuration is correct. This error is cleared the next time the system is booted.

0281 Memory Size found by POST differed from EISA CMOS

Memory size found by POST differed from EISA CMOS.

02D0 System cache error - Cache disabled

Contact Panasonic Technical Support.

02F0: CPU ID:

CPU socket number for Multi-Processor error.

02F4: EISA CMOS not writable

ServerBIOS2 test error: Cannot write to EISA CMOS.

02F5: DMA Test Failed

ServerBIOS2 test error: Cannot write to extended DMA (Direct Memory Access) registers.

02F6: Software NMI Failed

ServerBIOS2 test error: Cannot generate software NMI (Non-Maskable Interrupt).

02F7: Fail - Safe Timer NMI Failed

ServerBIOS2 test error: Fail-Safe Timer takes too long.

device address Conflict

Address conflict for specified *device*.

Allocation Error for: *device*

Run ISA or EISA Configuration Utility to resolve resource conflict for the specified *device*.

Failing Bits : *nnnn*

The hex number *nnnn* is a map of the bits at the RAM address which failed the memory test. Each 1 (one) in the map indicates a failed bit. See error 230,231 or 232 for offset address of the failure in System, Extended or Shadow memory.

Invalid System Configuration Data

Problem with NVRAM (CMOS) data.

I/O device IRQ conflict

I/O device IRQ conflict error.

Operating System not found

Operating system cannot be located on either drive A: or drive C:. Enter Setup and see if fixed disk and drive A: are properly identified.

Parity Check 1 *nnnn*

Parity error found in the system bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????. Parity is a method for checking errors in binary data. A parity error indicates that some data has been corrupted.

Parity Check 2 *nnnn*

Parity error found in the I/O bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????.

Press <F1> to resume, <F2> to Setup

Displayed after any recoverable error message. Press <F1> to start the boot process or <F2> to enter a Setup and change the settings. Write down and follow the information shown on the screen.

7 Self Diagnosis Test

As for the self-diagnosis test(PC-Diagnostic utility) to use this model, a standard test and the enhancing test by the module of the main body building in are possible.

Notes To skip BIOS password

Use <Ctrl>+<F10> key to skip BIOS password or authentication of fingerprint.

This key is only for entering DIAG mode. Not available to boot the computer.

If customer set "HDD Lock", the DIAG program cannot perform HDD test.

*This key is for service purpose only. Do not disclose this information to unrelated others.

1. Beginning of self-diagnosis test

1-1. Setting of content of setup

1. The power supply of the computer is turned on.
2. " F2 " is pushed on the screen of "Panasonic" while " press <F2 to enter Setup> " is displayed.
3. The setup utility starts and then takes notes of the content of the BIOS setup of present set.
4. " F9 " is pushed, " Yes" is selected on the screen of " Is the default value loaded? ", and " Enter" is pushed.
5. " F10 " is pushed.
6. " Yes" is selected on the screen of the setup confirmation, and " Enter" is pushed.
7. The computer starts automatically.

Attention

- If the device which can be set is set to "Invalidity" by "Advanced" or "Security" menu, becomes an error by "PC-Diagnostic utility".
(It is judged that the device which can be set to "Invalidity" by "Main" menu such as "Flat pad" is normal if the controller operates normally though sets to "Invalidity" by the setup.)
- In the model with built-in DVD of the USB connection, even if DVD is normal, becomes an error if legacy USB is set to "Invalidity"

1-2. When you execute an automatic test

1. "Ctrl" + "F7" is pushed while the "Panasonic" start screen is displayed after the computer is started.
2. The test of all devices begins automatically by "PC-Diagnostic utility" 's starting.

Attention

- It is a test which the customer who bought PC can execute. (As for HDD, the enhancing test is also possible.)
- A flat pad does not work for a while after starting "PC-Diagnostic utility".
- The movement of a flat pad might become abnormal If after RAM begins from the CPU/System test, a flat pad will be operated in about 30 seconds. In that case, restarts pushing "Alt" + "Ctrl" + "Del" key. Or, please start "PC-Diagnostic utility" again after doing the power supply switch in the slide, and turning off the power supply.

1-3. When you execute the enhancing test

1. Please let me discontinue diagnosing clicking  to end an automatic test.
2. Please click on the character of "D" "PC-Diagnostic utility" on the screen while pushing both of right "Shift" and left "Shift" keys.

3. All devices which can select the enhancing test make the setting of the enhancing test possible.
4. The district device is made "FULL" display (enhancing test).
5. The test begins clicking .

*Please refer to item 4 for the error result of each test and the division of the breakdown part.

2. Operation of PC-Diagnostic Utility

- Only the device which can be inspected on the entire screen is displayed.
- The item does not appear when the device of wireless LAN etc. is not physically connected.
- The movement of the item must use an arrow key or a flat pad.

- As for the device under the diagnosis, blue and yellow are alternately displayed at the left of the icon.
- The diagnosis result of the device greens at the left of the icon when it is normal, and becomes red when abnormal.

- When the test of all devices ends, the test result is displayed under the right of the screen.

- Please click  while diagnosing when being stop on the way by the time the test of all devices ends.
- Please click  when you restart "PC-Diagnostic utility".
- *Each device is tested from the beginning, and it is not possible to restart on the way.
- When the test of all devices ends, the test result is displayed under the right of the screen.

2-1. Selection of tested device

- To test only a specific device, "Test" and "Do not test" of each device can be selected.
- The device which can select the enhancing test changes in order of "The standard is tested" and "Do not test" whenever the device icon is clicked.

Start the standard test

Do not test

Please begin testing clicking  if the selection of the tested device ends.

2-2. "PC-Diagnostic utility" End method

When of "Close" on the right of the screen is clicked, the computer reactivates automatically. Or, the power supply switch is done in the slide and the power supply is turned off.

2-3. The content of the setup is returned to the setting of the user

1. Turned on the computer.
2. "F2" is pushed on the screen while "Press<F2>to enter Setup" is displayed of "Panasonic".
3. Push "F10", and on the screen of "Is the change in the setting preserved and do end?"and then "Yes" is selected, and "Enter" is pushed.
4. The computer reactivates automatically.
5. The end option is chosen by the start menu, and the power supply of the computer is turned off.

Standard at test time

All devices other than RAM and HDD ----- about 1 minute
RAM standard test ----- 1 - 2 minutes
HDD standard test ----- 2 - 3 minutes
HDD enhancing test (60GB) ----- about 40 minutes

Ex.The standard when the standard <all device> is tested becomes $1+2+3=6$ minutes.

There is greatly a difference from RAM test when the memory is increased according to the performance of the memory occasionally.

Moreover, when the main body of PC under the test is a high temperature, it occasionally takes time.
There is greatly a difference from HDD according to the performance of the drive occasionally.

3. Test Item and Division of trouble

Test item	Standard	Enhancing	Content of standard test	Content of enhancing test	Place with possibility of breakdown
CPU / SYSTEM	○	—	CPU is shifted to protected mode, and "Violation of the paging", "Operation of the violation of a privileged instruction", and DMA, INT, TIMER, and the RTC operation are confirmed.	—	CPU / Main board
RAM	○	—	All memory space is tested in a special memory access pattern based on "R.S.T . technology".	—	Memory / Mainboard
HDD	○	○	The record area frequently accessed with Microsoft Windows XP to test in about two minutes regardless of points of HDD is emphatically tested.	All record area is tested.	HDD / Mainboard / Cable / Connector
MODEM	○	—	It is confirmed not to find abnormality in the AC97 modem controller.	—	MODEM/ Mainboard
Wireless LAN	○	—	It is confirmed not to find abnormality in the Wireless LAN modem controller.	—	Wireless LAN board / Connector / Mainboard
Sound *5	○	—			
USB	○	○ ^{*1}	It is confirmed not to find abnormality in the USB controller.	It is confirmed not to find abnormality in the wiring between the USB controller and the connector by confirming the connection of the USB equipment connected with the USB connector.	Mainboard / Connector
LAN	○	○ ^{*2}	It is confirmed not to find abnormality in the LAN controller.	It is confirmed not to find abnormality in the wiring between the controller and the connector by connecting to HUB with LAN cable.	Mainboard / Connector
PC Card	○	—	It is confirmed not to find abnormality in the CardBus controller.	—	Mainboard
SD	○	—	It is confirmed not to find abnormality in the SD controller.	—	Mainboard
Keyboard	○	○ ^{*3}	It is confirmed not to find abnormality in keyboard controller's keyboard interface.	The key is actually input, and the operation is displayed on the screen.	Mainboard / Keyboard
Touch Pad	○	○ ^{*4}	Whether keyboard controller's mouse interface operates normally is confirmed.	The operation is actually displayed on the screen by operating the touch pad.	Mainboard / Touch Pad
DVD-ROM	○	○ ^{*6}	The drive is normally reset, and it is accessible is confirmed.	It is confirmed to be able to read media normally.	Mainboard / DVD Drive / DVD Cable / DVD Connector

Test Item	Standard	Enhanced	Content of Standard Test	Content of Extend Test	The place with possibility of breakdown
Touch Screen	○	○	It is confirmed not to find abnormality in the USB connection of Touch Screen. This test cannot find abnormality of Touch Screen.	Perform Touch Screen functionality practically. Operator has to judge PASS/FAIL with test result.	Main board/ Touch Screen
Bluetooth	○		It is confirmed not to find abnormality in the connection of Main board and Bluetooth module.	—	Bluetooth cable
Wireless WAN	○	—	It is confirmed not to find abnormality in the connection of Main board and Wireless WAN module.	—	WWAN cable
Floppy	○	—	It is confirmed not to find abnormality in the legacy FD drive. This test cannot find abnormality of mechanical breakdown. (e.g., Head, Motor)	—	FD Drive/ Main board (Super I/O)/ FDD cable FDD connector
Video	○	—	It is confirmed not to find abnormality in access to VRAM with VESA. The PC which uses main memory as VRAM may fail with main memory failure.	—	Main board (Chipset, Graphic Controller)/ Memory
GPS	○	—	It is confirmed not to find abnormality in the connection of Main board and GPS	—	GPS cable
IEEE1394	○	—	It is confirmed not to find abnormality in the IEEE1394 controller.	—	Main board (IEEE1394 Controller)
Express Card	—	○	—	It is confirmed not to find abnormality in the wiring between Chipset and Express Card.	Main board (Chipset)/ Express Card Connector
Smart Card	○	—	It is confirmed not to find abnormality in the Smart Card controller.	—	Main board (Smart Card Controller)
Serial Port	○	○ *7	It is confirmed not to find abnormality of Super I/O UART function. This test cannot find lack of wiring between Super I/O and Serial Connector.	It is confirmed not to find abnormality in the wiring between Super I/O and Serial Connector. This test cannot find failure of cable characteristic and device problems.	Main board (Super I/O)/ Serial Connector
Parallel Port	○	○ *8	It is confirmed not to find abnormality of Super I/O parallel function. This test cannot find lack of wiring between Super I/O and Parallel Connector.	It is confirmed not to find abnormality in the wiring between Super I/O and Parallel Connector. This test cannot find failure of cable characteristic and device problems.	Main board (Super I/O)/ Parallel Connector

*1 Please connect the USB device with the port (USB connector) which wants to test before the tests.

*2 Please connect LAN port with LAN HUB with LAN cable before the tests.

*3 The operator actually inputs the key, and the operator judges PASS/FAIL of the test.

*4 The operator actually operates the mouse, and the operator judges PASS/FAIL of the test.

*5 It is not abnormal though the sound is emitted from the speaker while testing.

※ When the test result is PASS, trouble is thought by not hearing of the sound under the test from the speaker and the headphone by the wiring of the audio output system.

*6 Please set DVD/CD media in the drive before the tests.

*7 Please set a Special Loop Back Connector Tool at serial connector for Enhanced Test. (This Connector Tool is same as the one used before.)

*8 Please set a Special Loop Back Connector Tool at parallel connector for Enhanced Test. (This Connector Tools is same as the one used before.)

8 Wiring Connection Diagram

9 Disassembly/Reassembly

Note:

Power off the computer. Do not shut down to the Suspend or hibernation mode.

Do not add peripherals while the computer is in the Suspend or hibernation mode; abnormal operation may result.

9.1. Disassembly Instructions

9.1.1. Preparation

Before disassembling, be sure to make the following preparations.

- Shut down Windows and turn off the power.
- Disconnect the AC adaptor.
- Remove the optional DIMM memory card and PCMCIA card if they are connected.
- Remove other devices if they are connected.

Attention:

- Please execute writing BIOS ID when you exchange the Main Board.
- Parts (Sheet and rubber) etc. related various the Conductive Cloth and Heat Spreader cannot be recycled. Use new parts.

9.1.2. Removing the Battery Pack and HDD Pack

1. Open the Battery Cover.
2. Remove the Battery Pack.
3. Open the HDD Cover.
4. Remove the HDD Pack.

5. Remove the two Screws <N13>.
6. Remove the HDD Case A and the HDD Case B.
7. Remove the HDD

Screws <N13> : DXQT2+D4FNL

9.1.3. Removing the Touch Pad and Keyboard

1. Remove the Palm Rest Ass'y.

Note:

The Palm Rest Ass'y is firmly fixed with two-sided tape.

Carefully remove the Palm Top Cover Sheet not to damage it.

2. Remove the 4 Screws <N9>.
3. Remove the KBD Plate.

4. Lift the far side of the Keyboard and slide it to backward, and then turn the Keyboard over frontward.

5. Remove the 3 Screws <N1>.
6. Remove the KBD Connector Cover.

7. Disconnect the Cable from Connector (CN18).
8. Remove the Keyboard.
9. Remove the TP Tape.

10. Disconnect the Cable from Connector (CN800).
11. Remove the Touch Pad and Click Button Plate.

Screws <N1> : DFHE5025XA
Screws <N9> : DRSB2+5FKL

9.1.4. Removing the DIMM Lid Ass'y

1. Remove the 4 Screws <K14-8>.
2. Remove the DIMM Lid Ass'y.

Screws <K14-8> : DRHM5025YAT

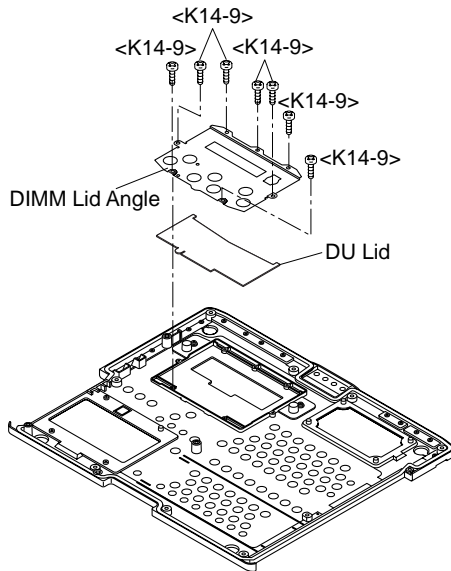

9.1.5. Removing the Rear Cabinet

1. Remove the 13 Screws <N10>.
2. Open the LID Rubbers.
3. Remove the Rear Cabinet.

Screws <N10> : DRHM0061ZA

9.1.6. Removing the DU Lid Unit

1. Remove the 7 Screws <K14-9>.
2. Remove the DU Lid Angle and DU Lid.

Screws <K14-9> : DXQT2+D25FNL

9.1.7. Removing the HSDPA PCB and Bluetooth PCB

1. Remove the Cable Holder Cushion.
2. Disconnect the 2 Antenna Cables (brown, black).
3. Remove the Tape.
4. Remove the 4 Screws. <N9>
5. Disconnect the Cable from the Connector (CN600).

6. Disconnect the Antenna Cable from the Clamper.
7. Disconnect the Antenna Cable.
8. Remove the 4 Screws. <N19>
9. Disconnect the Cable from the Connector (CN604).
10. Remove the 2 Screws. <N19>
11. Disconnect the Cable from the Connector (CN1) and remove the Bluetooth PCB and HSDPA PCB.

Screws <N9> : DRSB2+5FKL

Screws <N19> : XSB2+3FNL

9.1.8. Removing the Audio PCB

1. Remove the 3 Screws <N9>.
2. Disconnect the Cable from a Connector (CN901).
3. Remove the Audio PCB.

Screws <N9>:DRSB2+5FKL

9.1.9. Removing the Main PCB, Wireless Module, SD PCB, Antenna PCB and Modem PCB

Note:

This procedure is not necessary if the computer is not equipped with Wireless Module or Modem PCB.

1. Disconnect the 2 LCD Cables. (CN8,CN17)

5. Remove the 2 Screws <N8>, and remove the HDD Connector Guide.
6. Remove the 2 Screws. <N9>
7. Disconnect the Cable from the Connector. (CN15)
8. Remove the BAT FPC Ass'y.
9. Remove the 3 Screws. <N19>
10. Disconnect the Cable from the Connector (CN21), and remove the SD PCB Ass'y.

2. Remove the gray, black and white Antenna Cables.
3. Remove the 2 Screws <N3> and the 3 Screws <N9>.
4. Remove the 2 screws <N3>, and remove the DU PCB, Plate and Antenna PCB.

11. Disconnect the Cable from the Connector (CN3), and remove the Coin Battery.
12. Remove the 2 Screws <N19>, and remove the Wireless Module.
13. Remove the 2 Screws <N19>, and remove the Modem PCB.

14. Remove the 2 Screws <N19>, and remove the DIMM Holder.

15. Remove the Tape.
16. Disconnect the 3 Cables from the 3 Connectors. (CN9,CN14,CN23)
17. Remove the 7 Screws <N19>, and remove the Main PCB and Combo Socket.

Screws <N3> : DFHE5108ZA
 Screws <N8> : DRSB2+10FKL
 Screws <N9> : DRSB2+5FKL
 Screws <N19> : XSB2+3FNL

9.1.10. Removing the I/O PCB Ass'y

1. Remove the 4 D-SUB Screws <N2>.
2. Remove the 2 Screws <N9>.
3. Remove the I/O PCB Ass'y.

Screws <N2> : DFHE5058ZB
 Screws <N9> : DRSB2+5FKL

9.1.11. Removing the Power SW PCB

1. Remove the Screw <N1>.
2. Disconnect the Cable from the Connector (CN9).
3. Remove the Power SW PCB.

Screw <N1> : DFHE5025XA

9.1.12. Removing the left LED and right LED PCB

1. Remove the two Release Papers.
2. Disconnect the Cable from the Connector (CN806).
3. Remove the left LED PCB.
4. Disconnect the Cable from the Connector (CN801).
5. Remove the right LED PCB.

9.1.13. Removing Pad PCB and SW PCB

1. Disconnect the 2 Cables from the 2 Connectors (CN805,CN807).
2. Remove the 4 Screws <N1>.
3. Remove the Pad PCB.

4. Remove the Operation Sheet and the SW PCB.

Screws <N1> : DFHE5025XA

9.1.14. Removing the Display unit

1. Remove the 4 Screws <N1>.
2. Remove the LCD Hinge Cover.

3. Display unit is half-rotated and removes the 2 Screws <N9>.

4. Remove the 4 Screws <N18>.
5. Turn the computer over.
6. Remove the Display Unit.

Screws <N1> : DFHE5025XA

Screws <N9> : DRSB2+5FKL

Screws <N18> : DXYN4+J7FNL

9.1.15. Removing the LCD Rear Case

1. Remove the 8 Screws <N7> on the front side of Display unit.
2. Remove the 8 Screws <N7> on the back side of Display unit.
3. Remove 2 Antenna Covers and Tablet Latch Cover.
4. Remove the 10 Screws <N15>.
5. Remove the 2 Screws <N16>.
6. Remove the LCD Rear Case.

Screws <N7> : DRQT26+E5FKL

Screws <N15> : DXYN2+J6FNL

Screws <N16> : DXYN3+J10FNL

9.1.16. Removing the LCD Hinge

1. Remove the Cable Holder.
2. Remove the 2 Screws <N17>.
3. Remove the Cable Holder Plate and LCD Hinge.

Screws <N17> : DXYN3+J8FNL

9.1.17. Removing Inverter PCB and LCD Unit

1. Disconnect the 2 Cables from 2 Connectors (CN1,CN2).
2. Remove the Inverter Case and Inverter PCB.
3. Disconnect the 2 Cable from 2 connector (CN900,CN901).
4. Remove the TS PS2 PCB, then remove the LCD unit.

9.1.18. Removing WWAN Main Antenna PCB, LAN-Main BT Antenna PCB, LAN AUX Antenna PCB and WWAN AUX Antenna PCB

1. Remove the 2 Screws <N1>.
2. Remove the WWAN Main Antenna PCB.
3. Remove the 2 Screws <N1>.
4. Remove the LAN-Main BT Antenna PCB.
5. Remove the 2 Screws <N1>.
6. Remove the LAN AUX Antenna PCB.
7. Remove the 2 Screws <N1>.
8. Remove the WWAN AUX Antenna PCB.
9. Remove the Pen
10. Remove the two Screws <N6>.
11. Remove the Pen Holder.

Screws <N1> : DFHE5025XA

Screws <N6> : DRHM5025YA

9.1.19. Removing the Each Cover

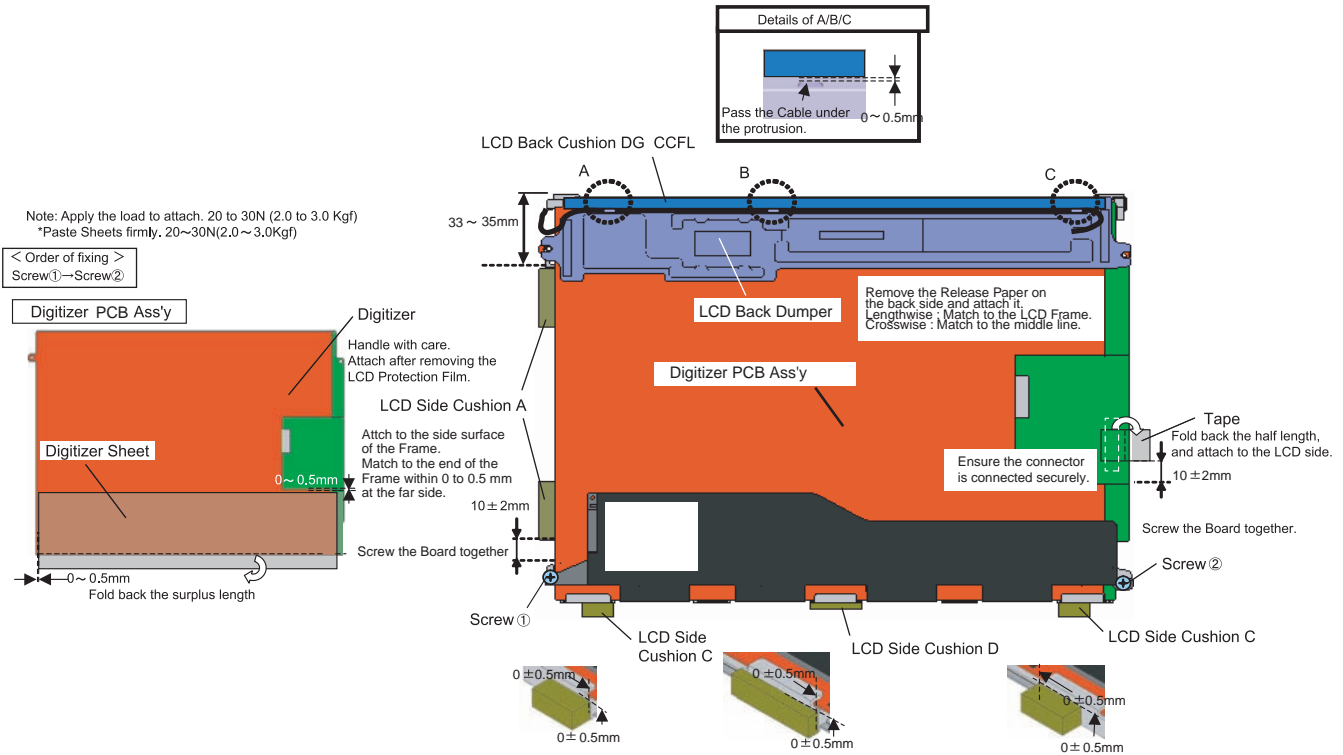

1. Remove the 14 Screws <N6>.
2. Remove the Modem/LAN LID Rubber, LAN LID Rubber, USB LID Rubber, DC IN LID Rubber, Serial LID Rubber, RGB LID Rubber, Audio LID Rubber and USB Back Rubber.
3. Remove the Rear Cabinet.
(Refer to 7.1.5 Removing the Rear Cabinet)
4. Remove the 6 Screws <K12-16>.
5. Remove the Battery LID ASS'Y, HDD LID Ass'y and PCMCIA LID Ass'y.

Screws <K12-16> : DRQT26+D3FKL

Screws <N6> : DRHM5025YA

■ Assembly of LCD Back Damper (Application Model : Digitizer Model)

■ Assembly of Inverter PCB

■ Assembly of Inverter PCB (Applicable Model : Touch Screen Model)

■ Assembly of Inverter PCB (Application Model : Digitizer Model)

■ Assembly of Glass (Applicable Model : Digitizer Model)

(Note)
Apply the load 20 to 30N (2.0 to 3.0 Kgf) to the Cushions.

9.2.3. Assembling the WWAN Main Antenna PCB, LAN-Main BT Antenna PCB, LAN AUX Antenna PCB, WWAN AUX Antenna PCB and Pen holder

1. Fix the Pen Holder using the 2 Screws. <K10-1-13>
2. Attach the Pen.
3. Fix the WWAN AUX Antenna PCB using the 2 Screws. <N1>
4. Fix the LAN AUX Antenna PCB using the 2 Screws. <N1>
5. Fix the LAN-Main BT Antenna PCB using the 2 Screws. <N1>
6. Fix the WWAN Main Antenna PCB using the 2 Screws. <N1>

Screws <N1> : DFHE5025XA

Screws <K10-1-13> : DRHM5025YAT

Line Processing of Antenna Cable

9.2.4. Setting up the LCD Hinge

1. Wind the Cable coming out of the LCD Unit counterclockwise to the LCD Hinge.
2. Set the Lock Plate and the Hinge Top Cover, and rotate the LCD Hinge to turn the Display Unit to front
3. Put the LCD Cable and the Antenna Cable in the Cable Holder.
4. Fit another Cable Holder and clamp the Cable Holders in the LCD Hinge.
5. Fix the LCD Hinge using the 2 Screws <N17> and the 2 Cable Holder Plates.

Screws <N17 > : DXYN3+J8FNL

■ Assembly of LCD Hinge

If you arrange the Cable in the ※ area, you do not need to use the fixing jig.

Safety Working

CAUTION S1:Insulation S2:Pinching Cables S3:Sharp Edge
S4:Part No. Check S5:Others

Avoid catching the Cable (when repairing or when not using the jig).
Temporarily fix the both sides ("A") of the Hinge using the Screw, and fix the Cable Hold Plate.
After fixing the Cable Hold Plate, remove the screws from the both sides ("A").

Line Processing of Antenna Cable and LCD Cable

Safety Working

CAUTION S1:Insulation S2:Pinching Cables S3:Sharp Edge

■ Assembly of LCD Rear Case (Applicable Model : Touch Screen Model)

- (Note)
- Arrow without specified measurement: 0 to 0.5 mm
 - Allowable right/left displacement of the Cushion: max. 0.5 mm
 - Attach and apply the load 30 to 40N (3.0 to 4.0 Kgf).

■ Assembly of LCD Rear Case (Applicable Model : Digitizer Model)

- (Note)
- Arrow without specified measurement: 0 to 0.5 mm
 - Allowable right/left displacement of the Cushion: max. 0.5 mm
 - Attach and apply the load 30 to 40N (3.0 to 4.0 Kgf).

■ Assembly of Tablet Latch Cover and Antenna Cover

9.2.6. Setting the Display Unit

1. Fix the Display Unit using the 2 Screws <N9>.
2. Close the Display Unit and turn the computer over, then fix the Display Unit using the 4 Screws <N18>.

3. Turn the computer over and fix the LCD Hinge Cover using the 2 Screws <N1>.

4. Open the Display Unit and fix the LCD Hinge Cover using the 2 Screws <N1>.

Screws <N1> : DFHE5025XA
Screws <N9> : DRSB2+5FKL
Screws <N18> : XYN4+J7FNL

■ Assembly of Display Unit

9.2.7. Setting the Pad PCB and SW PCB

1. Attach both the SW PCB and the Operation Sheet to the Cabinet.

2. Connect the 3 Cables to the 3 Connectors.
(CN800,CN805,CN807)
3. Fix the Pad PCB using the 4 Screws. <N1>

Note:

Tighten the Screws in the numbered order (No1 to No4).

Screws <N1> : DFHE5025XA

■ Assembly of the Pad PCB and SW PCB

(Note) • Arrow without specified measurement: 0 to 0.5 mm

■ Putting of the TP Bottom Tape

9.2.8. Setting the left LED PCB and right LED PCB

1. Connect the Cable to the Connector. (CN806)
2. Fix the left LED PCB.
3. Connect the Cable to the Connector. (CN801)
4. Fix the right LED PCB.
5. Attach the two Release Papers.
6. Attach the Palm Rest Ass'y.

■ Assembly of the left LED PCB and right LED PCB

9.2.9. Setting the Power SW PCB

1. Connect the Cable to the Connector. (CN9)
2. Fix the Power SW PCB using the Screw. <N1>

Screws <N1> : DFHE5025XA

■ Assembly of the Power SW PCB

(Note) Arrow without specified measurement: 0 to 0.5 mm

9.2.10. Setting the I/O PCB Ass'y

1. Fix the I/O PCB using the 2 Screws. <N9>
2. Fix the I/O PCB using the 4 Screws. <N2>

Screws<N2> : DFHE5058ZB

Screws<N9> : DRSB2+5FKL

9.2.11. Setting the Main PCB, Wireless Module, SD PCB, DU PCB, Antenna PCB and Modem PCB

1. Fix the Main PCB using the 7 Screws <N19>.
2. Connect the 3 Cables to the 3 Connectors.
(CN9,CN14,CN23)
3. Attach the Tape.

4. Fix the Modem PCB using the 2 Screws <N19>.
5. Fix the Wireless Module using the 2 Screws <N19>.
6. Fix the DIMM Holder using the 2 Screws <N19>.
7. Attach the Cable to the Connector (CN3) and attach the Coin Battery.

8. Fix the SD PCB Ass'y using the 3 Screws <N19>.
9. Attach the Cable to the Connector (CN21).
10. Hook the Flex Cable on the DIMM Holder, and turn 90 degrees.
11. Fix the BAT FPC Ass'y using the 2 Screws <N9>.
12. Connect the cable to the Connector. (CN15)
13. Fix the HDD Connector Guide using the 2 Screws <N8>.

14. Fix the DU PCB and the Plate using the 2 screws <N3>.
15. Fix the DU PCB Ass'y and Antenna PCB using the 3 screws <N9> and the 2 screws <N3> .
16. Connect the white, black and gray Cables.

17. Turn the computer over, open the Display Unit, and then connect the 2 LCD Cables. (CN8,CN17)

Note:
Tighten the Screws in the numbered order (No1 to No7).

- Screws <N3> : DFHE5108ZA
- Screws <N8> : DRSB2+10FKL

9.2.12. Setting the Audio PCB

1. Connect the Cable to the Connector. (CN901)
2. Fix the Audio PCB using the 3 Screws. <N9>

Note:

Tighten the Screws in the numbered order (No1 to No3).

Screws <N9> : DRSB2+5FKL

9.2.13. Setting the HSDPA PCB and Bluetooth PCB

1. Fix the Plate and Bluetooth PCB using the 2 Screws <N19>.
2. Connect the Cable to the Connector. (CN1)
3. Connect the Cable to the Connector. (CN604)
4. Fix the Plate and the Board using the 4 Screws <N19>.
5. Attach the blue Antenna Cable to the Clamper.

6. Connect the Cable to the Connector. (CN600)
7. Fix the RF PCB Ass'y using the 4 Screws. <N9>
8. Attach the Tape.
9. Attach the brown and black Antenna Cables.
10. Attach the Cable Holder Cushion.

Screws <N9> : DRSB2+5FKL
 Screws <N19> : XSB2+3FNL

Line Processing of Antenna Cable of Main Unit

Cable Process 1/3

Safety Working

CAUTION

S1:Insulation S2:Pinching Cables S3:Sharp Edge
S4:Part No. Check S5:Others

Cable Process 2/3

After processing the cables, inserting the FPC and locking, incline the Audio PCB into the arrow direction.

After confirming the cable is not under the AUDIO PCB (processed at the Step 4), tighten the Screws. Because there is a possibility that the cable is scissored between PCB and the both.

Process the grey cable to the same direction with the brown cable

If the fixing is not incorrected, there is possibility that the cable is scissored between the PCB and the both.

Cable Process 3/3 ①

9.2.14. Assembling the DU Lid Unit

1. Fix the DU Lid Angle and the DU Lid using the 7 Screws.
<K14-9>

Screws <K14-9> : DXQT2+D25FNL

9.2.15. Setting the Rear Cabinet

1. Fix the Rear Cabinet on the Computer using the 13 Screws. <N10>
2. Close the Lid Covers.

Note:

Tighten the Screws in the numbered order (No1 to No13).

Screws <N10> : DRHM0061ZA

■ Cautions for Setting the Rear Cabinet

(Note) Arrow without specified measurement: 0 to 0.5 mm

9.2.16. Setting the DIMM Lid Ass'y

1. Fix the DIMM Lid Ass'y using the 4 Screws. <K14-8>

Screws <K14-8> : DRHM5025YAT

9.2.17. Setting the Touch Pad and Keyboard

1. Connect the Cable to the Connector (CN800), and attach the Touch Pad to the computer.
2. Set the Click Button Plate.
3. Attach the new TP Tape over the Touch Pad.
4. Attach the Palm Rest Ass'y on the computer.

5. Connect the Cable of the Keyboard to the Connector (CN18) on the Main PCB.
6. Fix the KBD Connector Cover using the three Screws. <N1>

7. Set the Keyboard to the computer.

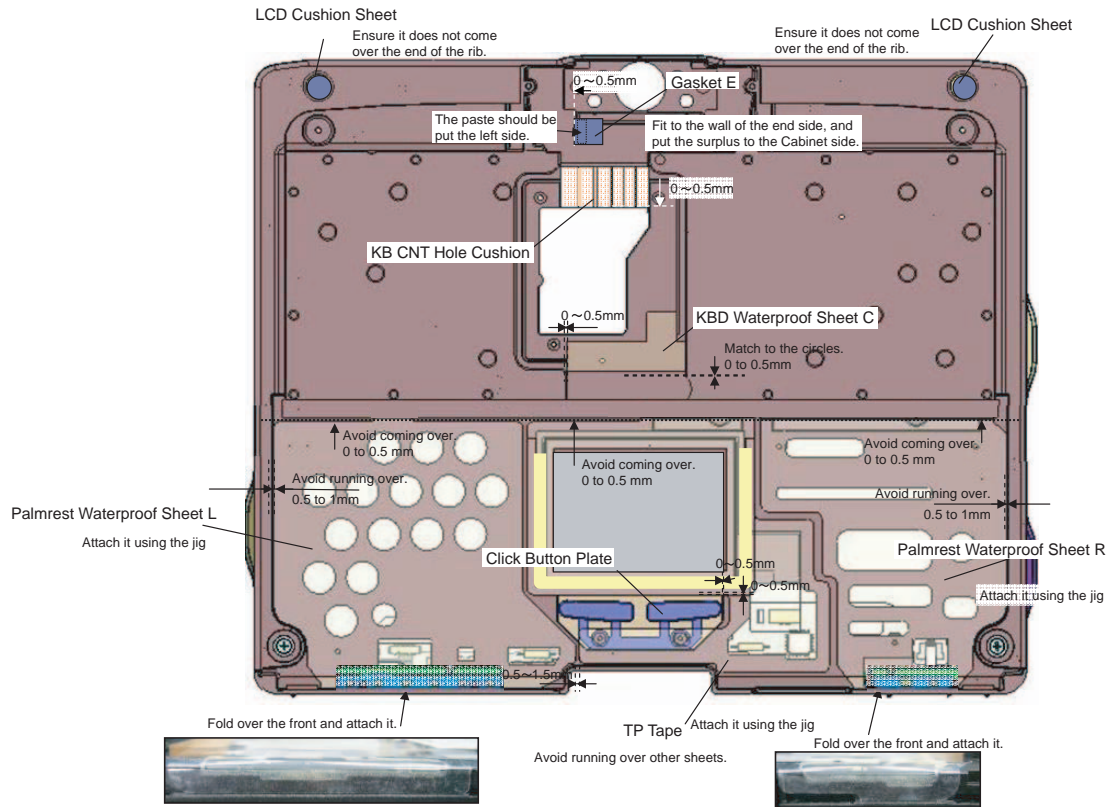

8. Fix the KBD Plate using the four Screws. <N9>

Screws <N1> : DFHE5025XA

Screws <N9> : DRSB2+5FKL

■ Putting of the Sheet

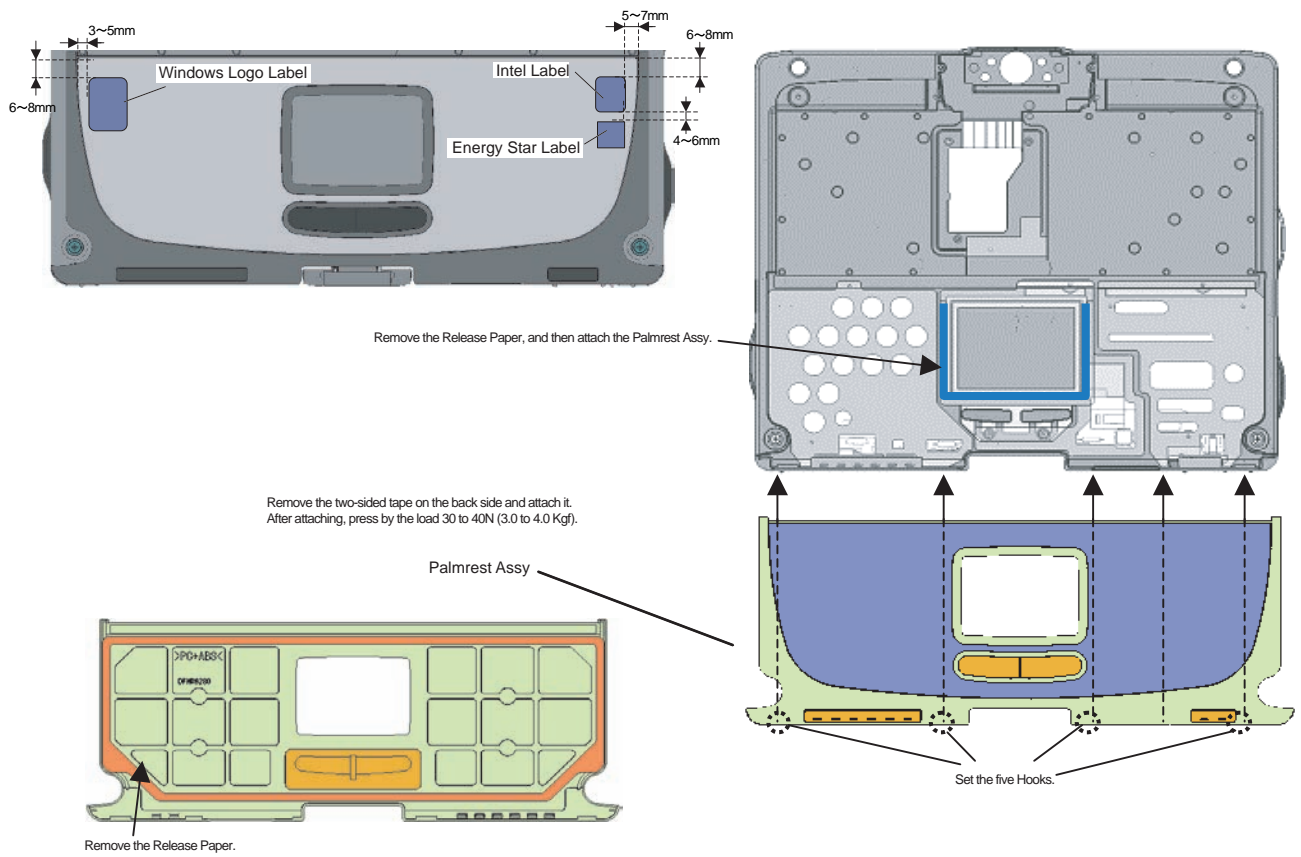

Because the sheets described on this page are waterproof sheets, the whole parts should be put pressure after attaching. (Especially, put pressure around the sheets.)

*Apply the load to attach. 30 to 40N (3.0 to 4.0Kgf)

■ Cautions for Setting the Keyboard

■ Putting of the Palm Rest ASSY

■ Putting of the KBD Tape

9.2.18. Setting the Battery Pack and the HDD Pack

1. Set the HDD in the HDD Case and fix it using the 2 Screws. <N13>

2. Open the HDD Cover and set the HDD Pack.
3. Open the Battery Cover and set the Battery.

Screws <N13> : DXQT2+D4FNL

■ Assembly of the HDD ASSY

Safety Working

9.2.19. Assembling the Each Cover

1. Fix the Battery LID Ass'y, the HDD LID Ass'y, and the PCMCIA LID Ass'y using the 6 Screws. <K12-16>
2. Set the Rear Cabinet.
3. Fix the Modem/LAN LID Rubber, the LAN LID Rubber, the USB LID Rubber, the DC IN LID Rubber, the Serial LID Rubber, the RGB LID Rubber, the Audio LID Rubber and USB Back Rubber using the 14 Screws. <N6>

Note:

Tighten the Screws in the numbered order (No1 to No14).

Screws <K12-16> : DRQT26+D3FKL

Screw <N6> : DRHM5025YA

Screw tightening torque

Replacement Parts List

Note: Important Safety Notice

Components identified by  mark have special characteristics important for safety.

When replacing any of these components use only manufacturer's specified parts.

CF-19FHGAXxM

REF. NO and AREA	PART NO.	DESCRIPTION	Q'TY
MAIN PCB			
C 1, 135, 136, 137, 197, 198, 268, 279, 281, 328, 376	F1J0J4750019	CAPACITOR, 6.3V, 4.7μF	11
C 2, 3, 4, 5, 6, 9, 50, 51, 55, 56, 57, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 152, 153, 154, 155, 159, 161, 163, 165, 168, 169, 170, 171, 174, 176, 178, 180, 185, 187, 190, 205, 206, 230, 231, 232, 233, 234, 235, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 272, 282, 283, 289, 290, 300, 301, 302, 309, 313, 314, 316, 317, 318, 320, 323, 327, 334, 346, 351, 356, 375, 393, 394, 396, 397, 398, 399, 400, 401, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 415, 416, 417, 418, 419, 420, 421, 424, 428, 429, 432, 439, 450, 451, 453, 454, 459, 460, 461, 462, 463, 470, 471, 472, 488, 490, 500, 501, 502, 503, 507, 508, 510, 512, 513, 514, 516, 520, 521, 522, 523, 524, 601, 607, 642, 646, 656, 698	F1G1C104A042	CAPACITOR, 16V, 0.1μF	154
C 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 45, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 158, 160, 162, 164, 173, 175, 177, 179, 186, 189, 249, 250, 251, 252, 253, 254, 288, 319, 344, 345, 347, 370, 371, 372, 378, 379, 380, 381, 437, 473, 511, 515, 723, 742, 743	F1J0J106A016	CAPACITOR, 6.3V, 10μF	81
C 42, 78, 79, 80, 81, 83, 247, 248	EEFCX0D221R	CAPACITOR, 2V, 220μF	8
C 46, 306, 307, 325, 422, 431, 433, 489, 491, 492, 616, 628, 631, 635, 653, 655, 657, 669, 686, 688, 693, 706, 713, 754, 755, 756, 757, 758	F1G1H102A496	CAPACITOR, 50V, 1000pF	28
C 58, 59, 138, 139, 140, 141, 142, 143, 144, 145, 150, 157, 166, 181, 199, 200, 201, 202, 203, 204, 269, 270, 271, 388, 509	F1H0J1050022	CAPACITOR, 6.3V, 1μF	25
