About this Manual

This manual is intended for service personnel who have completed sufficient training to undertake the maintenance and inspection of personal computers.

It is organized to allow you to look up basic information for servicing and/or upgrading components of the notebook PC.

The following information is included:

Chapter 1, Introduction, provides general information about the location of system elements and their specifications.

Chapter 2, Disassembly, provides step-by-step instructions for disassembling parts and subsystems and how to upgrade elements of the system.

Appendices A, Part Lists

Appendices B, Schematic Diagrams

Related Documents

You may also need to consult the following manual for additional information:

User's Manual on CD

This describes the notebook PC's features and the procedures for operating the computer and its ROM-based setup program. It also describes the installation and operation of the utility programs provided with the notebook PC.

Chapter 1: Introduction

Overview

This manual covers the information you need to service or upgrade the **D800P** series notebook computer. Information about operating the computer (e.g. getting started, and the *Setup* utility) is in the *User's Manual*. Information about drivers (e.g. VGA & audio) is also found in *User's Manual*. That manual is shipped with the computer.

Operating systems (e.g. *Windows 2000* & *Windows XP*) have their own manuals as do application software (e.g. word processing and database programs). If you have questions about those programs, you should consult those manuals.

The D800P notebook is designed to be upgradeable. See **“Disassembly” on page 2 - 1** for a detailed description of the upgrade procedures for each specific component. Please note the warning and safety information indicated by the “

The balance of this chapter reviews the computer's technical specifications and features.

System Specifications

Table 1 - 1
**D800P
 System
 Specifications**

Feature	Specifications D800P
Processor Types	Intel Pentium 4 Processor - (478-pin) mFC-PGA2 package supporting Hyper Threading Technology (μ0.13) 0.13 Micron Process Technology, 512K L2 Cache & 800MHz FSB 2.40/ 2.60/ 2.80/ 3.00/ 3.20 GHz
Core Logic	Intel® 865PE + ICH5
Structure	Fully PC2001 Compliant ACPI 1.0B Compliant PC2001 Compliant
Security	Security (Kensington® Type) Lock Slot BIOS Password
Memory	64 bit data bus system memory Two 200-pin DDR SODIMM sockets, supporting Dual DDR SDRAM SODIMM (2.5V) - DDR400MHz or DDR333MHz compliant DDR 400MHz memory expandable to 1GB (compatible with 256/512 MB SODIMM Modules) DDR 333MHz memory expandable to 2GB (compatible with 256/512/1024 MB SODIMM Modules)
BIOS	One 512KB Flash ROM Phoenix BIOS with Smart Battery Plug and Play (1.0a), ACPI 1.0B
LCD Options	16.0" 1280 x 1024 SXGA TFT 15.0" 1600 x 1200 UXGA TFT
Display	ATI Radeon 9600 PRO High Performance Chip 128MB DDR Graphic Memory On Board UltraAGP™ 8x 128-bit 2D/3D Graphics Engine Motion Compensation and IDCT for DVD Content Playback Accelerator Fully DirectX 9 Compliant Graphics Engine

Feature	Specifications D800P
Audio	Virtual 6-Channel Audio Output AC'97 2.2 Compliant Interface Compatible with Sound-Blaster PRO™/ 16 Advanced Wavetable Synthesizer Direct Sound™ 3D Accelerator Full Duplex Virtual AC3 S/PDIF Digital Output (5.1 CH) for DVD content and Stereo Audio Built-In Microphone Audio DJ 2 Built-In Speakers
Interface	Built-in TouchPad (PS/2) Four USB 2.0 Ports (USB 1.1 compatible) One IEEE 1394 Port One S-Video-Out Jack for TV output One S-Video-In Jack (option included with TV Tuner only) One Parallel Port (LPT1), supporting ECP / EPP 1.7 and 1.9 One COM port Infrared Transceiver supporting FIR & IrDA 1.1 file transfer One DVI Video Output One External Keyboard/Mouse (through Y-Cable) One Headphone-Out/Speaker-Out Jack One S/PDIF Out Port/Microphone-In Jack (through Y-cable only) One Line-In Jack (option included with TV Tuner only) One RJ-45 Jack for 1000M/10M LAN One RJ-11 Jack for 56K MDC Modem DC-In Jack
Keyboard	"Win Key" Keyboard (including a numeric keypad) 3 Application Hot-keys for Web Browser, E-Mail, and Application
PC Card	Two Type II PCMCIA 3.3V/5V Sockets, OR one Type III PCMCIA 3.3V/5V Socket (no Zoomed Video support)

2: Disassembly

Overview

This chapter provides step-by-step instructions for disassembling parts and subsystems. When it comes to reassembly, reverse the procedures (unless otherwise indicated).

We suggest you completely review any procedure before you take the computer apart.

Procedures such as upgrading/replacing the RAM, CD device and hard disk are included in the User's Manual but are repeated here for your convenience.

To make the disassembly process easier each section may have a box in the page margin. Information contained under the figure # will give a synopsis of the sequence of procedures involved in the disassembly procedure. A box with a  will provide any possible helpful information, and lists the relevant parts you will have after the disassembly process is complete. **Note:** The parts listed will be for the disassembly procedure listed ONLY, and not any previous disassembly step(s) required. Refer to the part list for the previous disassembly procedure. The amount of screws you should be left with will be listed here also. A box with a  contains warnings.

An example of these types of boxes are shown in the sidebar.

Disassembly

NOTE: All disassembly procedures assume that the system is turned **OFF**, and disconnected from any power supply (the battery is removed too).

Maintenance Tools

The following tools are recommended when working on the notebook PC:

- M3 Philips-head screwdriver
- M2.5 Philips-head screwdriver (magnetized)
- M2 Philips-head screwdriver
- Small flat-head screwdriver
- Pair of needle-nose pliers
- Anti-static wrist-strap

Connections

Connections within the computer are one of four types:

Locking collar sockets for ribbon connectors	To release these connectors, use a small flat-head screwdriver to gently pry the locking collar away from its base. When replacing the connection, make sure the connector is oriented in the same way. The pin1 side is usually not indicated.
Pressure sockets for multi-wire connectors	To release this connector type, grasp it at its head and gently rock it from side to side as you pull it out. Do not pull on the wires themselves. When replacing the connection, do not try to force it. The socket only fits one way.
Pressure sockets for ribbon connectors	To release these connectors, use a small pair of needle-nose pliers to gently lift the connector away from its socket. When replacing the connection, make sure the connector is oriented in the same way. The pin1 side is usually not indicated.
Board-to-board or multi-pin sockets	To separate the boards, gently rock them from side to side as you pull them apart. If the connection is very tight, use a small flat-head screwdriver - use just enough force to start.

Maintenance Precautions

The following precautions are a reminder. To avoid personal injury or damage to the computer while performing a removal and/or replacement job, take the following precautions:

1. **Don't drop it.** Perform your repairs and/or upgrades on a stable surface. If the computer falls, the case and other components could be damaged.
2. **Don't overheat it.** Note the proximity of any heating elements. Keep the computer out of direct sunlight.
3. **Avoid interference.** Note the proximity of any high capacity transformers, electric motors, and other strong magnetic fields. These can hinder proper performance and damage components and/or data. You should also monitor the position of magnetized tools (i.e. screwdrivers).
4. **Keep it dry.** This is an electrical appliance. If water or any other liquid gets into it, the computer could be badly damaged.
5. **Be careful with power.** Avoid accidental shocks, discharges or explosions.
 - Before removing or servicing any part from the computer, turn the computer off and detach any power supplies.
 - When you want to unplug the power cord or any cable/wire, be sure to disconnect it by the plug head. Do not pull on the wire.
6. **Peripherals** – Turn off and detach any peripherals.
7. **Beware of static discharge.** ICs, such as the CPU and main support chips, are vulnerable to static electricity. Before handling any part in the computer, discharge any static electricity inside the computer. When handling a printed circuit board, do not use gloves or other materials which allow static electricity buildup. We suggest that you use an anti-static wrist strap instead.
8. **Beware of corrosion.** As you perform your job, avoid touching any connector leads. Even the cleanest hands produce oils which can attract corrosive elements.
9. **Keep your work environment clean.** Tobacco smoke, dust or other air-borne particulate matter is often attracted to charged surfaces, reducing performance.
10. **Keep track of the components.** When removing or replacing any part, be careful not to leave small parts, such as screws, loose inside the computer.

Cleaning

Do not apply cleaner directly to the computer, use a soft clean cloth.

Do not use volatile (petroleum distillates) or abrasive cleaners on any part of the computer.

Power Safety Warning

Before you undertake any upgrade procedures, make sure that you have turned off the power, and disconnected all peripherals and cables (including telephone lines). It is advisable to also remove your battery in order to prevent accidentally turning the machine on.

Disassembly Steps

The following table lists the disassembly steps, and on which page to find the related information. **PLEASE PERFORM THE DISASSEMBLY STEPS IN THE ORDER INDICATED.**

To remove the Battery:

1. Remove the battery *page 2 - 6*

To remove the Bay One Device:

1. Remove the battery *page 2 - 6*
2. Remove the Bay One device *page 2 - 6*

To remove the Bay Two Device:

1. Remove the battery *page 2 - 6*
2. Remove the Bay Two device *page 2 - 8*

To remove the Primary HDD:

1. Remove the battery *page 2 - 6*
2. Remove the primary HDD *page 2 - 9*

To remove the HDD in Bay Two:

1. Remove the battery *page 2 - 6*
2. Remove the HDD in Bay Two *page 2 - 10*

To remove the HDD in Bay Three:

1. Remove the battery *page 2 - 6*
2. Remove the HDD in Bay Three *page 2 - 11*

To remove the TV Tuner Module:

1. Remove the battery *page 2 - 6*
2. Remove the TV Tuner module *page 2 - 12*

To remove the Keyboard:

1. Remove the battery *page 2 - 6*
2. Remove the keyboard *page 2 - 13*

To remove the System Memory:

1. Remove the battery *page 2 - 6*
2. Remove the keyboard *page 2 - 13*
3. Remove the memory *page 2 - 14*

To remove the CPU:

1. Remove the battery *page 2 - 6*
2. Remove the CPU *page 2 - 15*

To remove the Switch Keyboard Assembly:

1. Remove the battery *page 2 - 6*
2. Remove the keyboard *page 2 - 13*
3. Remove the switch keyboard assembly *page 2 - 17*

To remove the Bottom Case Assembly:

1. Remove the battery *page 2 - 6*
2. Remove the Bay One device *page 2 - 6*
3. Remove the Bay Two device *page 2 - 8*
4. Remove the primary HDD *page 2 - 9*
5. Remove the HDD in Bay Two *page 2 - 10*
6. Remove the HDD in Bay Three *page 2 - 11*
7. Remove the TV Tuner Module *page 2 - 12*
8. Remove the keyboard *page 2 - 13*

9. Remove the memory *page 2 - 14*
10. Remove the CPU *page 2 - 15*
11. Remove the switch keyboard assembly *page 2 - 17*
12. Remove the bottom case assembly *page 2 - 18*

To remove the HDD & MP3 Converter Board:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the HDD & MP3 con board *page 2 - 20*

To remove the Audio Board:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the audio board *page 2 - 21*

To remove the Modem:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the modem *page 2 - 22*

To remove the Floppy Disk Drive Assembly:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the FDD assembly *page 2 - 23*

To remove the TouchPad Module:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the TouchPad module *page 2 - 24*

To remove the Inverter Board:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the inverter board *page 2 - 25*

To remove the LCD:

1. Remove the battery *page 2 - 6*
2. Remove the bottom case assembly *page 2 - 18*
3. Remove the inverter board *page 2 - 25*
4. Remove the LCD *page 2 - 26*

Disassembly

Figure 2 - 1 Battery Removal Sequence

- Remove the 4 screws.
- Apply pressure at point 5 to push the battery up and out of the computer.

Removing the Battery

- Turn the computer **OFF** and turn it over.
- Remove screws **1** - **4** in **Figure 2 - 1a**.
- Apply gentle pressure at point **5** to push the battery up and out of the computer.

6. Battery
- 4 Screws

Removing the 2nd Modular Drive Bay (Bay Two) CD Device

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
2. Remove screws **1** - **3** in (**Figure 2 - 2a**), then lift the 3rd Modular Drive Bay cover off **4** and set it aside.
3. Remove screw **5** (**Figure 2 - 2b**), then gently push the device out of the bay (you may need to use a screwdriver to do this).

Figure 2 - 2
2nd Modular Drive Bay (Bay Two) CD Device Removal Sequence

- a. Remove the screws from the Bay Three cover.
- b. Remove screw 5.
- c. Push the device out of the computer.

Disassembly

Figure 2 - 3 1st Modular Drive (Bay One) Device Removal Sequence

- Remove the screws from the Bay Three cover.
- Remove screw 5.
- Push the device out of the computer.

Removing the 1st Modular Drive Bay (Bay One) Device

- Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
- Remove screws **1** - **3** in (**Figure 2 - 3a**), then lift the 3rd Modular Drive Bay cover off **4** and set it aside.
- Remove screw **5** (**Figure 2 - 3b**), then gently push the device out of the bay (you may need to use a screwdriver).

- 4. Drive Bay Cover
- 6. CD Device
- 4 Screws

Removing the Primary Hard Disk

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
2. Remove screws **1** and **2** (**Figure 2 - 4a**) and release the HDD connector cable **3**.
3. Remove the HDD assembly from the bay.
4. Remove screws **5** and **8** (**Figure 2 - 4c**) and the HDD connector cable **3**.

Figure 2 - 4

Disassembly

Figure 2 - 5 Bay One HDD Removal Sequence

- Remove the screws from the Bay Three cover.
- Remove screw 5 and push the device out of the computer.
- Remove the 4 screws from the HDD case.
- Disconnect the cable and remove the HDD assembly.
- Remove the screws from the assembly brackets.

Removing the Hard Disk Drive in Bay One

- Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
- Remove screws **1 - 3** in ([Figure 2 - 3a](#)), then lift the 3rd Modular Drive Bay cover off **4** and set it aside.
- Remove screw **5** ([Figure 2 - 5b](#)), then gently push the device out of the bay (you may need to use a screwdriver to do this).
- Remove screws **6 - 9** ([Figure 2 - 5c](#)), and disconnect cable **10** ([Figure 2 - 5d](#)), then take the HDD assembly out of the case.
- Remove screws **12 - 15** ([Figure 2 - 5e](#)) from the HDD assembly (note the disk orientation within the brackets).

- 17. Assembly Brackets
- 9 Screws

Removing the Hard Disk Drive in Bay Three

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
2. Remove screws **1** - **3** in ([Figure 2 - 3a](#)), then lift the 3rd Modular Drive Bay cover off **4** and set it aside.
3. Remove screws **5** - **8** ([Figure 2 - 6b](#)), then lift the HDD assembly out of the bay.
4. Remove screws **9** - **12** ([Figure 2 - 6d](#)) to separate the HDD from the case, and disconnect cable **13**.

Figure 2 - 6
Bay Three HDD Removal Sequence

- a. Remove the screws from the Bay Three cover.
- b. Remove the 4 screws.
- c. Lift the HDD assembly out of the bay.
- d. Remove the 4 screws from the HDD case, and disconnect the cable.

Disassembly

Figure 2 - 7 TV Tuner Module Removal Sequence

- Remove the screws from the Bay Three cover.
- Remove cable connector and the 4 screws.
- Lift the TV Tuner module out of the computer.

Removing the TV Tuner Module

- Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
- Remove screws **1 - 3** in ([Figure 2 - 3a](#)), then lift the 3rd Modular Drive Bay cover off **4** and set it aside.
- Remove the cable connector **5** ([Figure 2 - 7b](#)).
- Remove screws **6 - 9** ([Figure 2 - 7b](#)), and carefully lift the TV tuner module out of the computer.
- When re-inserting the TV tuner, the module should align with the connecting pins at point **11** (push firmly down to make sure the module is secure).

- 4. Drive Bay Cover
- 5. Cable Connector
- 10. TV Tuner Module
- 7 Screws

Removing the Keyboard

1. Turn the computer **OFF** and remove the battery ([page 2 - 6](#)).
2. Press the **two** keyboard latches at the top of the keyboard to elevate the keyboard from its normal position (you may need to use a small screwdriver to do this).
3. Carefully lift the keyboard up and out, being careful not to bend the keyboard ribbon cable **3** (**Figure 2 - 8b**).
4. Disconnect the keyboard ribbon cable from the locking collar socket **4** (**Figure 2 - 8b**).

Figure 2 - 8
Keyboard Removal Sequence

- a. Press the two latches to release the keyboard.
- b. Lift the keyboard out and disconnect the cable from the locking collar.

a.

b.

Re-Inserting the Keyboard

When re-inserting the keyboard firstly align the **five** keyboard tabs (**Figure 2 - 8b**) at the bottom of the keyboard with the slots in the case.

5. Keyboard

Disassembly

Figure 2 - 9 Memory Removal Sequence

- Remove the screws from the shielding plate.
- Remove the shielding plate.
- Pull the latches on the memory sockets to release the module(s). When the module pops up, lift it out.

Removing the System Memory

- Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and keyboard ([page 2 - 13](#)).
- Remove screws **1 - 3** (**Figure 2 - 9a**) from the shielding plate **4** (**Figure 2 - 9b**), and lift the plate up off the computer.
- Locate the memory sockets **5 & 6** (**Figure 2 - 9c**), and gently pull the latches **8 & 9** (and/or **10 & 11**) on the memory socket toward the front and rear of the computer as indicated.
- The module **7** (**Figure 2 - 9c**) will pop-up, and you can remove it.
- Insert a new module holding it at about a 30° angle and fit the connectors firmly into the memory slot.

Contact Warning

Be careful not to touch the metal pins on the module's connecting edge. Even the cleanest hands have oils which can attract particles, and degrade the module's performance.

- 4. Shielding Plate
- 7. Memory Module(s)
- 3 Screws

Removing the CPU

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and turn it over.
2. Remove screws **1** - **3** (**Figure 2 - 10a**), and lift the cover **5** (**Figure 2 - 10c**) up off the computer (it may be necessary to lift up the cover sticker **4** (**Figure 2 - 10b**) in order to reveal the heat sink caution label).

3. Remove the **four** screws from the heat sink in order indicated on the label, and lift out the heat sink **6** **Figure 2 - 11**.

Caution

The heat sink, and CPU area in general, contains parts which are subject to high temperatures. Allow the area time to cool before removing these parts.

Reassembly Screw Order

When replacing the heat sink, make sure you insert the screws in the same order indicated on the label.

5. CPU Cover
6. Heat Sink

- 7 Screws

Figure 2 - 10
Processor Removal Sequence

- a. Remove the three screws from the CPU cover.
- b. Remove the CPU cover
- c. Lift up the cover sticker if necessary.

Figure 2 - 11
Processor Removal Sequence (cont'd)

Remove the four screws from the heat sink in the order indicated.

Disassembly

Figure 2 - 12
**Processor
 Removal
 Sequence
 (cont'd)**

- Remove the screws from the bracket.
- Lift the bracket up.
- Raise the latch to unlock the CPU.
- Lift the CPU out of the socket.

- Remove screws **1** & **2** (**Figure 2 - 12a**) from the CPU bracket, then lift the bracket **3** off the CPU (**Figure 2 - 12b**).
- Fully raise latch **4** in the direction indicated in **Figure 2 - 12c** to unlock the CPU.
- Carefully (it may be hot) lift the CPU **5** up out of the socket. (**Figure 2 - 12d**).
- When re-inserting the CPU pay careful attention to the pin alignment, it will fit only one way (don't force it!).

- 3. CPU Bracket
- 5. CPU
- 2 Screws

Removing the Switch Keyboard Assembly

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), keyboard ([page 2 - 13](#)), and memory ([page 2 - 14](#)).
2. Carefully slide the center cover assembly **1** (**Figure 2 - 13a**) forward.
3. Carefully disconnect the cable at point **2** (**Figure 2 - 13b**) and lift the center cover assembly out of the computer.
4. Remove screws **3** - **7** (**Figure 2 - 13c**) and disconnect the cable at point **8**, then lift up the switch keyboard assembly **9**.

Figure 2 - 13
Switch Keyboard Assembly Removal Sequence

- a. Slide the center cover assembly forward.
- b. Disconnect the cable and lift off the cover assembly.
- c. Remove the screws and disconnect the cable from the switch keyboard assembly.
- d. Lift the switch keyboard assembly off the center cover assembly.

1. Center Cover Assembly
 9. Switch Keyboard Assembly

- 5 Screws

Disassembly

Figure 2 - 14 Bottom Case Assembly Removal Sequence

- a. Remove all the previously listed devices and components prior to this page (as applicable).
- b. Remove the 14 screws from the bottom of the computer.

Removing the Bottom Case Assembly

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), and all applicable devices listed in the previous pages (from [page 2 - 6](#) to [page 2 - 17](#)).
2. Remove screws **1** - **14** ([Figure 2 - 14b](#)) from the bottom of the computer.

- 14 Screws

3. Turn the computer back over and disconnect cables 1 - 3 (Figure 2 - 15a), and remove screw 4.
4. Remove screws 5 - 15 (Figure 2 - 15b) from the rear of the computer.
5. Carefully ease the top case assembly 16 (Figure 2 - 15c) off the bottom case assembly 17.

a.

c.

b.

Figure 2 - 15
Bottom Case Assembly Removal Sequence (cont'd)

- a. Disconnect the cables and remove the screw from inside the top case assembly.
- b. Remove the 11 screws from the rear of the computer
- c. Carefully lift the top case assembly up and off the bottom case assembly.

16. Top Case Assembly
 17. Bottom Case Assembly

- 12 Screws

Disassembly

Figure 2 - 16 HDD & MP3 Converter Board Removal Sequence

- a. Remove the 2 screws.
- b. Lift the HDD & MP3 converter board off the connector.

Removing the HDD & MP3 Converter Board

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), and the bottom case assembly ([page 2 - 18](#)).
2. Remove screws **1** & **2** (**Figure 2 - 16a**) from the HDD & MP3 converter board.
3. Lift the converter board **3** (**Figure 2 - 16b**) off the connector **4** on the mainboard.

3. HDD & MP3 Converter Board

- 2 Screws

Removing the Audio Board

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), and the bottom case assembly ([page 2 - 18](#)).
2. Remove screw **1** (**Figure 2 - 17a**) and disconnect cable **2** from the mainboard.
3. Lift the Audio DJ bezel module **3** (**Figure 2 - 17b**) out off the computer, and remove cable **4**.
4. Remove screws **5** - **10** (**Figure 2 - 17c**), and disconnect cables **11** & **12**.
5. Lift the audio board **13** (**Figure 2 - 17d**) off the Audio DJ bezel.

Figure 2 - 17
Audio Board Removal Sequence

- a. Remove the screw and disconnect the cable.
- b. Lift the Audio DJ bezel out of the computer and remove the connector cable.
- c. Remove the screws and cables from the rear of the audio board.
- d. Remove the audio board from the Audio DJ bezel.

3. Audio DJ Bezel
4. Audio DJ Cable
13. Audio Board

- 7 Screws

Disassembly

Figure 2 - 18 Modem Module Removal Sequence

- a. Remove the screws and lift the modem module off the mainboard.

Removing the Modem Module

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), and the bottom case assembly ([page 2 - 18](#)).
2. Remove screws **1** - **2** (**Figure 2 - 18**) and lift the modem module **4** off the mainboard modem connector **3**.

4. Modem Module

- 2 Screws

Removing the Floppy Disk Drive Assembly

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and the bottom case assembly ([page 2 - 18](#)).
2. Remove screws **1** - **4** (**Figure 2 - 19a**) on the floppy disk drive assembly **5** (located under the top case assembly).
3. Lift the floppy disk drive assembly off the top case.

Figure 2 - 19
Floppy Disk Drive Assembly Removal Sequence

- a. Remove the 4 screws.
- b. Lift the FDD assembly off the top case.

Disassembly

Figure 2 - 20
**TouchPad Module
Removal
Sequence**

Remove the 6 screws and lift the TouchPad module off the top case.

Removing the TouchPad Module

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), the bottom case assembly ([page 2 - 18](#)) and the floppy disk drive assembly ([page 2 - 23](#)).
2. Remove screws **1** - **6** ([Figure 2 - 20](#)) on the TouchPad module **7**.
3. Lift the TouchPad module off the top case.

7. TouchPad Module

- 6 Screws

Removing the Inverter Board

1. Turn the computer **OFF**, remove the battery ([page 2 - 6](#)) and the bottom case assembly ([page 2 - 18](#)).
2. Remove any rubber covers and screws **1 - 4** (**Figure 2 - 21a**), then run your finger around the middle of the frame to carefully unsnap the LCD front panel module **5** from the back.
3. Remove screw **6** (**Figure 2 - 21b**) from the inverter, and carefully lift the inverter board up slightly.
4. Disconnect cables **7 & 8** (**Figure 2 - 21c**) from the inverter, then remove the inverter **9** (**Figure 2 - 21d**) from the top case assembly.

Figure 2 - 21
**Inverter Board
 Removal
 Sequence**

- a. Remove the 4 screws and unsnap the LCD front panel module from the back.
- b. Remove the screw from the inverter board and lift the board up slightly.
- c. Disconnect the cables from the inverter.
- d. Remove the inverter.

Disassembly

Figure 2 - 22
LCD Removal
Sequence

- Remove the 8 screws from the LCD.
- Disconnect the cable and lift up the LCD.
- Remove the screws and separate the brackets from the LCD.

Removing the LCD

- Turn the computer **OFF**, remove the battery ([page 2 - 6](#)), the bottom case assembly ([page 2 - 18](#)) and the inverter board ([page 2 - 25](#)).
- Remove screws **1** - **8** (**Figure 2 - 22a**) from the LCD.
- Disconnect the cable at point **9** (**Figure 2 - 22b**), then lift the LCD **10** up off the display back panel **11** and top case module **12**.
- Remove screws **13** - **18** (**Figure 2 - 22c**) from the LCD brackets **19** & **20**, then separate the LCD from the brackets.

Appendix A:Part Lists for D800P

This appendix breaks down the **D800P** model notebook's construction into a series of illustrations. The component part numbers are indicated in the tables opposite the drawings.

Note: This section indicates the *manufacturer's* part numbers. Your organization may use a different system, so be sure to cross-check any relevant documentation.

Note: Some assemblies may have parts in common (especially screws). However, the part lists DO NOT indicate the total number of duplicated parts used.

Note: Be sure to check any update notices. The parts shown in these illustrations are appropriate for the system at the time of publication. Over the product life, some parts may be improved or re-configured, resulting in *new* part numbers.

Part List Illustration Location

The following table indicates where to find the appropriate part list illustration.

Table A-1
Part List Illustration
